PART I.

JUDICIAL.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Judicial),—dated 19th January 1892.

READ:—

Report on the Administration of Criminal Justice in Mysore for the year 1890.

No. 11653—110, DATED 19TH JANUARY 1892.

CHIEF COURT ORIGINAL JURISDICTION.

REVIEW THEREON.—The original ordinary Criminal Jurisdiction, which the Chief Court has, heretofore, under Section 12 of the Mysore Chief Court Regulation, been exercising, was, from 15th September 1890, withdrawn from it and transferred to the District and Sessions Court, Nundydroog Division, which was re-established from that date.

2. There were 28 Sessions cases, affecting 51 persons, for disposal, of which 11 were tried by Jury. Twenty-nine of the persons committed for trial were convicted and the rest acquitted or discharged. Of the convicted persons, one was sentenced to death, 3 to transportation for life and the rest to imprisonment. None was fined or sentenced to whipping. The average duration of each case fell from 1·20 in 1889 to ·53 days. Eleven cases were tried by Jury and it is satisfactory to note that in all of them the Judge approved of the verdict.

APPELLATE JURISDICTION.

3. Including the pending file of the previous year, there were for disposal 182 appeals, involving 241 persons, as compared with 147 appeals and 204 persons in 1889. Four of these were preferred by Government, under Section 417, Criminal Procedure Code. One hundred and seventy appeals, affecting 216 persons, were disposed of as against 122 appeals and 172 persons in the previous year, with the result that the conviction and sentence of lower Courts were, in the case of 32 persons or 13·27 per cent, of the total number, reversed, and, in the case of 37 persons or 15·35 per cent, modified, as compared with 26·96 and 6·37 per cents in the previous year. Of the 4 appeals preferred by Government, one was successful, 2 were rejected and the remaining one was pending disposal. The average duration of each appeal remained nearly the same as in the previous year, *viz.*, 32 days.

4. Six cases involving 6 persons were referred, under Section 374 of the Criminal Procedure Code, for confirmation of the sentence of death passed on them. The sentence was confirmed in the case of 4 persons, two of whom, however, on petition to His Highness the Maharaja, had their sentence commuted to one of transportation for life.

5. One thousand, nine hundred and twenty-one calenders relating to trials and orders passed in the exercise of original and appellate jurisdiction by Sessions Judges and Magistrates were received by the Chief Court on its Revision side, as against 1,435 in the previous year, and the number of cases in which it called for records, whether *suo moto* on the perusal of calenders or on reference from the Sessions Judges and District Magistrates, was 268, affecting 573 persons, as against 182, affecting 355 persons in the previous year. Besides these, there were for disposal 104 applications, affecting 160 persons, from private parties for revision of orders passed against them, as against 110 applications and 191 persons in 1889, and the total number of cases and persons, which the Chief Court had to deal with, were 372 and 733 as against 292 and 546 respectively in the previous year. Of these, convictions or orders were set aside in the case of 73 persons as against 80 in 1889, modified in the case of 71 against 9 and enhanced in the case of 2 against 7.

COURTS SUBORDINATE TO CHIEF COURT.

6. The number of Courts increased from 128 in 1889 to 131, and the increase is due to the establishment of the District and Sessions Court, Nundydroog Division, and to the investiture of Sub-Judges, Mysore and Bangalore, with 1st Class Magisterial powers.

7. Receipts aggregated to Rs. 76,257—12—6, which was less than those of 1889 by Rs. 7,865—3—11, and the decrease is explained as due chiefly to the smaller amount of criminal fines, process and other fees, realized in the Mysore District. The amount of the charges has risen by Rs. 2,710—12—8, being Rs. 2,32,948—0—4 against Rs. 2,30,237—3—8 in 1889, and the increase was chiefly in the Kolar and Kadur Districts.

8. The number of offences reported has slightly fallen from 15,251 in 1889 to 15,084, of which 3,476 cases were dismissed without issue of processes and 11,576 were returned as true as against 3,220 and 12,398 respectively in the previous year. Of cases returned as true, 11,293—2,209 being offences under the Local and Special Laws and 9,084 under the Indian Penal Code—involving 22,215 persons—were brought to trial as against 12,029 cases and 24,883 persons in the previous year. The trial of these persons resulted in the conviction of 7,410 or 33·35 per cent of total number as compared with 34·44 per cent in 1889.

9. Six persons are shown as convicted of murder against 27 in 1889. Of these, 4 belonged to Kolar, 1 to Shimoga and the other to the Kadur District. According to the Police Returns, 13 persons were convicted and they were distributed among all the Districts, except Mysore and Tumkur.

10. Thirty persons in 13 cases are returned as convicted of robbery and dacoity as against 56 persons and 23 cases in 1889, Kolar as in the previous year taking the lead.

11. Here again, the Magisterial statistics differ from the Police Returns, according to which the number of cases and persons convicted of dacoity and robbery were 9 and 22 respectively. These discrepancies between the Magisterial and Police Returns require explanation.

12. The total number of persons brought to trial before all Magistrates in the Province was 22,220 as against 25,117 in the previous year, of whom 7,347 persons or 33 per cent were convicted and the rest discharged, acquitted or otherwise disposed of. The average duration rose to 5·2 days from 4·4 in 1889, though the number of witnesses that attended Courts declined from 42,501 in 1889 to 38,921. The amount paid for dieting and travelling expenses of witnesses was Rs. 139—11—10 as compared with Rs. 128—6—8 in the previous year.

13. One hundred and six cases, affecting 182 persons, were disposed of by Sessions Courts as against 90 cases and 202 persons in the previous year, with the result that 63 persons in 50 cases or 32·64 per cent of the total number were convicted and the rest discharged or acquitted. The average duration has fallen from 2·53 in 1889 to 1·52.

14. It is only in the Nundydroog Division, where the system of trial by Jury was in force, that 2 cases were so tried. The remaining cases were all tried with the aid of Assessors, with whom the Judge agreed in 80 cases, there being difference of opinion between the Judge and the Assessor or Assessors in the remaining 16 cases.

15. In spite of the hope expressed in the Review of the last year's Administration Report that more cases would be taken up by District Magistrates, the Government notice with regret that the number of cases taken up by them fell from 134 to 113. The desirability of the District Magistrates taking up more cases than they do at present should be pointed out to them by the Chief Court, who should insist upon a certain class or proportion of cases being tried by them.

16. Two European British subjects were tried during the year.

17. Punishments awarded by different tribunals were as follows:—

Death	..	4
Transportation for life	..	5
Imprisonment — Rigorous	..	1,250
Imprisonment — Simple	..	206
Fines	..	6,032
Whipping	..	118

and they maintained the same percentages as in the previous year.

18. Fifty-six (but according to Statement No. 3, 41) persons as against 46 in 1889 were ordered to find security for good behaviour, of whom 11 as against 17 in 1889 were imprisoned for default of furnishing the security ordered.

19. The aggregate amount of fines imposed was Rs. 49,796—0—10 as compared with Rs. 52,718—9—3, and the amount realized was Rs. 43,295—10—7 as compared with Rs. 52,718—9—3 in the preceding year.

20. The amount of compensation paid to complainants was Rs. 4,473—8—9 and that paid to the accused, for frivolous or vexatious complaints preferred against them, was Rs. 208—14—0 as compared with Rs. 4,487—5—10 and Rs. 331—8—0 respectively in 1889.

Appellate Jurisdiction.

21. There were 672 appeals, affecting 1,190 persons, as compared with 717 appeals and 1,137 persons in 1889. Nine hundred and ninety-six of them appealed to the Courts of Magistrates and 194 to the Courts of Sessions Judges. About 43 per cent of the appeals preferred to Magistrates and about 50 per cent of those preferred to Sessions Judges were successful. The average duration of appeals has slightly risen in the Courts of Magistrates from 8·23 to 10·72 and in the Sessions Courts from 6·82 to 11·52 days. No reasons have been assigned for the high increase of the duration in the Courts of Sessions Judges, which was nearly double that in the previous year.

22. Owing to the relief which the establishment of the District Court of the Nundydroog Division has given to the Chief Court, the Chief Judge was, the Government are glad to observe, enabled to inspect no less than 11 Courts including those of the District and Assistant Magistrates of Tumkur and Chitaldroog. It is desirable that, in future reports, similar information should be given as to the number of subordinate Courts that the Sessions Judges, District Magistrates and Sub-Division Officers may inspect.

23. On the whole the result of the Criminal trials during the year under review has been satisfactory. There has been a slight diminution of crime throughout the Province, the total number of offences reported and the number of persons brought to trial being respectively 15,084 and 22,220, 1·09 and 11·5 per cents less than in the previous year.

M. NARAIN RAO,
Under-Secretary.

To—The Chief Judge in Mysore.

Proceedings No. 2674—276, dated 3rd June 1891.

Government Notification No. 231, dated 6th September 1890.

Letters dated 2nd July 1891, and 22nd December 1891, from the Public Prosecutor, Nundydroog Division, submitting bills for Rs. 2,780 for appearing before the Chief Court during 18 months from 1st July 1890 to end of December 1891, in pursuance of the orders above read.

CAMP No. 1127-30, DATED 22ND JANUARY 1892.

ORDER THEREON.—The question for decision in the papers above read is, what arrangement should be made for appearance in the Chief Court in support of convictions in criminal appeals heard by that Court.

2. The first duty of a Public Prosecutor is in original trials before the Sessions Court. In appeals before the Chief Court from convictions and sentences passed by the Sessions Court, notice of such appeals has, under Section 422 of the Criminal Procedure Code, to be given to such officer as the Government may appoint in this behalf. Before the Rendition, the Public Prosecutor at Bangalore was the officer appointed under the orders contained in Chief Commissioner's Proceedings No. 1369—16, dated 22nd May 1878, to receive these notices and to appear to support convictions from all the three Sessions Courts in the State. When a Government Advocate was appointed in April 1881, this duty devolved upon him; and when, in February 1890, Mr. Meenacshaiya, Government Advocate, was appointed Legislative Secretary and, as a temporary measure, Inspector General of Registration in addition to his duties as Government Advocate, the same duty continued to vest in him, and the intention then was to appoint some other officer as Inspector General of Registration. But such officer was not appointed, and Mr. Meenacshaiya has continued to discharge the triple function till June 1890, when he was relieved of the duty of appearing in the Chief Court, and this duty was put upon the Public Prosecutor, as under the orders of 22nd May 1878. Under this arrangement, the Public Prosecutor has appeared in 61 cases during the 18 months from 1st July 1890 to 31st December 1891, and has submitted bills for Rs. 2,780. The charge is heavy, and the arrangement has, owing chiefly to the re-constitution of the Nundydroog Sessions Court, been found to work unsatisfactorily and to cause inconvenience, as the Public Prosecutor has to go to Kolar and Tumkur for Sessions, and when he does so, he cannot appear in the Chief Court, and the hearing of criminal appeals in the Chief Court cannot be posted to distant dates to suit the Public Prosecutor's engagements, while the appellants are in custody. A revision of the arrangement is thus called for.

3. Mr. Meenacshaiya with his duties in the Legislative and Registration Departments cannot put in appearances in the Chief Court in the ordinary course of judicial business, except in special cases, but Government is not prepared to appoint a separate officer as Government Advocate on the high salary which is necessary to secure the services of a competent person. Moreover, at present, there is difficulty in finding a suitable officer to be Inspector General of Registration solely, or in addition to other functions.

4. One of the alternatives suggested by the Chief Judge is to attach the Public Prosecutor of Nundydroog Division to the Chief Court on a salary of Rs. 200 (his present pay is Rs. 150) and require him to put in appearances in the Chief Court and also conduct Sessions trials in Bangalore. If this be accepted, the Chief Judge would recommend that the Head-Quarter Inspectors of Police in Kolar and Tumkur may be appointed Public Prosecutors for those Districts respectively. This last proposal does not commend itself to the Government.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Judicial),—dated 22nd January 1892.

5. Under such circumstances, and on a careful consideration of the subject in all its aspects and of the various alternatives which have been suggested, His Highness the Maharaja's Government are pleased to prescribe the following arrangement as about the best solution of the question now before them:—

i. The duties of Government Advocate, Legislative Secretary and Inspector General of Registration to continue to be vested in the same officer.

ii. The Government Advocate will be bound to advise the Government in all legal matters, and to appear for Government in Court in special cases when directed by Government to do so.

iii. An Assistant Government Advocate to be appointed on a salary of Rs. 200 per mensem and to be attached to the Chief Court to support convictions in all appeals and revision cases, to appear in applications made to Chief Court for transfer of cases, and generally to appear before the Chief Court in all cases in which Government have to be represented in that Court, as well as to advise the Government when called upon to do so in all legal matters—no separate fees will be allowed in any such cases.

6. In pursuance of the above arrangements, Mr. S Ramaswami Iyer, Public Prosecutor, Nundydroog Division, is appointed Assistant Government Advocate.

7. Mr. Ramaswami Iyer's bills for Rs. 2,780 will be reduced to Rs. 2,604 by allowing only Rs. 16 for each case of supporting a Magistrate's conviction. The bills thus altered are sanctioned and will be forwarded to the Comptroller for audit and payment in due course.

REVENUE.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Revenue),—dated 12th January 1892.

NOTIFICATION.

The 12th January 1892.

No. 401.—In continuation of Notification Camp No. 384-92, dated 27th October 1891, directing an alteration of the khists for the payment of Land Revenue, it is hereby ordered that all village accounts should hereafter begin on 1st July in any year and end on 30th June in the following year.

2. The current revenue year's village accounts should include the period from 1st April 1891 to 30th June 1892.

No. 11187-95—Cir 174.

To—The Deputy Commissioners of Districts, for information and guidance.
The Comptroller to the Government of Mysore.

The 14th January 1892.

No. 404.—Under the provisions of the Excise Act XXII of 1881, His Highness the Maharaja's Government are pleased to make the following rules for the management and supervision of Distilleries and to regulate the manufacture and issues of country spirits :—

1. The Distillery shall be opened at sun-rise and be closed at sun-set, except on Sundays and authorized holidays, when it will be closed. Under the special order of the Excise Commissioner, and on such conditions as he may prescribe, the Distillery may be worked during nights and on holidays to bring up stock or to meet urgent demand.

2. The Distillery shall be open at all times for inspection by the officers of the Excise Department, or any other official appointed for the purpose. All locks of the Distillery shall be sealed after work is closed each day, and the keys delivered under seal to the officer in charge of the Distillery for safe custody. No arrack shall be taken out of the Distillery until it has been measured and tested by an official of Government appointed for that purpose. The contractor shall promptly execute such repairs to the Distillery buildings and channels as may be pointed out by the Executive Engineer, provided the cost in the year does not exceed 50 rupees.

3. (*a*.) The old contractors shall give, and the new contractor shall take over, any arrack which may remain as stock in hand on the 1st April 1892, paying for the same such value as may be fixed by the Excise Commissioner. Such stock shall not ordinarily be in excess of that manufactured monthly on an average for the past 36 months.

(*b*). Should the new contractor so require, the old contractors shall cease preparing "wash" from the 1st March 1892, and vacate the buildings to admit of the new contractor commencing operations from the same day. Notice to this effect should be given in writing to the old contractors not later than 22nd February 1892. Should no such notice be given, the old contractors will continue distilling only till 31st March 1892, and must, by that date, utilize all the wash they have on hand, and cease distilling thereafter.

(*c*). If any apparatus, stock and block belonging to the old contractors be required by the new contractor, he shall give notice to the old contractors, by the 1st March 1892, of his intention to purchase them at a fair valuation ; and in case of dispute, the Excise Commissioner will decide what such fair valuation shall be. But if no such notice be given by the 1st March 1892, the old contractors shall be at liberty to remove the same, leaving the new contractor to make his own arrangements in the matter. Improvements of a permanent nature shall be retained and not be disturbed, except with the approval of the Executive Engineer.

4. The arrack manufactured shall be of good quality. The articles used in distilling shall be approved by the Senior Officer in charge of the Distillery. No ingredients obnoxious to health shall be used in distilling, or put into the arrack after it has been made. Standard Saccharometers by Long and Dring and Fage for determining the gravity of the " wash" in its several stages till distilled, shall be kept by the contractor, and a true and correct record maintained for verification and check by Excise Officers. All wash shall be secured under lock and key, and kept in closed rooms. All spirits shall be kept in a store-room which will be provided by Government for the purpose, and the key of which will be kept by the Officer in charge.

5. The contractor shall keep true and correct accounts in the prescribed forms of his receipts and disbursements, and of the quantity and strength of the spirits manufactured in and issued from the Distillery, and of all the materials received and expended daily at the Distillery. The cash accounts of the contractor shall be posted up daily, each item of purchase of stock being duly vouched ; and an abstract of the cash accounts in the prescribed form shall be furnished monthly to the Excise Commissioner's Office, duly attested by the contractor or his agent. He shall produce all such accounts, whenever required to do so, for inspection by the Excise Commissioner, or any other official appointed for the purpose.

6. The distiller shall be bound ordinarily to have a month's supply (35,000 gallons), and never less than 17,500 gallons of liquor in store, and in order that this may be the case from 1st April 1892, he will be allowed to commence distilling on 1st March 1892, provided that no liquor so distilled shall be sold or passed out of his custody or that of his employés before the 1st April 1892. When fresh liquor which is less than 10 days old is sent out, it shall be issued at 19° under proof instead of at 20° under proof. All liquor sent to Bonded Warehouses and depôts more than 50 miles from the Distillery shall be passed at 19·5° under proof.

7. The following rules regarding the issue of arrack from the Distillery shall be observed :—

(*a*). Arrack shall ordinarily be issued at a strength 20° under proof, (excepting in special cases mentioned in Rules 6 and 9). Should a vendor desire to have liquor at a higher strength than the above, the liquor so issued shall not be of a greater strength than 10° under proof. Liquor of strength at 10° under proof shall be issued from the Distillery in two dozen quart bottles, four dozen pints and so on for lower denominations of flasks as for English and Foreign spirits ; and it shall be sold to vendors in botties to be provided at the vendors' expense, intact as issued from the Distillery, with the seals and labels affixed on them by the Senior Officer in charge of the Distillery, and under cover of his passes. In cases in which breakage in transit may be apprehended, the Senior Officer will arrange for the bottling and sealing being done by Range Supervisors to whom adequate supplies of such liquor will be sent in jars from the Distillery for the purpose.

(*b*). Should the vendor wish to have liquor of higher strength than 10° under proof, he should obtain therefor the special orders of the Deputy Commissioner of the District for which the liquor is intended. Under these special orders, the liquor indented for will be issued.

(*c*). No spirit below 20° under proof shall be ordinarily issued from the Distillery, but should there be a demand for liquor of lower strength than 20° under proof, liquor at 30° under proof may be specially issued from the Distillery at proportionately reduced rates of duty, such liquor being kept and accounted for separately both in the Distillery and in Bonded Warehouses.

8. The arrack manufactured shall not be adulterated or diluted. But distilled water may be used at the Distillery under the supervision of the Senior Officer in charge of the Distillery, for the purpose of reducing the strength of the liquor.

9. (*a*). Nothing in these rules shall preclude the Senior Officer in charge of the Distillery, upon written application made to him for that purpose, from granting to respectable private individuals for *bond fide* private use, but not for sale, and to hospitals, museums and other public institutions, liquor of any strength manufactured at the Distillery, at proportionate rates of price and duty, in quantities of not less than one ordinary quart bottle, the price being paid to the manufacturer, and duty to the Senior Officer in charge of the Distillery, who shall remit the same into the Treasury without unnecessary delay.

(*b*). The contractor may, with the permission of the Excise Commissioner, manufacture milk-punch or any other sweet liquors under the supervision of the Excise Officers, who will recover from the manufacturer the duty on the spirit so utilized. Such sweet liquors, when duly sealed and labelled by the Senior Officer in charge of the Distillery at the contractor's expense, may be sold direct from the Distillery to respectable persons and vendors. The prices at which such liquors shall be sold will be regulated by the Excise Department.

10. The measure to be used at the Distillery shall be the standard Imperial gallon ; and $\frac{1}{1000}$ part thereof shall be equal to one arrack dram of 1,500 minims. These measures shall be passed and sealed by the Excise Department.

11. The contractor shall conform to the existing rules, and any additional rules that may be prescribed from time to time by the Government, and he shall see that all his employés give full effect to them, and to all the rules and orders passed by Government for the custody and regulation of the stock distilled and passed out, the cleanliness of all vessels used, the tinning of metal vessels, the watch, ward and sanitary condition of the enclosure, and other matters affecting either the Government or the contractor's interests, or both. All still-heads, pipes and worms used for the distillation or reception of liquor shall be of cast tin ; but if copper heads, pipes and worms are used, they shall be properly and efficiently lined with tin at prescribed intervals.

12. If any wilful breach of any of the above conditions is committed by the contractor, or with his connivance and privity, by any of the men employed by him in the manufacture, custody, carriage or sale of arrack, it shall be at the discretion of the Government to suspend or cancel the contract, and declare the deposit forfeited, and cause the business to be carried on under the supervision of Government Officials of the Excise Department.

13. The Government may allow the contractor, subject to such conditions as may be prescribed by Government in that behalf, to manufacture and sell Colombo or other kinds of arrack or liquor, but no deduction shall be allowed therefor on the revenue realized from the ordinary country arrack adverted to in this Notification.

14. Government shall not be held responsible for the destruction, loss or damage of any spirits stored in the Distillery, by fire or theft or by any other cause whatever. In case of fire or other accident, the Officers in charge of the Distillery shall render all assistance that may be required of them by the manufacturer.

15. The Distillery shall be open only for the entrance and exit of persons who have business within it; others who may desire to inspect the Distillery shall obtain special permission of the Excise Commissioner.

16. All persons entering the Distillery shall be under the orders of the Officer in charge, in respect of their conduct and proceedings within the Distillery, and shall be liable to search on their quitting the premises, at the discretion of the Officer in charge.

17. Except as otherwise provided, all orders passed and proceedings taken under these rules by Officers of the Excise Department shall be subject to appeal to their respective immediate superiors within two months.

" By Order,"

T. ANANDA ROW,

Chief Secretary.

No. 11280-91—CIR. 175, DATED BANGALORE, 15TH JANUARY 1892.

ORDER.—In modification of the orders contained in para 7 of Proceedings No. 323—33, dated the 24th September 1891, the Government direct that contractors of Toddy farms should make a deposit *in cash* or *Government Securities* equivalent to three months' contract amount. If personal security be also offered in addition, it may be taken, but its production should not be insisted upon.

2. The payment of khists by Toddy farmers should not be delayed longer than a month, but there can be no objection to the farmers paying the same into the Government Treasury once in ten days or a fortnight, if they desire to do so. The establishment sanctioned in paras 11 and 12 of the Proceedings referred to above, together with the two peons sanctioned in Proceedings No. 8053—844, dated 24th October 1891, may be continued till the 31st March 1892

3. Injury to date trees by tapping immature trees or trees which have not grown sufficiently well after the previous tapping should be strictly prohibited and the offenders dealt with according to law.

4. With reference to Proceedings No. D. 54, dated 25th December 1891, permitting raiyats to cut date leaves as fodder for cattle in this season of drought, the Deputy Commissioners are requested to notify to the public that they should not remove the four centre leaves from a date tree or plant for feeding cattle or for any other purpose as their removal would destroy the trees altogether. The Government rely on the local officers for the proper management of date groves so that the future revenue in this respect may not suffer or be imperilled.

5. All bills of the Toddy Department and Toddy Establishments shall be paid upon the joint signatures of the Excise Assistant Commissioner and the Special Revenue Officer.

6. The reports of Districts already settled by the Excise Assistant Commissioner and Special Revenue Officer should be sent at an early date through the Excise Commissioner.

FOREST.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Forest),—dated 11th January 1892.

READ :—

Letter No 2586—231 of the 24th December 1891, from the Inspector General of Forests and Plantations in Mysore.

No. 11196-7—206, DATED BANGALORE, 11TH JANUARY 1892.

ORDER THEREON.—With the foregoing letter, the Inspector General submits a supplemental Budget for Kheddas for Rs. 21,774 for the year 1891-92 with a copy of Mr. Sanderson's letter No. 330 of the 18th December 1891, explaining the necessity for the same.

2. A sum of Rs. 68,000 as shown in the margin was provided for Kheddas in the current year's Forest Budget. The Inspector General states that the sum of Rs. 44,710 provided for Khedda operations has already been placed at the disposal of the Superintendent who is now in urgent need of more funds for carrying on the operations. Mr. Sanderson's explanation for such unforeseen heavy expenditure being that when he submitted the original Budget in November 1890, he had no experience of the work at Kakankote, which requires protection of trenches, the employment of local hunters and the absolute necessity of extending the telephone arrangements, &c.

	Rs.
For Khedda operations	44,710
For Establishment and contingencies ...	23,090
Total...	67,800
or in round figures	68,000

3. Under the explanation given, the Government of His Highness the Maharaja are pleased to sanction the supplemental Budget submitted by the Inspector General, for Rs. 22,000. The total amount of the Khedda Budget for 1891-92 will be thus raised to Rs. 90,000. Government hope that Mr. Sanderson will do his best to make Khedda operations self-supporting, by resorting if possible to the hot weather catch he proposes. The Government are distinctly of opinion that nothing like the large amount sanctioned for the current year can be given in the next or future years. The Khedda Department has so far been a source of loss to Government, and unless some definite prospect of making it remunerative is practically shown, the question of abolishing it will force itself on the reluctant consideration of the Government in the near future.

Letter from the Deputy Commissioner, Mysore District, dated 11th December 1891, No. 773, recommending the grant of permanent advances to Hospital Assistants and Taluk Sheristadars, to meet charges in connection with the feeding of in-patients in the Local Fund Dispensaries in the District, subject to recoupment by monthly detailed bills to be submitted to the Deputy Commissioner

No. 10955-64—L. 975, DATED BANGALORE, 8TH JANUARY 1892.

ORDER THEREON.—Before passing final orders on the proposal submitted in the letter read above, the Deputy Commissioner is requested to report, whether it would not be sufficient to grant the permanent advances recommended to the Hospital Assistants alone. It seems unnecessary to grant separate advances to Taluk Sheristadars also.

2. The other Deputy Commissioners will be requested to report what sums they would propose to place as permanent advances in the hands of the Hospital Assistants of their respective Districts, to defray the feeding charges of in-patients.

Letter No. 518, dated 5th January 1892, and dockets Nos. 533 and 535, dated 15th January 1892, from the Deputy Commissioner of the Kadur District, requesting that the sums sanctioned out of District Funds for well works may be placed at his disposal.

Letter from the Comptroller, dated 21st December 1891, No. 4230, recommending the enhancement of the allotment for wells made for the Kadur District out of District Funds.

No. 11619-28—L. 1101, DATED BANGALORE, 21ST JANUARY 1892.

ORDER THEREON.—It is observed that a sum of Rs. 51,075 has been sanctioned by Government on account of "Miscellaneous Public Improvements" including wells in the current year's District Fund Budgets of the several Local Fund Circles. From the final issue of the D. P. W. Budget for 1891-92 and Para 9 of the Chief Engineer's Note thereon, it would appear that a large portion of the grant aforementioned had to be appropriated to meet the actual requirements in the several Divisions, leaving only a small sum of Rs. 6,300 for works to be executed by the Revenue Department. It is not stated whether the modifications made in the final issue of the D. P. W. Budget have been laid before the respective Local Fund Committees and their sanction obtained, as, under Para 4 of Government Proceedings, dated 7th July 1891, No. 4117-26—286, no provision that is not sanctioned by the Board could be utilized by the Public Works Department. It is presumed that such sanction has been obtained.

2. As the allotments made in the District Fund Budgets, from which appropriations have been sanctioned by Government on receipt of the estimates, have otherwise been utilized by the Public Works Department and the small amounts now available are insufficient to meet the cost of the estimates already sanctioned, the Comptroller is authorized to adjust the excess charges from the sums sanctioned in Government Proceedings, dated 7th December 1891, No. D. 6-11, reporting the result to this office as early as possible; and to place at the disposal of the Deputy Commissioner, Kadur, a further allotment of Rs. 5,000 for well works in the District in addition to Rs. 8,000 allowed by Government Proceedings, dated 10th September 1891, No. 6591-600—L. 451. If more funds are required for expenditure during 1891-92 on wells in any of the Districts, except Bangalore and Kolar, for which additional funds have already been sanctioned, the Deputy Commissioners should at once apply for the same.

3. It should be distinctly understood that for all works undertaken by the Revenue Departments, the Deputy Commissioners should invariably submit to Government estimates for works costing Rs. 200 and upwards, and notifications of sanction for those costing less.

ORDER THEREON.—*Receipts.—I. Octroi.*—The practice, which is said to exist, of allowing merchants to import and keep in their custody tobacco and jaggory without payment of Octroi duty and of collecting the impost from time to time as sales are effected, seems to Government to be objectionable and open to abuse. The Deputy Commissioner is requested to report why the duty should not be levied when the articles are imported into the town, such of them as are intended to be exported to outstations being detained in the custody of the Octroi Establishment till they are removed out of the Municipal limits. The other Deputy Commissioners will be requested to report the practice prevailing in their respective Districts.

The estimated receipts and expenditure of the Municipality will be raised by this amount, with a corresponding debit against Local Funds General, from which the advance has to be made. Proceedings of the Government of His Highness the Maharaja of Mysore, (Financial),—dated 22nd January 1892.

READ THE FOLLOWING PAPERS:—

Letter No. 87, dated the 29th May 1891, from the Inspector General of Registration, submitting proposals for the better organization and management of the Registration Department.

From the Inspector General of Registration in Mysore, To the Chief Secretary to the Government of Mysore, No. 169, dated Bangalore, 16th July 1891.

In supersession of my letter No. 87, dated 29th May last, I have the honor to submit for the favorable consideration of the Dewan a fuller and more complete scheme of re-organization for the more efficient working of the Department under my charge in this Province. In my letter above alluded to, I had recommended amongst other changes the establishment of 5 additional Special Sub-Registrars' Offices. On a full consideration of the subject, and a careful examination of the administration of the Registration Department both in the Madras and Bombay Presidencies during the past several years, and on a consultation with the Inspector General of Registration of Madras, I feel convinced that more extensive changes in the machinery of the Department than those recommended by me might, with very great advantage, be introduced.

2. Aware as I am that it is not the wish of the Government to look to this Department as a source of revenue beyond any little surplus that might accrue after a reasonably efficient administration of it, I feel sanguine that if the Dewan should agree with me in considering the changes, I recommend, necessary and desirable, he will sanction them and order their early introduction.

3. I think the time has arrived when the Registration Department might advantageously be separated from that of the revenue in Mysore and Bangalore Districts so far as the District Registrars are concerned, and also as to Sub-Registrars with the exception of a very few Taluks where the work of Registration is so light that the appointment of Special Officers could not be justified. The experience of the Department both here and elsewhere has fully proved that Registration work is much more efficiently done when entrusted to Special Officers. At all business hours, they are easily accessible; their knowledge of the work is more thorough and being full-timed men, they have sufficient time to deal with such work as comes before them with care and attention. The popularity of the Department and the consequent increase in the number of Registrations depend mainly upon the promptness and facility with which work is disposed of: for all these reasons, the present system of *ex-officio* Registrars and *ex-officio* Sub-Registrars is objectionable, and might with advantage be replaced by special agency wherever circumstances justify the replacement. In whatever centre of Registration we find a progressive development of work, we may with advantage substitute special agency and this, even independent of the consideration whether there will be fully adequate work to engage the whole of the time of the Sub-Registrar. From a Demi-Official communication I recently received from the Inspector General of Madras, this appears to be the principle on which the Madras Government appointed Special Sub-Registrars replacing the *ex officio* agents. From the Administration Report of that Department for 1889-90, I find that out of 373 Registration offices in the Presidency, only 16 were in charge of Revenue officers and though the Registration work of these 16 circles is ridiculously low without any apparent trace of any progressive element, I understand that some out of even these have since been replaced by special agency. I also find from the Report that several of these Special Sub-Registrars have been utilized for Magisterial work and I learn that a correspondence is now taking place between the Government and Mr. Srinivasa Raghavaiengar to further utilize the services of Sub-Registrars, without prejudice to their legitimate work, in making the necessary enquiries in connection with the transfer of Revenue pattas.

4. Statement A enclosed shows the progressive development of Registration work in the Mysore and Bangalore Districts for the past 5 years, French Rocks Sub-Division being included in the Mysore District. Mysore during these years has risen from 7,548 Registrations to 10,674 and Bangalore from 4,569 to 7,073. In 1890-91 Mysore District has produced a Revenue of Rs. 21,714 and Bangalore Rs. 14,789. It appears from the Madras Administration Report for 1887-88 that in that year the number of Registrations in—

Kurnool, were	7,811
Vizagapatam	8,682
Ganjam	9,431
Nellore	10,720
Bellary and Anantapur	10,904

In all these Districts, all the District Registrars were special officers and only 6 out of 73 Sub-Registrars were *ex-officio* agents. In point of Registrations, Mysore District is ahead of Kurnool, Vizagapatam and Ganjam and almost equals the other 2 Districts. The total Registrations for the whole Province in 1890-91 is 30,118 and out of this, Mysore and Bangalore have contributed 17,471 considerably over one-half, and out of the total revenue of Rs. 66,262, more than one-half, *viz.*, Rs. 37,804 was contributed by these 2 Districts. The appointment of Special District Registrars for these 2 Districts will secure a closer and more skilled supervision over more than half the Registration results of the whole Province than is available at present from officers who are probably over-weighted with administrative work. The District Registrars of the Madras Presidency have been allotted original Registration work of the Head-quarter towns in addition to their appellate and supervising functions, and I would similarly recommend that the Mysore and Bangalore District Registrars be entrusted with the Registration work of the Mysore and Bangalore Towns, respectively, thereby relieving the Special Sub-Registrars of a considerable portion of their very heavy work and confining them altogether to the work of the Taluk minus the Head-quarter towns. During the absence of the District Registrars on tours of Inspection, these Special Sub-Registrars will do the original Registration work of the District Registrars without prejudice to their own duties. With regard to the other Districts of this Province, it may be a long time before the appointment of any Special District Registrar may become desirable and the only change, I would beg to recommend, is to replace the Deputy Commissioners by Treasury or other Assistant Commissioners as District Registrars. When the Department was first introduced into the Madras Presidency, Treasury Deputy Collectors and not District Collectors were appointed *ex-officio* District Registrars. Their administrative duties are less onerous and varied and a large portion of their time according to the requirements of the District might be utilised for this particular work. This arrangement will further remove the anomaly which exists or may be fairly presumed to exist at present of placing a high administrative officer as a Deputy Commissioner under subordination to the Inspector General, as regards work to which he cannot possibly devote the necessary time and attention. As a corresponding change, I would also strongly recommend the replacement of Amildars by Taluk Sheristadars as *ex-officio* Sub-Registrars. In the Madras Presidency, before the separation of the Department from the Revenue Officers, Deputy Tahsildars and Taluk Sheristadars were *ex-officio* Sub-Registrars and not Tahsildars and such is the case at present in the very few places where the *ex-officio* system still exists. Taluk Sheristadars are very much more stationery than Amildars and their duties are less onerous and varied, and any commission of fees available will be a greater incentive for work to them than to the comparatively higher paid Amildars.

5. With the Dewan's permission, I shall now enter into the details of the scheme.

Mysore District, including French Rocks Sub-Division.

A Special District Registrar with original Registration work of the Town.

1	Special Sub-Registry Office			at Mysore for the Taluk work.	
1	Do	do	do	for Seringapatam.	
1	Do	do	do	for Yedatore.	
1	Do	do	do	for Tirumakudlu-Narsipur.	
1	Do	do	do	for Chamrajnagar.	The work has of late years developed so largely that Special offices are very necessary.
1	Do	do	do	for Nanjangud.	
1	Do	do	do	for Krishnarajpete [late Attikuppa.]	
1	Do	do	do	for Hunsur ..	Hunsur has also shown great development.
1	Do	do	do	at Maddur for Mandya and Malvalli.	These two amalgamated will necessitate a Special office.

The above are the Special Sub-Registry Offices, leaving untouched Gundlupet, Heggaddevankote and Nagamangala, in all of which the Registration work is so poor that for the present they may be left to the existing commission system, the only alteration being that in the place of Amildars being *ex-officio* Sub-Registrars, Taluk Sheristadars will occupy that position. Maddur is a very convenient central position where an office can be opened for both Mandya and Malvalli Taluks.

Bangalore District.

A Special District Registrar with Town Registrations.

This Officer may likewise be invested with the powers of a Presidency Registrar for the Province of Mysore under Section 30, Clause B, of the Registration Act.

1 Special Sub-Registrar at Bangalore for the Taluk.

1	Do	do	at Closepet: to this office may very conveniently be attached Channapatna which is a Sub-Taluk; the distance between these two towns is so short, and the facilities of travelling so great that a man coming to Channapatna for Registration, as at present, will find no practical difference in coming to Closepet. There will be ample work for a Special Officer.
1	Do	do	at Devanhalli. This is also rising rapidly and the Hindupur extension is likely to give it a great impetus. If further experience should warrant it, Doddaballapur may be attached to the Devanhalli Circle, or the Office itself removed to Doddaballapur and Devanhalli attached to it.
1	Do	do	at Anekal. Here the Registrations have steadily increased from 457 in 1887-88 to 685 in 1890-91.
1	Do	do	at Hoskote. Here also is a very hopeful development from 354 in 1887-88 to 530 in 1890-91.

For the present Doddaballapur, Magadi, Nelamangala and Kankanhalli may be left to the existing arrangement under Taluk Sheristadars as *ex-officio* Sub-Registrars. If Magadi and Nelamangala should continue to progress as they have done within the last few years, it may become necessary in a couple of years to establish Special Offices for them, but for the present they may be left out of consideration.

6. As regards the other Districts, I have already indicated above that the Deputy Commissioners should be replaced by Treasury or other Assistant Commissioners as District Registrars and Amildars by Taluk Sheristadars as Sub-Registrars. There are, however, a few Taluks in which the past and prospective development has been so great as to justify the appointment of Special Sub-Registrars.

Kolar District.

1 Special Sub-Registrar at Chikballapur.

The Registrations have reached the respectable figure of 535 in 1890-91 and increased prosperity may safely be predicted in the future. The Deputy Commissioner of Kolar in a recent communication has strongly recommended a Special office there.

1 Special Sub-Registrar at Kolar to which Bowringpet may be attached. Each in itself shows but poor work, but both combined will form a good circle. The distance between the two towns is short, and as the Registrations in Bowringpet have always been small in number, any slight inconvenience that may result will not affect many people. If, in our future experience, any practical inconvenience should be perceptable in thus grouping the Taluks together, they can easily be separated.

Tumkur District.

1 Special Sub-Registrar at Tiptur. This Taluk has shown substantial development; the Registrations in 1890-91 were 709.

1 Special Sub-Registrar at Tumkur, to this circle may be attached Gubbi which by the facilities of Railway travelling may be said to be almost next door to Tumkur.

Kadur District.

Chikmagalur and Tarikere are the places for which I would recommend Special Sub-Registrars: the former has already reached a stage of development that necessitates the appointment of a Special Office, and the latter is in a very hopeful state.

Hassan District.

1 Special Sub-Registrar at Arkalgud: the progress in this Taluk has been from 590 Registrations in 1887-88 to 785 in 1890-91.

1 Special Sub-Registrar at Manjarabad. Though the Rgistrations have not been large, still the revenue derived has always been very great. Considering the Malnad character of the Taluk, any inconvenience caused to parties by delays in Registration will be felt more acutely in these than in Maidan Taluks.

Shimoga District.

The only Taluk where I would recommend a Special Office is Tirthahalli. The reasons I have adduced for opening one at Manjarabad apply equally to Tirthahalli. To the further credit of Tirthahalli it may be said that the Registrations in this Taluk are larger by about 50.

Chitaldroog District.

I do not think that I can fairly recommend any Special office anywhere in this District. Davangere may in future require one, but at present it has not advanced sufficiently.

7. Statement B shows the progressive development in the work of this Department in the several Taluks where I have recommended the establishment of Special Sub-Registry offices during the 4 years ending in 1890-91. And there is every reason to hope that the increasing prosperity of this Province will leave its mark in all branches of administration for the future, and it will not be too much to assume that the results of the Registration Department hitherto obtained will continue in a career of increasing development. The marginally noted figures show the progress of the Department both in Registration and income in the years 1869-70, 1874-75, 1879-80, 1885-86 and 1890-91.

Years.	Registration.	Receipts.
1869—70	7,454	20,247
1874—75	9,997	24,471
1879—80	14,477	38,389
1885—86	20,945	48,675
1890—91	30,393	66,262

8. It will thus be seen that I have proposed the establishment of 2 District Registrars and 18 additional Special Registration Offices which, with the existing 5 Special Sub-Registry Offices, makes a total of 23 Special Sub-Registry Offices. I would recommend to a District Registrar a salary of Rs. 200 a month which I consider fair and adequate. In the Madras Presidency, there are several grades, the last being Rs. 150 and the first Rs. 300. Not taking into consideration the special pay of Rs. 500 to the Madras District Registrar, but there the District Registrars get a commission fee which seldom falls short of Rs. 50 which is the maximum they can draw. The same commission fee and the same maximum apply also to all the Special Sub-Registrars. The salary, I recommend for a District Registrar will be equal to the emoluments of a last grade District Registrar in the Madras Presidency: like him he will draw while on tour a mileage of 4 annas and a halting allowance of $\frac{1}{10}$ths the pay. I would divide the Special Sub-Registrars into 3 grades: the 1st grade Rs. 70, 2nd grade Rs. 50 and 3rd grade Rs. 35, the various Registration circles being graded according to the heaviness of work. Stations where 1,200 documents and more are registered might be ranked as 1st grade, 800 documents and upwards 2nd grade, the rest 3rd grade. I have not fixed any minimum limit to the 3rd grade, as other considerations than those of the amount of work might have influence in opening a Special Registry Office. In considering the above scale of work, I make an exception in favor of Mysore Sub-Registry Office The Registrations in this office for 1890-91 were 1,490: of this a large portion nearly $\frac{3}{4}$ths are town Registrations, *i. e.*, of documents involving properties situated in the town of Mysore. All this work will be transferred to the District Registrar and the Sub-Registrar's work may not exceed 500 or 600 documents. I would, however, recommend a 1st grade Sub-Registrar there.

Firstly. He will have to register in addition to his own work documents legitimately belonging to the District Registrar when the latter officer goes out on tour of inspection and it is not possible to say how many documents he may have so to register, and

Secondly. To act for a District Registrar, a 1st grade Sub-Registrar would be more appropriate than a lower grade officer.

Under the above considerations, there will be, as detailed in Statement C—

4 1st grade Sub-Registrars.
4 2nd grade do
15 3rd grade do

The office establishments I would recommend for these various grades are as shown below :—

District Registrar.

9 The cost of the scheme as far as it relates to the District Registrars' offices in Mysore and Bangalore and to all the Special Sub-Registrars' offices is Rs 2.370 a month or Rs. 28,140 a year. As all the other Districts are to be left to the existing arrangements uninterfered with, with the exception of a few Taluks where Special Sub-Registrars will be appointed whose cost is included in the above figure, it is not necessary to enter into any financial comparisons regarding them: their income and expenditure under the proposed scheme will be the same as at present. Now the present cost of the Mysore and Bangalore District Registry offices, of the existing Special Sub-Registry offices and of the Taluks where Special Sub-Registrars are proposed to be appointed is Rs. 17.623. The net results of my scheme will therefore be an increase in expenditure of Rs. 10,817.

10. I now beg to recommend some changes in my office, which I consider to be necessary. My office establishment is maintained at the marginally noted scale. I beg very strongly to recommend that the pay of my Manager be raised to Rs. 150: he has been in this Department since 1871 and has rendered valuable services to all my predecessors and to myself Messrs. Hudson, Venkatvaradaengar and* Hunji Row have all in their turn recommended this increase and I may safely say that the credit of the Department has always been to some degree due to his intelligent work Since the formation of the Department, the successive Inspectors General have always been officers otherwise employed in responsible and arduous work and as they generally could devote only a small portion of their time to the work of this Department, a great deal of the important work of supervision must naturally have devolved upon the Manager. I also beg that a Clerk on Rs. 35 may be specially sanctioned for the immediate charge of the work of the Joint Stock Companies. The work is growing so fast as to necessitate the appointment of a responsible official. This matter was brought to the notice of the Government in letter No. 60, dated 15th September 1890, and the Government appear to have favorably entertained the proposal as communicated in Chief Secretary's letter No. 8011—929, dated 1st October 1890. I would also recommend that the pay of the Record keeper be raised from Rs. 20 to 25 and that of the Mutchi from Rs 8 to 10. If these proposals are sanctioned, my office establishment will stand as marginally noted at a cost of Rs. 399, an increase of Rs. 72 a month or Rs. 864 a year.

11. It is always unpleasant to urge one's own claims for increase of pay. I took charge of this Department in February 1890 and have since been discharging the duties of the office without any remuneration, my pay of Rs. 1,000 having been fixed for the duties of Legislative Secretary and Government Advocate. Messrs. Ricketts and Hudson when they were in charge of the office drew an allowance of Rs. 200 a month. I venture to state that this sum is not an extravagant allowance for the appointment. During the short time that I have been in charge, I have inspected 3 District Registry offices, *viz*, Hassan, Tumkur and Kolar and 21 Sub-Registry offices in those Districts and I was contemplating a tour in the Nagar Division when I was called away on duty to Bombay last January. Since 1871 none of my predecessors inspected any of the offices. Assuming that the Government will be graciously pleased to sanction me an allowance of Rs. 200 a month, this will be a further increase in expenditure of 2,400 a year.

12. The total increased expenditure that will be entailed under all the above heads will be Rs. 14,088 per annum.

13. The total receipts of the year 1890-91 are Rs. 66,262, the total expenditure for the whole Province under the new scheme is Rs. 47,332, leaving a surplus of Rs. 18,930.

The percentage of expenditure to the receipts will be about 71·2, leaving by no means an inconsiderable surplus. In examining the Administration Reports of the Madras Presidency, I find that so far back as 1878-79 when the Registration Department was only to a small extent separated from the Revenue Authorities, the expenditure came up to 73·4 per cent and ever since it has steadily increased to something like 80 per cent in 1889-90; this latter percentage is what I understand to be about the expenditure in the Bombay Presidency.

14. I beg to submit Statement D showing the Registration Receipts and Expediture, present and proposed, and Proposition Statement E.

15. On an examination of the financial results of this Department from 1866 when it was first organized, I find that there has been a net saving of Rs. 3,45,909—3—7.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Financial),—dated 22nd January 1892.

CAMP No. 1115-24, DATED 22ND JANUARY 1892.

ORDER THEREON.—The Inspector General of Registration, with his letter of 29th May 1891, submitted a proposal for the establishment of five Special Sub-Registry Offices, in addition to the five which already exist, and for the appointment of separate Registration Gumastas in 44 Taluks, the Amildars of which were to forego all remuneration in the shape of a commission on fees. The financial results of this scheme would have been as follows:—

	Present Cost per month.			Proposed Cost per month		
	Rs.	A.	P.	Rs.	A.	P
The Bangalore Sub-Registry Office	233	0	0	233	0	0
The 4 other existing Sub-Registry Offices	320	0	0	385	0	0

Total.. ...	1,543	0	0	1,484	0	0

2. In supersession of the above scheme, Mr. Meenacshaiya, in his letter of 16th July 1891, has proposed a more extensive revision of the establishment, the main details of which are as follows:—

		Present Cost.			Proposed Cost.			Present Income.

3. The proposed increase is large, but is well within the income of the various offices. But the question really is, whether such a large increase is called for in the best interests of the Department itself. The Department of course is not one from which the Government expects a revenue, but nevertheless, it must be maintained at the minimum of cost, so long as its efficiency and public convenience are not sacrificed in any way. Government observe that there is no District which can afford to have a separate Registrar. To those proposed for Bangalore and Mysore, the town work has to be added on in order to give them sufficient work. Mr. Meenacshaiya's proposal to appoint the various District Treasury Assistant Commissioners as District Registrars is sound, but these officers will not be able to do any inspection of the Sub-Registry Offices. In a small State like Mysore, where the work is light, this, however, is not a serious objection, if the Inspector General will himself visit the various offices in regular rotation once at least in two or three years. The work of the Bangalore District is light and it is only the work in the Bangalore Town, which is heavy, that will give enough for a District Registrar to do. In the Mysore District, the work is heavier, but can, the Government believe, be efficiently supervised by occasional inspections of the Inspector General; especially if specially qualified Sub-Registrars be appointed in the more important Taluks. Under such circumstances, the Government are of opinion that no separate District Registrars are required at present, and that all Treasury Assistant Commissioners shall be *ex-officio* Registrars of their respective Districts.

4. The next question is regarding Special Sub-Registry Offices. Five already exist, namely :—

at Bangalore,
Mysore,
Seringapatam,
Yedatore, and
Tirumakudlu-Narsipur.

A few others may be given where the work is heavy. The rule which the Government propose to adopt is to give a Special Sub-Registry Office where the number of registrations during the past two years has been above 600, the Taluk Sheristadars in all other places being appointed *ex-officio* Sub-Registrars. Applying this rule, Special Sub-Registry Offices should exist in the following places :—

No.	Name of Place.	No. of Registrations.	Per annum								
			Income.			Present Cost.			Cost now sanctioned.		
1	Bangalore	2,891	7,536	0	0	2,796	0	0	2,796	0	0
2	Mysore	1,352	4,018	0	0	1,140	0	0	1,440	0	0
3	Seringapatam	984	2,719	0	0	1,140	0	0	1,008	0	0
4	Yedatore	1,656	3,304	0	0	660	0	0	1,440	0	0
5	Tirumakudlu-Narsipur	1,708	3,140	0	0	900	0	0	1,440	0	0
6	Chamrajnagar	926	1,534	0	0	598 (Amildars' Commission.)	0	0	1,008	0	0
7	Nanjangud...	814	1,704	0	0	664	0	0	1,008	0	0

9	Arkalgud	785	1,404	0	0	548	0	0	720	0	0

Excluding Bangalore, the Sub-Registrar of which gets Rs. 150, the other Sub-Registrars will be of 3 classes as proposed, namely :—

	Rs.
1st Class on	70
2nd Class on	50
3rd Class on	35

and the *establishment proposed by Mr. Meenacshaiya is moderate and as entered in the foregoing table. Thus the

Total ...	11,580

When the work of the remaining Sub-Registry Offices increases, separate officers can be appointed hereafter in accordance with the principle above laid down.

5. The Taluk Sheristadars being appointed *ex-officio* Sub-Registrars (where no Special Sub-Registrars have been appointed), the question arises how they and their Gumastas should be remunerated. At present, the Amildars receive a commission of 40 per cent of fees realized. Out of this, they pay a Gumasta up to Rs. 10 a month and themselves take the balance, if any. If this rule be extended to the Sheristadar he will, in many cases, get next to nothing, and this, owing to his own small salary, is not a desirable arrangement.

After due consideration, the Government direct that a Taluk Sheristadar who is a Sub-Registrar shall receive 50 (fifty) per cent as commission, subject to a maximum and minimum of Rs. 30 and Rs. 10, respectively, that is to say, if the 50 per cent of the commission exceeds Rs. 30, they should draw only Rs. 30 each, and if it falls below Rs. 10, the difference shall be made good by Government from the revenue of the Registration Department. The Taluk Sheristadars shall further pay for their Gumastas, where such have to be appointed, as the Amildars at present do.

6. The next question for decision relates to the Inspector General's Office. The increases proposed are—

For the Manager from	Rs.	120 to 150	= + 30
For the Record-keeper from	„	20 to 25	= + 5
For a new Clerk for Joint Stock Companies Work	„	0 to 35	= + 35
For the Mutchi from	„	8 to 10	= + 72
			+ 72

These increases appear reasonable under the circumstances explained by Mr. Meenacshaiya and are sanctioned.

7. The Inspector General's allowance was formerly fixed at Rs. 200 a month. When Mr. Meenacshaiya was appointed Legislative Secretary in addition to his duties as Government Advocate, those of Inspector General of Registration were added on as a temporary arrangement, the intention then being to assign these last mentioned duties to a separate officer. As this has since been found to be impracticable, separate orders will issue sanctioning the allowance to Mr. Meenacshaiya.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Financial),—dated 9th January 1892.

READ:—

Letter from the Deputy Commissioner, Tumkur District, dated 4th November 1891, No. 501, submitting the Budget Estimates of the Local Fund Circle of the District for the year 1892-93, together with the Proceedings of the District Fund Board, dated 26th October 1891, adopting the same.

No. 11086-90—L. 1005, DATED 9TH JANUARY 1892.

ORDER THEREON.—The receipts for 1892-93 are estimated at Rs. 60,500 against Rs. 59,432, the sanctioned estimate for 1891-92, and Rs. 60,356, the actuals of 1890-91, as shown in the following statement :—

Items.	Details of Receipts.	Actuals of 1890 91.	Estimate for 1891-92.	Estimate for 1892-93.
I.	76 per cent of local cess	54,643	55,208	54,720
II.	Sale of stray cattle	1,241	4,224	1,280
III.	Fines for cattle trespass...	4,472		4,500
	Total Rs...	60,356	59,432	60,500

2. *I. Local Cess.*—The increase under this head compared with the actuals of 1890-91 is small and calls for no remark. The Government, however, observe that the total assets, on which the cess is computed, are shown in Enclosure A as Rs. 11,49,510, and 76 per cent of the one anna cess thereon would amount to Rs. 54,602 and not Rs. 54,643. This discrepancy needs explanation. It is unsatisfactory to note that, while the total demand including the arrears of the previous years is Rs 1,07,262, the anticipated collections for 1892-93 are put down at Rs. 54,720, leaving a very large balance of Rs. 52,542, as the probable amount of arrears at the end of March 1893.

3. *II and III. Sales of Stray Cattle and Fines under Cattle Trespass Act.*—The increase under each of these heads is based upon the actuals of 1890-91, and the estimates are passed.

4. No receipts are shown under the head "VI Fees from Travellers' Bungalows," and the Deputy Commissioner is requested to explain the omission.

5. *The "Opening Balance"* on 1st April 1892 is estimated by the Deputy Commissioner at Rs. 52,620. It is not explained how this figure has been arrived at. But, as shown in the marginal statement, it ought to be Rs. 85,484, which sum will be entered as the probable balance on 1st April 1892.

6. Adding to the above the estimated receipts, the sum available for expenditure during 1892-93 is Rs. 1,45,984, of which *Rs. 60,500 are proposed to be expended, leaving a balance of Rs. 85,484 at the end of the year.

7. *I. Civil Charges.*—The sum of Rs. 7,941 included under this head is intended to meet the following items :—

VI.	Conservancy charges	105	105
VII.	Vaccination	137	137
	Total Rs ...	8,981	7,941

8. *I. Statistical Clerk.*—There is a decrease of Rs. 30 under this head, owing to no provision being required for furniture, for which Rs. 30 were sanctioned in 1891-92. The estimate is passed.

9. *II. Medical Scholarships.*—The provision sanctioned for 1891-92 is merely repeated in the present Budget; while, under Government Proceedings, dated 24th December 1887, No. 5832-43—149, the amount allowable for 1892-93, according to the particulars noted in the margin, is only Rs. 611, which sum will be entered in the Budget.

Total cost ...Rs.	4,890
Sum debitable to each District ...Rs.	611

10. *III. Hospitals and Dispensaries.*—The estimate under this head is passed, the provision made being less than that of the previous year by Rs. 1,010. There is a decrease in the estimated expenditure under all items, except under "Establishments"; and the small increase of Rs 8 provided for under the latter head is on account of the pay of the Compounder attached to the Tumkur Hospital, sanctioned by Government Proceedings, dated 14th September 1891, No. 6808-10—L. 489.

11. *VI. Conservancy and Sanitary Charges.*—The estimated charges of conservancy amount to Rs. 105, to which must be added as falling under this head Rs. 2,000 entered under "II Repairs to be executed by the Revenue Department," thereby increasing the total provision to Rs. 2,105.

12. *IX. Miscellaneous.*—No provision is made under this head on account of the purchase of Amrut Mahal bulls for the purposes of breeding and for meeting half the cost of bulls sold to raiyats under Government Proceedings, dated 16th September 1891, No. 6999-7008—123. A sum of *Rs. 825 will, on this account, be included in the Budget.

14. *II. Repairs.*—The estimate proposed is Rs. 30,540 and, deducting therefrom Rs. 2,000 proposed to be spent on village sanitation already included under "Civil Charges-VI Conservancy," the balance amounting to Rs. 28,540 is sanction-

ed for "Repairs." It is presumed that this provision includes the allowance for the maintenance of roads payable to the Tumkur Municipality under the Chief Engineer's Circulars, dated 10th April 1886 and 20th December 1889, Nos. 32 and 97—98 spectively; and, if so, the President should intimate the amount so included, for ing transferred to "IX Contribution under I Civil Charges."

15. *III. Establishments.*—The charges proposed on account of establishments, nounting to Rs. 8,000, do not exceed 20 per cent of the provision made for works be executed by the Public Works Department. The estimate is passed.

16. The estimated receipts and expenditure for 1892-93 as now passed will and as shown below:—

1. Read Government order No. 6785—L. 515 of the 15th September 1891 about the preparation of District Fund Budget. Recorded for guidance.

2. Read Government order No. 7259-66—L. 576 of the 25th September 1891 about money being spent on sanitation in rural circles. Recorded for guidance.

3. Read the Executive Engineer's letter No. 1202 of the 1st October 1891, asking what should be done with Rs. 1,500 that he cannot spend this year out of the appropriations sanctioned for this year.

Resolved that a musafarkhana be built at Chiknayakanhalli where there is no accommodation for travellers.

In the above letter the Executive Engineer further asks what should be done with Rs. 1,545 which has now been appropriated for certain works under repairs communication and which he cannot spend this year.

Resolved that Rs. 545 be spent in improving the road from Huliyar to Banasandra Railway station, there being much traffic on that road and that for the balance of Rs. 1,000, the construction of a musafarkhana near the Banasandra Railway Station be undertaken.

4. Resolved that a drinking water well be sunk at once in the Municipal town of Bellavi in the Tumkur Taluk as water difficulty is felt there; the funds therefor being obtained by making reappropriations in the current year's Budget as suggested by the Executive Engineer.

Note.—The Government having, in para 4 of Proceedings No. 6591-6600—L. 451 of 10th September 1891, since received, stated that "all Municipal Works must be executed from the Municipal Funds," no action will be taken on this resolution. (Intd.) B. K. V.—30-10—91.

5. Read the Executive Engineer's docket No. 1249 of the 13th October 1891, asking if the Chelur-Hagalvadi road may be further improved by bridging, &c. Resolved that as the road is not very important, further expenditure on it is not necessary, and that further it is not necessary to continue that road to Bukkapatna.

6. Read the Executive Engineer's docket No. 1301 of the 24th October 1891, asking if the Maddagiri-Dodballapur road may be improved by building road dams, &c., at a cost of Rs. 1,000 out of savings from this year's Budget, and resolved that the work be done.

7. Read the Budget for 1892-93 and passed.

8. Considered the proposal of the Dasara Representative Assembly Members for 1891 to open loop lines from Honnavalli to Tiptur *viâ* Halkurike and from Sasal to Nonavinkere *viâ* Kuppal to cut short the distances now to be travelled by the existing roads. Resolved that the matter do lie over for the present, as the lines are not very important.

9. Considered the proposal of the Dasara Representative Assembly Members for 1891 for a road from Maddagiri to Hindupur. As the Executive Engineer says that without bridging the rivers, &c., the road will cost upwards of Rs. 20,000 and as there are no funds, resolved to drop the matter for the present as there is a road from Maddagiri to Tondebavi where there will be Railway Station.

Opened in 1891—92.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Financial),—dated 9th January 1892.

READ:—

Dockets from the Deputy Commissioner of the Shimoga District, dated 4th and 5th November 1891, Nos. 597—564 and 596—563 respectively, submitting the District Fund Budget Estimates of the Shimoga Local Fund Circle for the year 1892-93.

No. 11074-78—L. 1003, DATED 9TH JANUARY 1892.

ORDER THEREON.—The receipts for 1892-93 are estimated at Rs. 82,837 against Rs. 83,103, the actuals of 1890-91, and Rs. 80,378, the sanctioned estimate for 1891-92.

Items.	Details of Receipts	Actuals of 1890-91	Estimate for 1891-92.	Estimate for 1892-93.
I	76 per cent of cess collection...	74,745	74,226	74,727

VII	Private contributions ...	7	...	...
IX	Miscellaneous	373	48	195
	Total...	83,103	80,378	82,837

2. *Local Cess.*—The assets upon which the cess is to be collected are given as Rs. 15,57,359. Seventy-six per cent of one anna in the rupee amounts to Rs. 73,974 and not Rs. 74,745 as entered in the enclosure A. The former figure will be adopted in the Budget, pending the Deputy Commissioner's explanation as to the discrepancy.

3. There is a decrease of Rs. 68 under "V. Tolls" and of Rs. 41 under "VI Fees from Travellers' Bungalows", which do not call for special remarks.

4. The provision under "IX. Miscellaneous" includes a sum of Rs. 188 expected from Branch schools, which is creditable to the "Village School Fund" and not to "District Funds." This sum will, therefore, be struck out of the Budget.

5. *Opening balance.*—The actual balance in favor of the District on 1st April 1891 is reported by the Comptroller to be Rs. 60,888; adding to this Rs. 80,378, the estimated receipts for 1891-92, the total amounts to Rs. 1,41,266; and deducting therefrom the *expenditure, Rs. 1,14,745, the probable balance on 1st April 1892 would be Rs. 26,521 and not Rs. 68,309 as given by the Local Fund Board. The former figure will be adopted in the Budget.

	Rs.
*Civil charges ..	6,545
Public works ...	1,08,200

6. Adding to the above the estimated receipts (Rs. 81,896), the sum available for expenditure during 1892-93 is Rs. 1,08,417. The expenditure proposed is Rs. *1,22,090 which is more than the funds available by Rs. 13,673.

	Rs
1. Civil charges ...	7,260
2. Public works to be executed by the Public Works Department...	1,05,650
3 Do Revenue Department ...	9,180
	1,22,090

7. Under "Civil charges," the provision of Rs. 7,260 exceeds that of the previous year by Rs. 715, and the variation under each item will be seen at a glance by reference to the following comparative statement:—

				1891-92.	1892-93.

IX.	Miscellaneous	...	...	302	225
			Total Rs....	6,545	7,260

8. *I. Office Establishment.*—A sum of Rs. 300 is provided under this head to meet the pay of a clerk proposed to be newly entertained owing to the increase of work in the District Fund Branch of the Deputy Commissioner's office. The Government observe that the pay of the permanent Statistical clerk is only Rs. 20 per mensem, and as the additional clerk will be a sort of assistant to the Statistical clerk, it is desirable that the pay of the former should be less than that of the latter. The provision is accordingly reduced to Rs. 180. The Deputy Commissioner is, however, informed that no new charges should, in future, be entered in the Budget in anticipation of sanction as has been done in this case. The proposals, if any, for increase of establishments should always form the subject of a separate communication and the provision should be made in the Budget only after the sanction of Government has been obtained. The additional clerk will be entertained temporarily, pending the decision of the general question relating to the employment of a separate agency for District Fund Works.

9. *II. Medical Scholarships.*—The provision under this head, which is in accordance with the Government Proceedings, dated 24th December 1887, No. 5832-43—149, is approved.

10. *III. Midwives.*—The provision for the grant of scholarships to five women, to enable them to undergo training at the Madras Lying-in-Hospital and to qualify themselves for appointment as midwives in the Dispensary has been made in accordance with Government Proceedings, dated 14th December 1891, No. 9932-3—881, and is accordingly passed.

11. *VI. Conservancy and Sanitary charges.*—The sum of Rs. 4,000 provided under "II. Repairs to be executed by the Revenue Department" on account of the sanitation of the populous villages should be included under this head and not under "II. Repairs." The estimate is accordingly raised to Rs. 4,010.

12. *VII. Vaccination.*—The decrease under this head is due to the provision made in 1891-92, on account of the purchase of lymph, having been omitted in the Budget for 1892-93. The estimate is passed.

13. *IX. Miscellaneous.*—Provision has to be made under this head for the purchase of bulls for breeding purposes and for payment of half the purchase money on account of bulls sold to raiyats, in accordance with Government Proceedings, dated 16th September 1891, No. 6999-7008—Cir. 123. A sum of Rs. *825 will be included in the Budget.

	Rs.

Half the cost of 5 bulls to be sold to raiyats ...	375
Total...	825

14. *I. Original Works to be executed by Public Works Department.*—Owing to the insufficiency of funds, the provision made for some of the works will be reduced by Rs. 14,000 as shown in the margin.

	Name of Work.	Estimate as proposed.	Estimate as sanctioned.	Reduction made.
1.	Bridging Kumudvati river ...	8,000	5,000	3,000

7.	Do Honnali-Shikarpur road ...	2,000	...	2,000
	Total.....	30,000	16,000	14,000

15. *I. Original works to be executed by the Revenue Department.*—The provision of Rs. 3,000 made for sinking wells is sanctioned.

16. *II. Repairs to be executed by Public Works Department.*—The estimate includes Rs. 11,700, being the mileage allotment and cost of special repairs of the marginally noted 3 roads, the transfer of which to Provincial is recommended by the Local Fund Board for want of funds. The question will be referred to the Chief Engineer for disposal. The Deputy Commissioner will be requested to report whether the provision for road repairs includes the allowance payable for the maintenance of portions of roads, lying within the Municipal limits of Shimoga Town, under the Chief Engineer's Circulars, dated 16th April 1886 and 20th December 1889. Nos. 32 and 97-98, respectively; and if so, what amount has to be transferred to "IX. Contribution under I. Civil Charges".

3. Sagar-Siralkoppa road ..	2,000	22	100	2,200
Total	5,000	97	...	6,700

17. *II. Repairs to be executed by the Revenue Department.*—Excluding the sum of Rs. 4,000 on account of village sanitation transferred to "Civil charges, VII. Conservancy and Sanitation," the estimate under this head amounts to Rs. 2,180, which is passed.

18. *III. Establishments.*—Owing to reductions in the provision made for works (*vide* Para 14 above), a corresponding reduction in the charges of establishments has to be made, and the estimate is altered from Rs. 15,000 to Rs. 12,430.

19. *Reserve.*—The provision under this head is excessive, and will be reduce to Rs. 500.

1. Read the following:—

1. Budget statements for the year 1892-93.

2. Consolidated Budget Estimates of receipts and expenditure for 1892-93.

3. Statement showing the assets upon which the local cess has been calculated for 1892-93. Enclosure A.

4. Details of original works proposed to be executed out of District Funds by the Public Works Department and Revenue Departments for 1892-93. Enclosure B.

5. Detail of allotment of expenditure on repairs of roads, &c., to be executed by the Public Works and Revenue Departments. Enclosure C.

6. Statement showing the details of Civil charges for 1892-93 audited by the Comptroller. Enclosure D.

7. Statement showing the Talukwar estimates of receipts and expenditure for 1892-93. Enclosure E.

	Rs.
Actual balance at the credit of the Board on 1st April 1891 was ...	1,06,676
And the estimated receipts of 1891-92 was	80,378
Total...	1,87,054
Deduct the estimated expenditure as per passed budget for 1891-92	1,18,745
The opening balance on 1st April 1892 would be	68,309
Add estimated receipts for 1892-93	82,837
Total Rs...	1,51,146

Thus the total assets available for expenditure for 1892-93 is Rs. 1,51,146.

2 Provisions have been made as follows both for the incomplete works of the past year and new works proposed under "Original Works" as per Enclosure B

		Rs.
I.	Original works to be executed by Public Works Department ...	57.000
II.	Repairs do	31,450
III.	Establishment audited by Examiner	15,000
IV.	Tools and plant	200
V.	Reserve	2,000
	Total Rs.....	1.05.650

		Rs.
I.	Original works to be executed by Revenue Officers, constructing drinking water wells	3,000
II.	Annual maintenance of roads and cart tracks	2,180
	Charges on account of the sanitation and conservancy of populous villages	4,000
	Total Rs...	9,180
	Civil charges as per Enclosure C.	7,260
	Grand total of estimated expenditure Rs...	1,22,090

Deducting the estimated expenditure of Rs. 1,22,090 from the total assets of Rs. 1,51,146, a probable balance of Rs. 29,056 will be left at the close of 1892-93.

3. Under the head 'Civil Charges" a provision of Rs. 600 has been made for scholarships to 5 Native Midwives to be trained in the Madras Lying-in Hospital at the rate of Rs. 10 each per mensem for a period of one year in accordance with the Government Proceedings No. 14115-24—300, dated 18th March last.

4. Under the instructions conveyed in official Memo No 7259-66—576, dated 25th ultimo, from Government, it is to be expected that a large amount of work has to be taken over for execution by the Revenue Department and this necessarily will devolve more work to be done by that Department than has hitherto been the case and the Revenue establishment is not in a position to spare a hand for checking the estimates and completion bills, preparing annual accounts, budget accounts, keeping up English and Vernacular correspondence, cash book, register of works, &c., the necessity for a new hand was discussed at the meeting and this having been realized, it was unanimously resolved that a sum of Rs. 300 be provided in the Budget for a hand to be styled Local Fund Clerk, which is equal to the pay of the Clerk of the Public Works Department Sub-Division and sanction of Government be obtained to employ a hand from 1st April 1892 at Rs. 25 per mensem. The Board are further of opinion that, while under the new arrangement, much checking work has to be done in the District Office, the Taluks have on their part to do good deal in the way of getting up estimates for projected works supervising them while under execution and examining them after they are completed with a view to satisfying that they have been satisfactorily carried out and there being no establishment to do all these, much difficulty will necessarily be experienced in this direction and some relief is therefore called for. At present all except Nagar, Sagar and Tirthahalli Taluks are provided with a Tank Inspector, but these officials, it is believed, have not much work to keep them fully occupied being confined only to tank work according to Circular instructions noted in the margin and to utilize their services fully, the Board are of opinion that the restriction above referred to should be removed and in view to this, they respectfully solicit that the Government will be pleased to accord sanction to change the designation of Tank Inspectors into Taluk Mestris, and to employ them freely on works of the kind referred to above, and to allow new hands to those Taluks which have not got them now. Should the system herein recommended be sanctioned, it will require the newly constituted Mestris to be constantly on the move, and as they will not be able to do this satisfactorily without the means of locomotion, the Board also recommend that they be granted horse allowance of Rs. 7½ each per mensem as recommended in the Deputy Commissioner's letter No. 237, dated 22nd July 1889, to the address of the Chief Engineer.

No. 46. dated 18th June 1889, from the Chief Engineer.

5. Read docket No. 3723, dated 18th August last, from the Chief Engineer, placed before the Board by the Executive Engineer declining to transfer the Sagar-Siralkoppa road for maintenance under "Provincial" along with the Siralkoppa-Hirekerur road and stating that the Deputy Commissioner should be asked to apply to Government for a special grant from District Fund assets, a large balance being still available.

6. The Government has already sanctioned in Proceedings noted in the margin that Rs. 30,000 should be set apart annually from the Local Fund assets for opening out the Sagar Western Malnad, as this large amount cannot be met out of the probable balance of Rs. 29,056 in favor of the Board at the close of 1892-93, they resolve unanimously to request the Government to be good enough sanction the transfer of the up-keep of the following roads to "Provincial" at least temporarily till such time as its resources might improve.

No. 1125-6--47, dated 2nd May 1890.

	Rs.
1 Sagar-Siralkoppa road, 22 miles at Rs. 100	2,200
1 Siralkoppa-Hirekerur 9 miles at Rs. 60	540
1 Shimoga, Sorab-Sirsi road 66 miles at Rs. 60	3,960
Total Rs...	6,700

7. These roads form principal out-lets to North Canara and Dharwar Districts of Bombay Presidency where trade is brisk owing to the running of the railway in the close proximity and deserve to be classed as Imperial roads.

8. In the meanwhile the provision of Rs. 6,700 made for these roads in the Local Funds Budget may be allowed to stand pending sanction to their transfer.

9. Amildars of Nagar and Sagar proposed that certain sums should be set apart for the maintenance of Kodachadri and Nagodi road and Lakshmipur Mavinkar road. These roads lead up to the sanitarium, lately formed on the top of the hill which is resorted to by the public and to make access to it easy, the Board have resolved to allot Rs. 189 to the first and Rs. 450 to the second under "Repairs" by the Revenue and Public Works Departments respectively.

10. Read docket No 681, dated 25th August 1891, forwarding copy of Chief Engineer's docket No. 3773, dated 21st idem, stating that the provision made in the Budget for the construction of musafarkhanas at Agumbi, Gollarahalli, Ambligolla and Avinahalli was struck out of the current year's Budget for want of funds.

11. The Board observe that the necessity for construction of musafarkhanas in the above places has been fully discussed in the meeting held on the 10th December 1890, and the same noted in their Proceedings of the same date, and resolve again to request the Executive Engineer to provide funds for these buildings in the next year's Provincial Budget as they are absolutely necessary.

12. The Amildar of Nagar brought before the Board the question of the construction of musafarkhanas at Kallurkatte and Yadur. The former is to become shortly the Head-Quarters of Nagar Taluk and the latter is situated on a route through which much arecanut trade passes from the important arecanut growing Taluks of Koppa and Tirthahalli on to British Territory, restaurants are necessary in those places and the Board would therefore urge the subject on the notice of the Executive Engineer.

13. The Board regret to record the death of Mr. Hosabele Subba Rao, a member of the Local Fund Board. Messrs. Venkat Rao, Nanjunda Naidu and Anantaramaiengar, Amildars of Sorab, Sagar and Nagar, stated that in consideration of the valuable help rendered by the deceased member, his son Timmappa may be appointed as Local Fund Member as he is fit to represent the interests of those Taluks in the Board. The proposal was unanimously carried.

Resolved that Government sanction may be applied for for the nomination of Timmappa as Local Fund Member.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Financial),—dated 27th January 1892.

READ :—

Letter from the President of the Bangalore City Municipal Commission, dated 4th January 1892, No. 977, submitting the explanation called for in Government Proceedings, dated 6th October 1891, No. 7657-70—632, in regard to the Budget Estimates for the year 1891-92.

No. 11928-30—L. 1160, DATED BANGALORE, 27TH JANUARY 1892.

ORDER THEREON.—*Expenditure.—II. Head Office.*—The retention of the services of the Clerk allowed to the Commissioners is recommended on the ground that, whenever they have to go about the town with petitions referred to them for opinion or report, the Clerk is required to read Kanarese papers and to record their opinions. A single Clerk cannot be expected to work under 16 Commissioners, some of whom may require his services almost simultaneously. It must further be remarked that almost all the Commissioners are conversant with Kanarese and two of them (Messrs. Scaldwell and Leonard), who may be under the necessity of getting the Kanarese papers read to them, were of opinion that no Clerk was needed for the Commissioners. Under these circumstances, the Government consider that a separate Clerk for the Commissioners is not absolutely wanted, but they would not object to his being retained until such time as he can be otherwise provided for. The provision made for the pay of the Mutsaddi will accordingly be retained for the present.

2. *III. Collection.—(c) Other Taxes.*—The Market Serjeant whose pay is Rs. 15 per mensem, was granted an allowance of Rs. 15 per mensem on condition of his performing the additional duties imposed on him as Inspector of Hackney Carriages and Superintendent of the Ward for Incurables. It is objectionable that so many appointments should be held by one and the same individual, who cannot possibly give satisfaction in the discharge of his multifarious duties but, as the Board propose to make better arrangements when the present incumbent is otherwise provided for, the proposal is approved. The increase of pay proposed for the Hackney Carriage Inspector, which is now considered unnecessary, will be struck out of the Budget.

3. *VI. Registration of Births and Deaths.*—The employment of an additional Registrar is rendered necessary owing to the increase in the number of Divisions. There are at present 3 Registrars and 1 Mutsaddi distributed among the 8 Divisions of the Municipality. The entertainment of the additional hand is approved, and the President will report the date from which the charge has been incurred.

4. *VIII. Public Works.—(a) Supervision.*—Notwithstanding the appointment of a separate Municipal Engineer, the Overseer's work it is represented, has of late considerably increased, owing to the works, connected with the western extension, the new Taragpet and the Fort improvements, and the Board recommend the increase of pay disallowed by Government. The increase is sanctioned with effect from 1st January 1892, and the necessary provision will be made in the Budget.

5. *IX. Charitable Grants.*—The Board very strongly recommend the continuance of the appointment of the Itinerant Medical officer employed in the City. It is reported that, after the death of Mr. Arokyam Pille, a retired Hospital Assistant of the Mysore Medical Service was appointed at a time when influenza was raging and when it was considered necessary to attend to the old and infirm, especially women, who were unable to attend the Dispensaries. Under these circumstances, the Government sanction the payment of the charges incurred for 1891-92 as shown under:—

(1).	Hospital Assistant, Pay Rs. 20 + 10 allowance	360
(2).	Compounder at Rs. 10	120
(3).	Purchase of medicines	170
	Total Rs...	650

6. The continuance of the services of the Itinerant Medical officer is sanctioned as a tentative measure, on the distinct understanding that those who are able to go to the Dispensaries or who can afford to make arrangements for the attendance of a Medical officer in their own homes will not be allowed to partake of the gratuitous relief, which is intended to be given only to those who are really destitute and unable to attend the Dispensaries. It is requested that a statement, showing the number of persons of different castes actually treated by the Itinerant Medical officer ever since his employment, be submitted for the information of Government.

7. *Other Charitable Institutions.—Ward for Incurables.*—Including the sum of Rs. 300 sanctioned in Government Proceedings, dated 11th January 1892, No. 11108-9—L. 1007, the provision under this head amounts to Rs. 700, which is sanctioned subject to details being furnished.

8. *IX. (b) Hospitals.*—The date on which the Chattram Hospital was opened and whether the whole amount provided for is required for 1891-92, should be reported as early as possible.

9. The Budget Estimates as now sanctioned are as noted below :—

No. 11298-336—L. 1043, DATED 18TH JANUARY 1892.

ORDER THEREON.—The Government regret to observe that there has been great delay in the submission of the Reports read above and some of the Comptroller's accounts were received in this Office only in October last. It is of the greatest importance that these reports should be submitted within the prescribed time and the Government trust that such delay will not occur again.

2. During 1888-89, there were 95 Municipalities. One was newly formed at Kadaba in the Tumkur District and another at Sosale in the Mysore District during 1889-90. The total number of Municipalities during 1889-90 was thus 97. Statement No. 1 shows the population of each Municipality, of which the following is the abstract :—

5. The information furnished in regard to the number of meetings held in each Municipality is incomplete, but, so far as statements have been furnished, they show that meetings were regularly held every month in almost all the Municipalities.

6. The receipts and expenditure during 1889-90 were nearly the same as those in the preceding year as will be seen from the subjoined statement :—

The decrease is somewhat conspicuous under Cloths and occurs chiefly in the City of Mysore. It is attributed to the strike among merchants, which took place during October 1889.

9. *Tax on houses and Mohatarfa.*—The collections under House Tax, which were about the same as those in the preceding year, call for no remark. The increase under Mohatarfa is chiefly due to the collection of arrears.

The increase which is large in Mysore is due to the introduction of the enhanced rates sanctioned by the Municipal Regulation, which was extended to the City of Mysore in the latter part of 1888.

11. *Carriage Tax and Tax on Animals.*—This tax exists only in the City of Mysore. The increase of Rs. 1,300 is nominal, being the cart-tax hitherto shown under Mohatarfa, now transferred to this head.

12. *Rents.*—The bulk of revenue under this head, consisting of rents on shops, markets and other property belonging to the Municipalities, is derived in the Bangalore and Mysore Cities.

13. *Miscellaneous.*—The sums credited under this head consist of the following items:—

	Total Rs.....	72,066	61,966

14. *Item* 4.—The land revenue in the City of Bangalore alone is credited to the Municipality under the orders of Government.

15. *Grant-in-aid.*—This item consists of contributions made by Government, and Sringeri and Parakala Matts for the maintenance of the Sanskrit College at Bangalore.

		Rs.
1.	Government ...	1,200
2.	Sringeri Matt ...	1,200
3.	Parakala Matt ...	360
	Total Rs.	2,760

16. The other items of revenue do not call for remark.

17. Looking to the gross results of each District, the net decrease of Rs. 2,269 in the revenue of 1889-90 compared with that of 1888-89 is made up of a gross decrease of Rs. 30,271 in 39 Municipalities and a gross increase of Rs. 28,002 in 58 Municipalities. The Municipalities in which the variations are above Rs. 1,000 are those named in the margin. These variations are due to ordinary causes such as the existence or non-existence of the arrears of previous years, and the extraordinary sales of house sites in Birur and Kadur in 1888. In Shimoga, a loan of Rs. 5,000 was shown under receipts in 1888-89 and there was no similar loan in 1889-90. The large decrease in Mysore is due to the falling off in the collections of Octroi duty owing to the strike among merchants in 1889 and to the tardy collections of the Mohatarfa tax.

18. Adverting to the demand, collection and balance of Municipal revenues in the several Districts, the Government observe that, except in Kadur and Chitaldroog Districts, the uncollected balances on 1st April 1890 were heavy as shown below and discreditable to the officers concerned. Probably most of these arrears have been since collected. Early measures should be adopted for the recovery of any arrears still remaining uncollected and the Deputy Commissioners should see that, in future, the collections are made within the year.

19. *Head Office.*—The increase under this head is due chiefly to the special allowances granted to the President and Vice-President of the Mysore City Municipality for a portion of the year.

20. *III. Collection.*—Out of a total expenditure of Rs. 21,363, Rs. 16,224 were spent in the Bangalore and Mysore Municipalities and the rest paid to village officers and petty establishments, through whom the collections were made in the other Municipalities.

The Municipalities of the Mysore City and French Rocks Sub-Division do not appear in the above statement as the requisite information has not been furnished by them. The Government desire that this information be supplied in future reports

30. *Vaccination.*—The information under this head is also incomplete. The number of persons vaccinated is not given for some of the Districts and the reason assigned for the omission is that the vaccinators were not paid by the Municipalities. As already remarked by Government in their review of the Reports for 1888-89, it is the duty of the Municipal Boards to encourage vaccination and report the number of persons actually vaccinated whether the pay of the vaccinators was borne by the Municipalities or not.

35. On the whole, the work in the various Municipalities has been done well. There is a growing tendency, especially in the principal towns at the Head-quarters of Districts, for the development of the Municipal institutions, and the members of the Boards have generally evinced a desire to assume responsibility and to perform faithfully the duties that devolve on them as the representatives of the rate-payers.

M. NARAIN RAO,
Under-Secretary.

To—The Presidents of Municipalities and Deputy Commissioners of Districts.
The Comptroller
The Senior Surgeon.
The Secretary in the Education Department.
The other Heads of Departments.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Financial),—dated 18th January 1892.

READ :—

Letters dated 8th and 13th December 1891, Nos. 609 and 624, from the Deputy Commissioner of the Hassan District, submitting the Local Fund Board's Proceedings dated 30th October and 9th November 1891, respectively, together with the District Fund Budget Estimates of the Hassan District for the year 1892-93.

No. 11482-6—L. 1065, DATED 19TH JANUARY 1892.

ORDER THEREON.—The estimated receipts for 1892-93 amount to Rs. 65,302 against Rs. 67,980, the actuals of 1890-91 and Rs. 68,390, the sanctioned estimate for 1891-92.

Items.	Details of Receipts.	Actuals of 1890-91.	Estimate for 1891-92.	Estimate for 1892-93.
I	76 per cent of Local Cess	55,724	56,240	55,176
II & III	Cattle pounds ...	8,371	6,670	6,765
IV	Ferry collections ...	2,980	3,391	3,055
VI	Fees from Travellers' Bungalows ...	...	...	...
VII	Contributions ...	652	1,000	136
IX	Miscellaneous ...	253	1,089	170
	Total Rs...	67,980	68,390	65,302

2. As compared with the actuals of 1890-91, the estimates for 1892-93 under "Cattle Pounds" and "Contributions," seem low, for which no explanation has been offered. The Deputy Commissioner's figures will, however, be accepted.

3. No receipts are shown under "V. Fees from Travellers' Bungalows." This needs explanation.

4. The "Opening Balance" on 1st April 1892 is estimated at Rs. 93,112, but, according to the Comptroller's accounts, it would be only Rs. 61,750. Adding to this, the estimated receipts for the year 1892-93, Rs. 65,302, the sum available for expenditure during the year would be Rs. 1,27,052, of which Rs. 71,516 are proposed to be expended, leaving a balance of Rs. 55,536 at the end of the year.

1.	Civil Charges	10,416
2.	Public Works to be executed by Public Works Department...	61,100
3.	Do Revenue Department...	0
	Total.....	71,516

7. *I, Civil Charges.*—The provision made under this head is Rs. 3,778 more than the sanctioned estimate for 1891-92, as will be seen from the subjoined statement :—

	(3) Reserve	...	150		
	Total Rs.. ...	6,638	10,416	4,150	372
		Net Increase Rs. 3,778.			

8. *II. Medical Scholarships.*—In accordance with the Government Proceedings dated 24th December 1887, No. 5832-43—149, the provision that has to be made under this head is only Rs. 611, which will be inserted in the Budget in lieu of Rs. 679, proposed by the Local Fund Board.

9. The only item of increase, which calls for special notice, is the sum of Rs. 4,000 which the Local Fund Board propose to spend, to improve the sanitation of the village. This is a necessary provision made in accordance with the instructions conveyed in para 3 of this Office Memo, dated 25th September 1891, No. 7259-66—576. The estimate is, therefore, sanctioned.

10. *IX. Contributions.*—It is not explained why no provision is made under this head on account of the mileage allotment payable to the Hassan Municipality under the Chief Engineer's Circulars, dated 16th April 1886 and 20th December 1889, Nos. 32, and 97—99 respectively. The omission should be supplied.

X. *Miscellaneous.*—Additional provision has to be made under this head for the purchase of Amrut Mahal bulls under Government Proceedings, dated 16th September 1891, No. 6999-7008—123. A sum of Rs. 825 will, on this account, be entered in the Budget.

		Rs.
1.	Full cost of 3 bulls to be supplied to the District ...	... 450
2.	Half the cost of 5 bulls do	... 375
	Total.....	... 825

11. *Public Works.*—No works are proposed to be undertaken by the Revenue Department and the amount required for those which have to be executed by the Public Works Department, as shown below, is Rs. 61,100, which is passed :—

Items.	Details.	Hassan Division.	Belur Range.	Total for the District.
I	Original Works	10,000	5,000	15,000
II	Repairs	24,180	1,400	25,580
III	Establishments	10,250	1,850	12,100
IV	Tools and Plant	500	100	600
V	Reserve	6,820	1,000	7,820
	Total Rs...	51,750	9,350	61,100

It is presumed that the estimate under "Repairs" for the Hassan Division includes the maintenance allowance payable to the Hassan Municipality under the Chief Engineer's Circulars quoted in para 10 *supra*. If so, the amount so included should be reported with a view to its being transferred to "IX. Contributions, I. Civil Charges."

12. The Budget Estimates are sanctioned as detailed in the accompanying statements, of which the following is an abstract :—

		Rs.
(1)	Opening balance on 1st April 1892	61,750
(2)	Estimated receipts for 1892-93	65,302
(3)	Total including balance	1,27,052

Proceedings of the Government of His Highness the Maharaja of Mysore, (Financial),—dated 19th January 1892.

13. The Government regret to notice that there has been great delay in the submission of the Budgets, which, moreover have not been prepared in the forms prescribed by Government in their Proceedings, dated 25th September 1891, No. 7259-66—L 576. The Deputy Commissioner should see to the correct preparation and punctual submission of these Budgets in future.

Total Rs	9,000

IV. Read Resolution No. III, para 5 of the Proceedings of the Meeting of the Local Fund Board, convened on 22nd September 1890, regarding the opening of Arehalli-Bikkodu road.

Resolution.—The Board having paid due attention to the insufficiency of funds and to Government Proceedings No. 1399-14—209-24, Public Works Department, dated 14th March 1889 (instructing that more attention must be paid to the sanitation of rural parts than to the opening of new roads) struck off the provision of Rs. 2,000 provided for in the Budget.

V. Read docket No. 1963—81, dated 26th October 1891, from the Inspector General of Forests and Plantations in Mysore, regarding the opening of a branch road from Kattaya-Hallibail road to Bhaktarvalli Plantation.

Resolution.—As there are works of a more important nature than this and owing to want of funds, the Board regretted its inability to contribute half the cost of the said road, *i. e*, Rs. 827 from District Funds.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Financial),—dated 19th January 1892.

VI. Read Resolution No. IV of the Proceedings of the meeting of the Local Fund Board held on 22nd September 1890, regarding the construction of the Inspection Lodges at Sulidevarahalli and Lakkunda in the Belur Taluk.

Resolution.—The Board resolved to make a reference to Public Works Secretary to arrange for the early construction of the said Lodges.

Proceedings of a Meeting of the Local Fund Board, Hassan District, convened on 9th November 1891.

Present.

1. Haji Syed Nasiruddin Sahib, Esq., Deputy Commissioner and President.
2. A. S. Nagavkar, Esq., Executive Engineer, Hassan Division.
3. B. Ramaswami Iyer, Esq., General Assistant Commissioner, Hassan District.
4. E. S. Krishnaswami Iyer, Esq., Assistant Surgeon, Hassan District.
5. Sahukar Bhimanna.

Read Proceedings No. 8187-94—L. 648, dated 29th October 1891, directing that provision must be made for the sanitation of rural parts in the Local Fund Budget for 1892-93.

It was resolved that Government be requested to sanction a provision of Rs. 4,000 at the rate of Rs. 500 for each Taluk including the Grama Sub-Taluk in the Budget of civil charges for the year 1892-93, in which the said charges are included.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Financial),—dated 19th January 1892.

READ:—

Docket from the Deputy Commissioner, Kolar District, dated 14th November 1891, No. 2227—537, submitting the District Fund Budget Estimates of the Kolar Local Fund Circle for the year 1892-93 together with a copy of the District Fund Board's Proceedings dated 24th October 1891.

No. 11444-49—L. 1059, DATED 19TH JANUARY 1892.

ORDER THEREON.—The receipts for 1892-93 are estimated at Rs. 71,000 against Rs. 76,274, the actuals of 1890-91, and Rs. 71,344, the sanctioned estimate for 1891-92.

		Actuals of 1890-91.	Estimate for 1891-92.	Estimate for 1892-93.
I.	76 per cent of Local Cess ...	73,223	67,124	66,728
II.	Sale of stray cattle	441	460	460
III.	Fines for cattle trespass ...	2,610	2,600	2,600
VI.	Fees from Travellers' Bungalows...	...	...	...
IX.	Contributions	...	...	..
X.	Miscellaneous	...	1,160	1,212
	Total.....	76,274	71,344	71,000

2. *I. Local Cess.*—The estimate under this head is stated to include "Irrigation Cess" and cess on "Miscellaneous items," such as "Forest Sales" and "Salt Pans." The realizations from "Irrigation Cess" are creditable to the "Irrigation Fund" and the collections from "Miscellaneous Items" to "Local Funds General." The Deputy Commissioner is, therefore, requested to state the amounts, which have to be deducted from the District Fund Budget. According to the figures given in column 3 of Enclosure A, the 76 per cent of the Local Cess creditable to District Funds is .. Rs. 68,216
Adding to this, the probable arrears at the beginning of 1892-93 .. „ 18,184

The total demand is Rs.... 86,400

It is not explained why the probable estimate is entered as Rs. 66,778 only. Pending the Deputy Commissioner's explanation, his figures will be adopted.

3. *VI. Fees from Travellers' Bungalows.*—The anticipated income from fees from 3rd Class Travellers' Bungalows, which have to be credited to District Funds, have not been shown. The Deputy Commissioner will report the amount of probable receipts for entry under this head.

4. *IX. Miscellaneous.*—The fees expected from Branch and Hobli Schools, which are maintained from "Village School Fund", have been wrongly included under this head. This item will, therefore, be struck out of the Budget.

5. *Opening Balance.*—The actual balance on 1st April 1891 is reported by the Comptroller to be Rs. 1,22,039. Adding to this, the estimated receipts for 1891-92, Rs. 71,344, the total amounts to Rs. 1,93,383; and deducting therefrom the estimated expenditure, Rs. 73,570, the probable balance on 1st April 1892 would be Rs. 1,19,813 and not Rs. 1,21,959 as shown in the Deputy Commissioner's statement. The correct figure will be adopted.

6. The total receipts, including the estimated balance, amount to Rs. 1,89,601, of which * Rs. 1,04,708 are proposed to be expended, leaving a balance of Rs. 84,893 at the end of the year.

7. The "I. Civil Charges" which amount to Rs. 12,294 exceed those of the previous year by Rs. 4,058 as shown under :—

Items.	Details.	Estimate for 1891-92 as sanctioned in Proceedings dated 13th May 1891.	Estimate proposed for 1892-93.	Increase.	Decrease.

			Net increase	4,058	

8. *II. Medical Scholarships.*—Under Government Proceedings, dated 24th December 1887, No. 5852-43—149, the sum that has to be provided is only Rs. 611. The difference, Rs. 68, will be struck out.

	Rs.

Total Rs.....	4,890
The sum debitable to each District ...	611

9. *III. Hospitals and Dispensaries.*—The increase under this head is the result of a gross increase of Rs. 2,348 and of a gross decrease of Rs. 146 in the items specified in the margin. The items of decrease call for no remark.

Increase.	Rs.
1. Allowance to watermen in Local Fund Dispensaries.	228
2. Cholera sheds ...	2,000
3. Native Vaidya ...	120
Total.....	2,348

Decrease.	Rs.
1. Furniture	14
2. House rent ...	132
Total.....	146

10. *Increase (item 1)* is due to the provision newly made on account of the allowance to watermen in the Local Fund Dispensaries sanctioned in Government Proceedings, dated 4th July 1891, No. 4094-6—283.

11. *Item 2* provides for the construction of cholera and quarantine sheds and for the treatment of cholera patients. The estimate, Rs. 2,000, is therefore sanctioned.

12. *Item 3* is intended to secure the services of a Videya or Native physician of proved experience and skill for treating orthodox Brahmins and other high class Hindus, who, owing to their caste prejudices, are, it is alleged, unwilling to resort to the Local Fund Dispensaries and Hospitals. This proposal cannot be readily accepted. It will be referred to the Senior Surgeon for favor of his opinion, and the amount entered in the Budget will be struck out, as the matter requires further consideration.

13. *V. Sweepers for Travellers' Bungalows, &c.*—The sum of Rs. 879 provided under this head excludes the pay of additional establishment sanctioned as noted in the margin and is passed.

1.	Narsapur Chattram ...	Kavalgar... 4	Government Proceedings No. 4094-6—283, dated 4th July 1891.

3.	Chintamani Bungalow ...	Sweeper ... 4	Government Proceedings No. 4769-70—314, dated 20th July 1891.

14. *VI. Conservancy and Sanitary Charges.*—Out of Rs. 2,050 entered under this head, it is intended to spend Rs. 2,000, for removing prickly pear and to promote village sanitation. The estimate is approved.

		1891-92.	1892-93.
1.	Conservancy charges during fairs and festivals ...	50	50
2.	Removing prickly pear	0	1,000
3.	Village sanitation	0	1,000
	Total Rs.....	50	2,050

15. *IX. Contributions.*—It is not explained why no provision has been made for payment of contribution to the District Head-Quarter Municipality for the maintenance of roads within Municipal limits, in accordance with the Chief Engineer's Circulars dated 16th April 1886 and 20th December 1889, Nos. 32 and 97—98 respectively.

16. X. *Miscellaneous.*—Provision has to be made for the purchase of Amrut Mahal bulls for breeding purposes, and a sum of *Rs. 825 will accordingly be entered in the Budget under the authority conveyed in Government Proceedings, dated 16th September 1891, No. 6999-7008—123.

		Rs.
* (*a*).	Full cost of 3 bulls to be supplied at the average rate of 100+200—2 or 150 each	450
(*b*).	Half the cost of 5 bulls to be sold to raiyats	375

B.	Do	Revenue Department ...	16,450
		Total.....	46,588

18. *II. Repairs.*—The estimate under this head amounting to Rs. 24,429 is also sanctioned; and if it includes the contribution payable to the Kolar Municipality for the maintenance of roads within its limits under the Chief Engineer's Circulars, dated 16th April 1886 and 20th December 1889, Nos. 32 and 97—98 respectively, the amount should be reported, with a view to its being transferred to "IX Contributions, I. Civil Charges."

			Rs.
A.	Works to be executed by	Public Works Department ...	23,465
B.	Do	Revenue Department ...	964
		Total Rs.....	24,429

19. *III. Establishments.*—The establishment charges are moderate and are accordingly passed.

20. *V. Reserve.*—The amount provided under this head is allowed.

3. *Wells and Ponds, Original and Repairs.*—These have been provided by the Board with due regard to their importance and the urgency of the requirements of the public in this respect and being works of an ordinary nature, it has been resolved to have the same carried out by the Revenue Department.

4. The necessity for the construction of Musafarkhanas, &c., at the marginally noted localities is keenly felt and has, from time to time, been urged for the consideration of the Board.

	Rs.

1 Construction of a Musafarkhana at Goribidnur .	2,000
1 Do near Muniyppa's well at a small distance from the Railway Station, Malur...	800
Total.....	8,100

It has therefore been resolved to make provision for the same in the Budget and to request Government sanction to the proposal. The necessary estimates and plans for these projects will be submitted in due course.

5. *Hospitals and Dispensaries.*—As the District has of late been frequently visited by cholera, the Board have thought it necessary to make a lump sum provision of Rs. 2,000 under this head to meet unforeseen charges for the construction of temporary cholera and quarantine sheds, and for the treatment, feeding, &c., of patients during the prevalence of the epidemic.

6. The inhabitants of several villages in the Kolar, Bowringpet and Mulbagal Taluks have represented by petition that many of them are not accustomed to English medicine, and that Orthodox Brahmins and other high class Hindus having caste prejudicies object to resorting to the Dispensaries for medical aid. They request that Native Vaidya of proved experience and skill may be appointed for the benefit of such persons and required to visit the villages in need of medical advice and help.

The Board are of opinion that the above prayer may be granted and have resolved to request the Government to sanction as an experimental measure the appointment of a competent Hakim on a pay of Rs. 10 per mensem as provided in the Budget.

7. There are already numerous avenues and topes in the District for the benefit of men and cattle. The existing practice by which the planters of roadside avenues and village topes are allowed to take dead and dried wood from the trees planted by them together with the produce of such trees, the rules of endowment of jodi lands in favor of planters of avenues and topes and provision for the grant of kaule tenure to intending planters are, it is considered, sufficient inducements for private enterprise.

In this view, the Board have, at present, thought it unnecessary to provide in the Budget for planting trees at the cost of the District Funds.

8. The importance of conservancy and sanitation in the rural parts is, from time to time, urged on the attention of the people and a lump sum provision of Rs. 1,000 is provided under this head to be utilized for the purpose wherever and whenever an occasion arise for the same.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Financial),—dated 20th January 1892.

READ:—

Dockets from the Deputy Commissioner of the Chitaldroog District, dated 7th and 18th November 1891, Nos. 368—349 and 382—362, respectively, submitting the District Fund Budget Estimates of receipts and expenditure of the Chitaldroog Local Fund Circle for the year 1892-93.

No. 11470-4—L. 1063, DATED 20TH JANUARY 1892.

ORDER THEREON.—The estimated income for 1892-93 is Rs. 38,066 against Rs. 41,471, the actuals of 1890-91, and Rs. 38,053, the estimate for 1891-92.

	Items of Receipts.	Actuals of 1890-91.	Estimate for 1891-92.	Estimate for 1892-93.
I.	76 per cent of Local Cess ...	29,397	29,488	29,607
II.	Sale of stray cattle ...	1,142	1,090	1,140
III.	Fines for cattle trespass ...	5,681	5,090	5,697
IV.	Ferry collections ...	405	250	400
V.	Tolls	...	...	...
VI.	Fees from travellers' bungalow	11	...	12
VII.	Contributions	150	2,125	1,200
VIII.	Grants-in-aid	4,678	...	...
IX.	Miscellaneous	7	10	10
	Total Rs....	41,471	38,053	38,066

2. *Local Cess.*—There is a small increase under this head, which is expected from the increase of land revenue in the District. The estimate is approved.

3. *Tolls.*—No receipts are shown under this head on the ground that there is no order authorizing the tolls levied being credited to District Funds. The Deputy Commissioner is requested to state whether the tolls in the District are at present managed by *amani* or given out on contract, and, in the latter case, why the cess should not be levied from the contractor.

4. The contributions promised according to the details entered in the Schedules B and C, which form enclosures to the Budget, amount to Rs. 1,250 and not Rs. 1,200. The former figure will be adopted.

5. The "Opening Balance" is shown as Rs. 42,890; but, according to the Comptroller's accounts, it should be Rs. 45,908.

6. Including this balance, the sum available for expenditure during 1892-93, is Rs. 84,024, of which Rs. 44,286 are proposed to be expended, leaving a balance of Rs. 39,738 at the end of the year.

		Rs.

2.	Public Works to be executed by D. P. W. ...	31,638
3.	Do Revenue Department ...	6,620
	Total Rs...	44,286

7. Under "1. Civil Charges" there is an increase of Rs. 1,445 as particularized in the subjoined statement:—

Items.	Details.	Estimate for 1891-92.	Estimate for 1892-93.	Difference. Increase.	Difference. Decrease.

	Total.....	4,383	6,028	1,513	68
	Net Increase Rs.....	...	...	1,445	...

8. *III. Hospitals and Dispensaries.*—The marginally noted items, which have been newly provided for in the Budget, are sanctioned. It is observed that some of the articles of furniture included in the list submitted with the Deputy Commissioner's docket, dated 18th November 1891, No. 382—362, are such as have either been already supplied to these Dispensaries or are in excess of the standard fixed in the late Chief Commissioner's Proceedings, dated 26th October 1875, No. 6123—141. The Deputy Commissioner is therefore requested to see that, in cases of this kind, a separate reference is invariably submitted to Government with a list showing the articles already supplied and those proposed to be newly supplied and the previous sanction of Government obtained before any portion of the provision is utilized.

		Rs.
1.	House rent for the Challakere Dispensary ...	24
2.	Furniture, &c. for the Local Fund Dispensaries ...	269
3.	House rent for the Dispensaries—	
	at Hosdurga ... ... Rs. 40 }	80
	at Harihar ... ... „ 40 }	
	Total Rs....	373

9. *IV. Midwives.*—Only 50 per cent of the pay of 4 midwives to be employed in the District has to be debited to District Funds and the other half to Municipal Funds, in accordance with this Office Proceedings, dated 19th December 1891, No. 10367-9—912. The estimate will, therefore, be reduced to Rs. 480.

10. *Conservancy and Sanitary Charges.*—In accordance with para 3 of Government Proceedings, dated 25th September 1891, No. 7259-66—L. 576, a sum of Rs. 500 is proposed to be spent on village sanitation. This is approved.

11. *IX. Contribution.*—It is not explained why no provision has been made under this head on account of the mileage allotment payable to the Chitaldroog Municipality for the maintenance of roads within the Municipal limits of the town, under the authority of Chief Engineer's Circulars, dated 11th July 1886 and 20th December 1889, Nos. 32 and 97—98 respectively.

12. *X. Miscellaneous.*—No provision is made for the purchase of Amrut Mahal bulls sanctioned in Proceedings No. 6999-7008—123, dated 16th September 1891. A sum of Rs. 825 will be entered in the Budget on this account.

13. *I. Original Works.*—The sum of Rs. 11,000 proposed for works to be executed by the Public Works Department includes Rs. 3,000 on account of the three Railway feeders noted in the margin and Rs. 1,000 on account of bridging the "Tarikere-Hosdurga road"; and the District Fund Committee apply for a grant-in-aid of Rs. 4,000 from Local Funds General to meet the cost of these works. As there is a sufficiently large balance to the credit of District Funds, from which the proposed expenditure can be met in 1892-93, the Government deem it unnecessary to accede to the recommendation of the Board.

		Rs.
A.	Public Works to be executed by D. P. W. ...	11,000

	(2) Soeile to Santebennur ...	1,000
	(3) Anaji-Anagode road ...	1,000

14. *II. Repairs.*—A sum of Rs. 3,480 is entered for the maintenance of the "Chitaldroog-Benkipur road," which the Local Fund Board, in para II of their Proceedings, dated 6th October 1891, again request may be transferred to "Provincial," on the ground that the District Funds are insufficient to meet the maintenance charge. This request will be considered in the Department of Public Works, but, pending

		Rs.

final orders, the provision will be retained. It is presumed that the mileage allotments payable to the Chitaldroog Municipality under the Chief Engineer's Circulars of 1886 and 1889 have been duly provided for, and if so, the Deputy Commissioner will report what sum should, on this account, be transferred to "IX Contributions I. Civil Charges".

15. The Budget Estimates of receipts and expenditure are sanctioned as detailed in the accompanying appendices, of which the following is an abstract :—

		Rs.

7. ,, Malebennur Venkata Rao of Davangere.

I. Read the budget estimates of receipts of District Funds for the year 1892-93.

The estimates have been prepared with reference to the actuals for 1890-91 and the estimates for 1891-92, as detailed in the Budget. The details of assets upon which one anna cess has been calculated for 1892-93 are also given therein.

The small increase of Rs. 210 in the estimate for 1892-93 over the actuals for 1890-91 under "76 per cent of one anna cess on land revenue" is expected to be realized from increase of land revenue in the Challakere Taluk on the completion of the Rakalgere project and from the general increase of land revenue throughout the District owing to increase in cultivation.

The income of Rs. 1,200 for 1892-93 under contribution is expected to be received from the raiyats of the several Taluks in the District, for whose benefit wells are proposed to be sunk, or repaired, during the year 1892-93, as per particulars given in the Budget. As most of these works are intended for very poor raiyats, who cannot afford to pay any contribution, no contributions can be expected from them. This accounts for the decrease in the estimate under this head for 1892-93 as compared with the estimate for 1891-92.

The estimated receipts under other heads call for no remark as they have been based upon the actuals of 1890-91. Thus the total estimated receipts for 1892-93 under all heads amount to Rs 38,066 against Rs. 38,053, estimated for 1891-92, and Rs. 36,792—13—1 (excluding Rs. 4,678, being a grant from Local Funds General) the actuals for 1890-91.

The Board resolve that the estimate of receipts for 1892-93 as stated above be passed.

The balance of District Funds on 1st April 1892 is estimated at Rs. 42,890 as shown in the margin. This amount together with the estimated receipts of Rs. 38,066 for 1892-93, makes a total of Rs. 80,956, which will be the amount available for expenditure during 1892-93.

Balance on 1st April 1892	42,890

II. Read the Executive Engineer's No. 418 of 4th August 1891 forwarding copy of Chief Engineer's No. 3125, dated 27th July 1891, declining to transfer the Chitaldroog-Benkipur road from District Funds to Provincial Funds as recommended by the Local Fund Board in their Proceedings dated 6th October 1890. But as this road has become very important since the Railway was opened and as a large amount of traffic is carried on over this road, it requires to be properly metalled in order to keep it in good order and as the District Funds are not sufficient for the purpose, the Board resolve that Government be again requested to sanction the transfer of the road in question from District Funds to Provincial.

III. Read the marginally noted Government Proceedings directing that works under Miscellaneous Public Improvements, be generally carried out by the Revenue Department.

Para 19 of Government Proceedings No. 12700-10—267-296, dated 5th February 1891 and para 5 of Government Proceedings No. 6121-4—421, dated 20th August 1891.

Resolved that provision for such works be made under Civil Charges in the Budget Estimates for 1892-93, and that the provision for such works made by the Executive Engineer in the Public Works Budget be excluded therefrom.

IV. Read Budget Estimate of expenditure proposed by the Executive Engineer on account of Public Works to be executed in 1892-93.

Resolved that the same be approved with the following observations :—

(1). That the Government be requested to sanction from Local Funds General a grant of Rs. 1,000 each for Hosdurga-Biderkere Railway feeder road and Sasalu-Santebennur Railway feeder road, as the Board are given to understand that the cost of such feeder roads is met from Local Funds General.

(2). That the opening out of the Anaji-Anagod road be approved and that the Government be requested to grant funds for that work out of Local Funds General, as it is also a Railway feeder.

3). That the bridging of the Tarikere-Hosdurga road be approved and that Government be requested to sanction funds for it out of Local Funds General, as the Board are given to understand that the bridging of that portion of the road which lies in the Kadur District is being carried out from Local Funds General.

4). That a proportionate reduction be made under 'Establishment Charges,' as the provision of Rs. 2,688 under Miscellaneous Public Improvements both for original works and repairs has been excluded from the Public Works Budget and included under Civil Charges as per Resolution No. III, *supra*.

V. Proposed by the Amildar of Challakere Taluk that the maintenance of Challakere-Pavagada road be undertaken by the District Fund Board, as the road is much used by the inhabitants of Pavagada and Challakere Taluks.

The majority of the members are of opinion that the road is comparatively unimportant and as the Board in their present financial condition cannot afford to undertake the maintenance of that road, it is resolved that the Amildar's proposal be rejected for the present.

VI. Read the Budget Estimate of civil charges debitable to District Funds for 1892-93.

The estimate for 1892-93 is put down at Rs. 5,259 against Rs. 4,583 sanctioned for 1891-92. A provision of Rs. 611 has been made for 1892-93 against

Rs. 679 sanctioned for 1891-92 under Medical scholarship in accordance with Government Proceedings No. 5332-43—149, dated 24th December 1887. As sanctioned in Government Proceedings No. 4669-72—303, dated 20th July 1891, a sum of Rs. 24 has been entered on account of house rent for the Challakere Dispensary.

The Senior Surgeon being of opinion that the buildings in which the dispensaries at Hosdurga and Harihar are located, are not suited for the purpose owing to their proximity to Public Offices which prevents respectable people, especially females and children, from freely resorting to those institutions for medical aid and that they should consequently be removed to some other buildings, a provision of Rs. 40 each has been made for Hosdurga and Harihar Dispensaries to meet the proportionate cost of house rent for those two dispensaries. A sum of Rs. 640 has been entered on account of two thirds of the pay, &c., of 4 midwives proposed to be employed in different parts of the District after they are trained in the Madras Lying-in-Hospital. (*Vide* Government Proceedings No. 14115-24—300, dated 18th March 1891, approving of the proposals made by the Senior Surgeon on the subject).

Resolved that the estimate of civil charges for 1892-93 be passed.

VII. Resolved that Rs. 3,850 for original works, Rs. 2,270 for repairs and Rs. 500 for reserve be provided under Miscellaneous Public Improvements. The details of the works proposed and the amount of contributions expected from the villagers towards them are given in the Budget.

VIII. The total amount of receipts and expenditure for the year 1892-93 stand as follows :—

If the Government are not pleased to sanction grants from Local Funds General for the works referred to in paras 1, 2, 3 of Resolution No. IV, the Board pray that the amount of Rs. 5,451 which is necessary to cover the excess expenditure over receipts for 1892-93 be permitted to be drawn from the balance of Rs. 42,890 estimated to stand at the credit of the Board on 1st April 1892.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Financial),—dated 20th January 1892.

READ:—

Dockets from the Deputy Commissioner of the Mysore District, dated 24th November and 11th December 1891, Nos. 705 and 771, respectively, submitting the District Fund Budget Estimates of receipts and expenditure of the French Rocks Local Fund Circle for the year 1892-93.

No. 11458-62—L. 1061, DATED 20TH JANUARY 1892.

ORDER THEREON.—The estimated receipts amount to Rs. 40,596 against Rs. 42,944, the actuals of 1890-91, and Rs. 40,322, the estimate for 1891-92.

Total Rs.....	42,944	40,332	40,596

2. *"Local cess."—Item I* includes a sum of Rs. 65, the cess levied on Sayer revenue, which is not creditable to District Funds. This sum will, therefore, be struck out and the estimate reduced to Rs. 38,655.

3. *The "Ferry Collections"* show a small decrease as compared with the actuals of 1890-91. The estimate is, however, passed.

4. The estimated balance on 1st April 1892 is given as Rs. 26,622. It is not explained how this has been arrived at. Pending explanation, the amount will be adopted.

5. Including the opening balance, the sum available for expenditure during 1892-93 is Rs. 67,153, of which Rs. 57,514 are proposed to be expended, leaving a balance of Rs. 9,639 at the end of the year.

7. *II. Medical Scholarships.*—The sum allowable under Government Proceedings, dated 16th December 1891, No. 9945-7—889, is only Rs. 235, which will be entered in lieu of Rs. 262.

8. *III. Hospitals and Dispensaries.*—The decrease under this head is due to the omission of the usual estimate (Rs. 32) on account of the rent of the Dispensary at Mandya, which is now located in a building handed over to Government by the Assistant Commissioner Mr. Narasimmaiengar free of charge. The estimate is passed.

9. *Conservancy and Sanitary Charges.*—Besides the usual provision of Rs. 90, on account of the Conservancy charges at Melkote and Paschimavahini, the Local Fund Board propose to spend, on village sanitation, Rs. 5,630, which includes Rs. 3,760 for sinking wells. The latter amount should properly appear under "I. B. Original works to be executed by the Revenue Department." The necessary transfer will be made and the provision under this head reduced to Rs. 2,960.

10. *Miscellaneous.*—For the purchase of Amrut Mahal bulls under Government Proceedings, dated 16th September 1891, No. 6999-7008—Cir. 123, a sum of Rs. 316 will be entered in the Budget.

Full cost of 3 bulls to be purchased at the average rate of Rs. $\frac{100+200}{2}$, or 150 Rs. each.	450
Half the cost of 5 bulls to be sold to raiyats ...	375

Read the Budget estimates of receipts and disbursements of the District Fund Board for the year 1892-93 framed as required in the Government Official Memorandum No. 7259-66—L. 576, dated 25th September 1891, and also the Budget estimate of the previous year.

One anna cess on land revenue.

The actuals of 1890-91, *viz.* Rs. 40,967 consisted of Rs. 6,172, the arrears of previous years, and from the figures mentioned in the Budget it will be observed that the decrease in the estimate for the year 1892-93 under this head is only Rs. 5 compared with the estimate for the previous year and calls for no remarks.

I. Sale of stray cattle.

The estimate under this head for 1892-93 exceeds by Rs. 246 over the estimate of the past year, but it is based upon the actuals of 1890-91 which are greater than those of 1889-90.

II. Fines for cattle trespass.

The decrease under this head is only Rs. 3, and calls for no remarks.

V. Ferry collections.

Like the increase under this head is only Rs. 10, and calls for no particular explanation.

VI. Fees from the 3rd Class Travellers' Bungalows.

No fees having been levied in the past year, no actuals can be given and with regard to the estimate for the year 1892-93, the fees in all probability may not exceed ten Rupees.

Total including the estimated receipts at the disposal of the Board for the year under report is Rs. 67,218 *i. e.*, opening balance Rs. 26,622 plus the estimated receipts Rs. 40,596.

Public Works.

The Executive Engineer, in placing the estimated Public Works amounting to Rs. 47,950 for the approval of the Committee, explained that it was necessary for the sake of improvement to raise this year the rate per mile for the Nelligéré French Rocks Station road from Rs. 80 to 100, and Seringapatam, Sosile-Sivanasamudram road, and Palhalli-Kalastawadi road from Rs. 40 to 50, all of which were formerly metal roads. The Budget was accordingly passed.

Civil charges.

The various charges under this head remain as before, except in the case of house rent for Mandya Dispensary. This amount, *viz.*, Rs. 32, has been now struck off the accounts as the Assistant Commissioner Mr. Narasimmaiengar has kindly placed the building at the disposal of the Government, free of charge, for the Dispensary.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Financial),—dated 20th January 1892.

Agreeably to para 3 of the Official Memorandum No. 7259-66—L. 579 of the 25th September 1891, the Committee resolved to spend Rs. 5,630 for the conservancy and sanitation of rural parts mentioned in the accompanying list D (*a*) Details will be called for from the Taluks and will be carefully scrutinized.

It will be observed that the total estimated expenditure under all heads amounts to Rs. 57,514, whereas the estimated receipts for the year amount to only Rs. 40,596; the expenditure therefore exceeds the income by Rs. 16,918. The Committee resolved to meet this difference from the balance of Rs. 26,622 at the credit of the Board.

With reference to para 2 of the Official Memorandum mentioned above, the matter being discussed in the Board, all the Amildars pleaded their inability to execute any such work satisfactorily without the aid of permanent establishment. All the works mentioned in the Public Works Budget are therefore entrusted to the Executive Engineer for execution.

The necessity of executing the works mentioned in the list D (*b*) was discussed and it was resolved that the cost of these should be recommended to be defrayed from the Provincial and Educational Funds, as they did not legitimately fall within the scope of District Funds.

With reference to para 4 of the Official Memorandum quoted above, the Board has been unable to adhere strictly to the instructions conveyed in it, but hope to abide by it in the next year.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Financial),—dated 21st January 1892.

Read again letter from the Deputy Commissioner, Bangalore District, dated 23rd December 1891, No. 774, submitting a copy of the Proceedings of the Local Fund Committee held on the 12th idem.

Read again Government Proceedings, dated 7th January 1892, No. 10849—968.

Read letter from the Deputy Commissioner of Bangalore, dated 8th January 1892, No. 826, submitting the District Fund Budget Estimates of the Bangalore Local Fund Circle for the year 1892-93.

No. 11641-5—L. 1104, dated 21st January 1892.

Order thereon.—The estimated receipts for 1892-93 amount to **Rs. 63,794 against Rs. 62,098, the actuals of 1890-91, and Rs. 60,137 the estimate for 1891-92.**

2. *Local Cess.*—There is an increase of Rs. 1,772 in the estimated receipts as compared with the actuals of 1890-91, for which no explanation has been given. The estimate will however be allowed to stand.

3. The amount of fees expected from Travellers' Bungalows is not entered. The omission needs explanation.

4. The probable balance on 1st April 1892 is given as Rs. 40,869. Adding to this, the estimated receipts, Rs. 63,794, the sum available for expenditure during 1892-93 is Rs. 1,04,663, of which Rs. 60,771 are proposed to be expended, leaving a balance of Rs. 43,892 at the end of the year.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Financial),—dated 21st January 1892.

6. *Local Fund Clerk.*—The Board recommend the employment of an Accountant or clerk on a salary of Rs. 30 per mensem for checking and compiling the Local Fund accounts and for carrying on the correspondence in the Local Fund Department, on the ground that the existing Statistical Clerk has more than enough of his own special work to do. The Government observe that if the work in the Local Fund Branch of the Deputy Commissioner's Office is too heavy for the Statistical Clerk to go through, the additional Clerk to be entertained ought to be his assistant on a less salary. The entertainment of an additional Clerk on a salary of Rs. 15 per mensem is accordingly sanctioned, as a temporary measure, pending the decision of the general question regarding the employment of a separate agency for the execution of the District Fund works. The provision made will accordingly be reduced from Rs. 360 to 180.

7. *III. Hospitals and Dispensaries.*—A sum of Rs. 400* is newly provided for the supply of furniture to the several Local Fund dispensaries in the District. This is sanctioned. As furniture has already been supplied to almost all the dispensaries according to the scale laid down in the late Chief Commissioner's Proceedings dated 26th October 1875, No. 6123—141, the Deputy Commissioner should, before utilizing the provision entered in the Budget, submit to this Office a list showing the articles already supplied and those newly required.

8. *IV. Midwives.*—The increase under this head is due to the provision made for the midwife to be employed both at Magadi and Nelamangala. The estimate is passed. Only 3 scholarships are proposed to be granted during 1892-93 to women for being trained as midwives against 4 sanctioned in 1891-92. Hence the decrease in the estimate, which is approved.

9. *V. Sweepers for Travellers' Bungalows.*—The Local Fund Board propose to employ four watchmen for the Inspection Lodges noted in the margin at Rs. 5 each per mensem. This provision is approved on the understanding that their services are also utilized for the use of the travelling public.

10. *VI. Conservancy and Sanitary Charges.*—In addition to the usual provision of Rs. 50 under this head, it is proposed to spend Rs. 20,000* on certain projects, for improving the sanitation of villages, and the Board ask for a grant-in-aid from Local Funds General on the ground that the ordinary receipts fall short of the annual fixed charges by Rs. 395 as shown in the margin. The Government observe that although the ordinary charges are slightly in excess of the receipts, there is at the credit of the District Funds a sufficiently large balance, from which the additional provision of Rs. 20,000 can be met. The estimate under this head is therefore raised to Rs. 20,050.

11. *IX. Contributions.*—The mileage allotment payable to the Bangalore City Municipality for the maintenance of roads has been omitted to be provided for under this head. The attention of the Deputy Commissioner will be drawn to the Chief Engineer's Circulars, dated 16th April 1886 and 20th December 1889, Nos. 32 and 97—98, respectively, with a view to the omission being supplied.

12. *X. Miscellaneous.*—No provision is made under this head on account of the purchase of the Amrut Mahal bulls sanctioned in Government Proceedings dated 16th September 1891, No. 6999-7008—123, as the Board propose to defer for the present any expenditure on this account owing to the present season being unfavorable.

13. *I. Original Works.*—The provision under this head amounts to Rs. 11,600*. Deducting therefrom Rs. 2,000, which has to be transferred to "B. V Reserve," the balance, Rs. 9,600, is sanctioned.

		Rs.
*A.	Public Works to be executed by D. P. W.	7,000
B.	Do Revenue Department..	4,600
	Total Rs. ...	11,600

14. *II. Repairs*—Out of Rs. 32,240, provided for works to be executed by the Public Works Department, the sum of Rs. 10,855 has to be transferred to "A. V Reserve." Excluding this item, the balance is Rs. 21,385, which does not include Rs. 3,960, the allowance for maintaining 44 miles of the "Bangalore-Mysore Road," whose transfer to Provincial is urged by the Local Fund Board. Pending the issue of final orders on the subject in the Public Works Department, the usual provision will be retained in the present Budget. It is presumed that the estimate includes the allowance for the maintenance of the roads payable to the Bangalore City Municipality under the Chief Engineer's Circulars of 1886 and 1889 quoted in para 11 *supra*. If so, the amount so included should be reported with a view to its being transferred to "IX Contributions, I Civil Charge."

		Rs.
A.	Works to be executed by P. W. D...	32,240
B.	Do Revenue Department...	1,000
	Total Rs. ...	33,240

15. *III. Establishments.*—The establishment charges proposed seem high as they amount to nearly 25·5 per cent of the provision made for works. They are, however, passed, subject to such reduction, as may be feasible, being effected.

16. *V. Reserve.*—The sums transferred in paras 13 and 14 *supra*, aggregating Rs. 12,855, will be included under this head.

		Rs.
A.	Public Works to be executed by D. P. W.	10,855
B.	Do Revenue Department ...	2,000
	Total Rs. ...	12,855

17. The following is an abstract of the Budget Estimates as now sanctioned, particulars of which will be found in the accompanying appendices :—

3. The Board note that the estimates are based on past year's collections; but are of opinion that owing to the impending famine, the income estimated may not be realized and that it would be safe to limit the expenditure to the amount of the probable revenue, leaving the balance untouched, to meet any deficit in the collections.

4. The Board accordingly proceed to consider the estimates of expenditure submitted by the Executive Engineer and the Amildars of Taluks for the coming year.

5. The Executive Engineer's statement (copy attached) showing the annual maintenance allowance for the District Fund Roads (measuring in all 410 miles) at Rs. 25,145 is sanctioned with an increase of Rs. 10 extra per mile or Rs. 200 for the whole line for the Closepet-Magadi road, as the traffic on it has increased.

6. The reserve grant of Rs. 10,855 against Rs. 12,055 for 1891-92 is also sanctioned.

7. The President remarked that the costly stone parapet now being put up to the Bidarkuppe Tank bund was a waste of money. A few crossings as proposed for Arlmallige Madure and Tanks in Dodballapur would have amply sufficed to ensure the safety of carts passing on the bund.

8. *Original Works.*—A provision of Rs. 3,000 to be made for opening the Kodihalli-Satnur road, the estimate for which was sanctioned in November 1891 and on which an outlay of about Rs. 2,000 has already been incurred. Similarly a provision of Rs. 2,000 to be made for opening out the Devangundi Railway feeder and for connecting it with the Hoskote-Malur road, the northern portion to be first put in hand and then the southern section to be taken up.

9. The Board consider that the present Hoskote-Jangamkote road passes through comparatively unfrequented tract and may be treated as a cart track for the future, the allotment for its maintenance being reduced.

10. The Hoskote-Sulebele road is more popular as it passes through populated villages and traffic even now with all the breaks and interruptions on the road prefers this to the Jangamkote road. The Sulebele road also passes along the bunds of valuable tanks and these will be incidentally strengthened by a good road being taken on them.

11. The Sulebele road may be extended and joined on to Jangamkote road. The country is easy for road making, and the work will improve this part of the Taluk in every way. The Board therefore resolve that a provision of Rs. 2,000 be made for this extension.

12. The usual provision of the Public Works Department establishmental cost of Rs. 10,000 per year, and of about Rs. 5,000 for Civil charges are passed.

13. The total grants will be as follows :—

		Rs.
Under "Repairs, communications"		37,200
Original works		12,000
Public Works Department Establishment charges		10,000
Civil charges		4,989
	Total Rs. ...	64,189
Estimated income for the year 1892-93		63,794
	Deficit ...	395

14. It will be seen that the fixed annual charges and the cost of the three small original works to be carried out by the Public Works Department have wholly swallowed up the estimated income, and there is a deficit of Rs. 395 to be made good from some other source.

15. There is no money for carrying out some of the very useful projects brought forward by the Amildars. The Board are unanimously of opinion that a strong appeal should be made to Government for an allotment of at least Rs. 20,000 from the Local Funds General for taking up some of the valuable works brought forward by the Amildars. The total cost of these is Rs. 46,997.

16. There is also no money available for starting the various petty improvements necessary for improving the health of villages, on which Government in para 3 of its Proceedings* lays so much stress.

*Proceedings No. 7259-66—L. 576, dated 25th September 1891.

17. In anticipation of such a grant from Government, the Board resolve to allot the following sums to each Taluk for effecting sanitary improvements in villages where they may be most urgently wanted, and for carrying out such other works out of those suggested by the Amildars as may be considered to be urgent by the President:—

	Rs.	
Bangalore Taluk...	3,500	
Closepet	2,500	(500 for Channapatna Sub-Taluk.)
Hoskote	1,500	
Anekal	2,500	(500 for sanitary improvements of Bannerghatta.)
Kankanhalli	1,500	
Magadi	2,000	
Nelamangala	1,500	
Dodballapur	2,500	
Devanhalli	2,500	
Total Rs. ...	20,000	

18. *Proposition I.*—The Board proceed to consider the first proposition, *i. e.*, filling up the vacancy caused by the death of Mr. Doddi Venkatramana Chetty. Names of 5 gentlemen, noted below, were proposed. At the suggestion of the President, the votes of the members present were taken; and the following is the result:—

Mr. A. Narainsami Mudaliar, B. A., secured ...	7 votes.
„ B. Ramaswamaiengar	5 „
„ Gangadhara Chetti	4 „
„ Vairagisetti Nanjundappa	1 „

None voted for Mr. Velu Mudaliar.

19. The Board accordingly resolve to submit the name of Mr. A. Narainsami Mudaliar, B. A., to Government, for nomination, as a member of the Board.

20. *Proposition II.*—The Executive Engineer's recommendation to appoint 4 watchmen for the 4 Inspection Lodges noted in the margin at Rs. 5 each is sanctioned. It would appear that hitherto the item was being met from the maintenance allowance of the District Fund roads.

Tavarekere, Magadi Taluk.
Kaglihalli, Kankanhalli do
Vadavatta, Closepet do
Hindignal, Hoskote do

21. *Proposition III.*—Resolved that Rs. 400 recommended by the Senior Surgeon for supply of furniture for Local Fund Dispensaries be allowed.

22. *Proposition IV.*—Regarding sanitation, one or two villages should be taken up at a time in each hobli, and their sanitation placed on a satisfactory footing with the help of the villagers and village servants. Any expenditure necessary may be met from the funds set apart for each taluk in para 17 of these Proceedings.

23. The first thing to do is to remove the manure pits from the heart or close neighbourhood of villages. Government waste should be selected at some distance from the villages, and the manure heaped so that it may not be in the direction of the prevailing winds. It should be deposited to the north-west or south-east of a village.

24. When no waste is available within a reasonable distance, the raiyats may be induced to deposit their manure in a portion of their own fields. When this cannot be managed, a field may be purchased by Government on payment of a reasonable compensation and the raiyats made to store the manure in portions to be allotted to them. A sum of Rs. 200 may be appropriated in each taluk for this purpose.

25. Another source of danger to health is the practice of burying and burning corpses in tank beds and near sources of water supply. For abating this nuisance and allotting lands for these purposes in distant unobjectionable places for each village, a sum of Rs. 100 will be set apart.

26. Next, attention should be given to levelling and draining streets in the larger villages. A sum of Rs. 100 is assigned for this purpose.

27. For planting of topes and removing prickly pear, &c., from the vicinity of villages, another sum of Rs. 50 is allotted per Taluk. Thus there is a total amount of Rs. 450 for each taluk, allotted for sanitary purposes. Sanitary works should receive prior consideration in expending the sums allotted to each taluk in para 17.

28. The improvements made by the Amildars under sanitation should be specially brought to the notice of Jamabandi Officers, who will inspect as many of these as possible and embody the result of their inspection in their annual Jamabandi reports.

29. With regard to the question of providing good drinking water to villagers, and of preserving existing wells from pollution, separate orders have been passed.

30. *Proposition V.*—Government Proceedings No. 6591-600—L. 451 of 10th September 1891, sanctioning Budget Estimates of the Local Funds General of the District for current year, are read and recorded.

31. *Proposition VI.*—Also Government Proceedings No. 7259-66—L. 576 of 25th September 1891, prescribing revised forms of accounts are read and recorded for guidance.

32. *Proposition VII.*—Read City Vice-President's letter No. 766-E-4, dated 13th October 1891, about the necessity for a road from Gavipuram to Rudraswami's Temple and promising to contribute ¼th cost from the City Municipal Funds.

33. The proposal of the City Municipal Board is accepted. A sum of Rs. 532 is sanctioned for the purpose. The work to be carried out by the City Municipal Agency.

34. *Proposition VIII.*—Yele Puttusami Chetti's petition dated 15th September 1891, about opening a road to Kadumalleswara Temple was read.

35. Resolved that as the want of the road is greatly felt, provision be made for it. It is estimated by the Amildar to cost about Rs. 2,000.

36. *Proposition IX.*—Read petition of Kodihalli villagers, received with Chief Secretary's Official Memo No. 52, dated 30th June 1891. The petitioners are stated by the Amildars of Kankanhalli to have no cause for complaint, as some good wells are stated to be in existence in the village.

37. *Proposition X.*—It was brought to the notice of the Board that there is no Accountant or Clerk allowed for checking and compiling the Local Fund accounts and for carrying on the correspondence in the Local Fund Department. The Statistical Clerk maintained from the Local Funds has more than enough of his own special work to do. The Proceedings of the Government No. 8196-206—L. 650, dated 29th October 1891, are read, and a provision of Rs. 30 per month is made for employing a Clerk for doing Local Fund work in the District Office.

38. *Proposition IX.*—Read Government Proceedings No. 6999-7008—Cir. 123, about supply of Amrut Mahal bulls for breeding purposes. Resolved that as the present season is unfavorable, the question of purchasing bulls be allowed to stand over for the present.

39. *Proposition XII.*—Read Government Proceedings No. 8170-8—L. 646, dated 28th October 1891, about the appointment of a special Engineer for Local Fund works with suitable establishment. Resolved that a separate report be submitted on the subject.

40. The Board, in conclusion, desire to remark that owing to paucity of funds, many very desirable works have had to be left out and that the cost of the annual maintenance of roads is very heavy in this District.

41. The Board would therefore request that Government may be pleased to transfer the Bangalore-Mysore road *viâ* Kankanhalli, to the Provincial Budget and thus relieve the District Funds to the extent of nearly Rs. 400 per annum. In anticipation of this concession, the Board have made provision for the [illegible] made under Propositions 2, 3, 7, 8 and 10 amounting in all to Rs. 3,532, otherwise will have to be met from any available balance which may be the credit of the District Funds in the year 1892-93.

the Maharaja of Mysore,
y 1892.

READ THE FOLLOWING PAPER :—

Report on the Operations of the Registration Department in Mysore for the year 1890-91.

No. 10710-1269, DATED BANGALORE, 5TH JANUARY 1891.

REVIEW THEREON.—The number of documents registered during the year under report was 30,118 as against 25,837 in the previous year, showing an increase of 4,281 documents. There has been a steady increase in the business of the Department during the past five years as shown below :—

	No. of Registrations.
1886-87	20,717
1887-88	22,318
1888-89	25,047
1889-90	25,837
1890-91	30,118

2. There has also been a corresponding increase in the receipts from registration and the surplus over expenditure as noted below :—

	Receipts.	Charges.	Surplus.
1886-87	55,098 11 7	24,998 0 0	30,100 11 2
1887-88	53,459 8 3	26,233 6 0	27,226 2 3
1888-89	56,581 3 10	29,357 13 11	27,233 5 11
1889-90	61,961 8 2	30,164 7 10	31,797 0 4
1890-91	66,261 14 0	33,256 5 11	33,005 8 1

3. The charges incurred have slightly arisen, but this was unavoidable owing to large amount of commissions drawn by Registration officers and to the payment of travelling and contingent expenses incurred by the Inspector General during his tour of inspection.

4. It is satisfactory to note that none of the Sub-Registry offices are worked at a loss.

5. Out of 30,118 registrations effected during the year, 17,848 related to immovable property, the registration of which was compulsory, and 11,299 to the same kind of property, the registration of which was optional. The number of documents relating to movables was 830. The number of wills registered was 140 and there was only one authority to adopt presented for registration.

6. The increase of registration was chiefly under the heads of "sales" and "mortgages," which represent, as in the previous year, between 88 and 89 per cent of the whole amount of registration work.

7. The aggregate value of property, both movable and immovable, transferred by registered documents was Rs. 76,62,935 against Rs. 87,08,590 as detailed below :—

	1889-90.	1890-91.	Difference.
Immovable property	83,38,823	72,28,034	—11,10,789
Movable property	3,69,767	4,34,901	+ 65,134

Total.....	87,08,590	76,62,935	—10,45,655

8. In 1889-90 there was an unusually large number of documents of the value of 20 lakhs of rupees relating to Gold Mines and Coffee Estates which tended to swell the value and, if that amount be excluded, the value of documents registered in the year under review would be found to be nearly the same as in the previous year.

9. Notwithstanding the increase in the number of documents registered, the aggregate value of each transaction relating to immovable property fell from 334 to 228, while that relating to movable property rose from 515 to 524. The average amount of fees for documents compulsorily registrable fell from Rs. 2—15—0 to Rs. 2—10—1 per document, while the fee for the documents optionally registrable slightly rose from 0—12—8 to 0—12—10 per document.

10. There were only two prosecutions under the provisions of Sections 81 and 82 of the Registration Act, one of which ended in the conviction of the Registration Gumasta of the Davangere Taluk. The other was, at the end of the year, pending disposal in the Chief Court.

11. Eighty-five documents against 73 in the previous year were impounded under the provisions of the Stamp Act and the amount of duty and penalty levied thereon were respectively Rs. 611—2—0 and 868—8—0.

12. Out of 30,118 documents registered, no less than 86 per cent thereof were registered within 2 days after presentation, 9 per cent within a week and the rest after a week. Prompt registration should be enforced in all cases so as to induce people to resort to registration freely, even as regards transactions the registration of which is optional.

13. The Government are glad to observe that, out of 86 Registry and Sub-Registry offices, no less than 65 were inspected during the year by District Registrars and Assistant Commissioners and 24 by the Inspector General.

14. The statements appended to the report have been prepared with reference to Act VIII of 1871, which has long since been repealed. The requisite corrections have been made in this Office and the Inspector General is requested to see that the statements are in future prepared in conformity with the forms as now revised.

Under-Secretary.

PART I.

GENERL.

Proceedings of the Government of His Highness the Maharaja of Mysore, (General),—dated 1st January 1892.

CAMP No. D. 67, DATED NAYAKANAHATTI, 1ST JANUARY 1892.

ORDER.—Some misapprehension appears to exist as to the right of landholders to construct *Sagavali Kattés* on their own lands. This right is not affected by—

(*a*) Section XX, Para 13 of the Rules under the Mysore Land Revenue Code, which relates to the construction of private tanks on Government *unoccupied* land,

or (*b*) Appendix F to the said Rules, which relates to the restoration by private individuals of Government tanks and wells long in desuetude.

2. Private individuals have the natural right to construct tanks on their own lands (Kandayam or Inam), so long as they do not thereby materially diminish the water flowing *in defined channels* through their lands for the benefit of Government works and private proprietors lower down such channels.

3. When a person wishes to construct a tank which will admittedly cause a material diminution of the flow of water *in defined channels* to the prejudice of Government tanks, the previous consent of Government has to be taken. But such consent is not necessary in the case of ordinary *Sagavali Kattés* properly so called. These *Kattés* are intended to intercept the natural drainage of the fields and thus to allow the soil to retain some moisture, which in many parts of the Maidan Districts is essential to bring dry crops to maturity. These *Kattés* are most useful in the Chitaldroog District, where the rain-fall is scanty and precarious, and where the scope for Government irrigation works is very limited. These *Sagavali Kattés* are merely bunds intended to intercept and retain surface drainage for the benefit of dry cultivation, and not irrigation tanks under which wet crops can or are intended to be raised.

4. The instructions contained in letter No. 244—1676, dated 10th July 1873, from the Public Works Department Secretary, Irrigation Branch, to the Commissioner of Nagar, placing certain restrictions on the construction of new *Sagavali Kattés* are hereby accordingly withdrawn.

5. The benefit of numerous *Sagavali Kattés* scattered over the dry taluks cannot be exaggerated and in an exceptional season like the present, dry crops can thrive only with their help. They are protective works of high importance and the Deputy Commissioners and Amildars should regard it as an important part of their duty to encourage by all means in their power the construction of as many new *Sagavali Kattés* as possible.

6. The Deputy Commissioner of Chitaldroog should at once make it widely known by means of Kanarese circulars largely circulated that the raiyats are at liberty to construct or repair *Sagavali Kattés* on their lands for intercepting and retaining the surface drainage, that the bunding up (without previous consent of Government) of defined water courses, for the purpose of direct irrigation from them, is alone prohibited, and that such prohibition does not apply to *Sagavali Kattés* intended to retain moisture and help dry cultivation.

7. The Deputy Commissioner should report by the end of this month and afterwards again on 31st March the number of new or restored *Sagavali Kattés* constructed under the orders now passed.

L. ANANTASWAMI RAO,
Under-Secretary.

To—The Deputy Commissioners of Districts.
The Secretary, Public Works Department.

Proceedings of the Government of His Highness the Maharaja of Mysore, (General),—dated 2nd January 1892.

CAMP No. D. 68, DATED CHALLAKERE, 2ND JANUARY 1892.

ORDER.—The Dewan considers it desirable that at all Taluk Head-Quarters and other places of importance which are not provided with Travellers' Bangalows or Inspection Lodges, Camping grounds should be selected. The sites should be upon high ground and carefully selected with due regard to the healthiness of the locality. A few trees may be planted on such sites and the whole maintained in good condition by the Taluk Revenue Authorities.

L. ANANTASWAMI RAO,
Under-Secretary.

To—The Deputy Commissioners of Districts.
The Secretary, Public Works Department.

Proceedings of the Government of His Highness the Maharaja of Mysore, (General),—dated 4th January 1892.

CAMP NO. D. 70, DATED PUBLIHALLI, THE 4TH JANUARY 1892.

ORDER.—The work required to be done in the Chitaldroog District during the next few months has been carefully investigated.

2. In appended Schedule A are entered all tanks to which earth-work, as specified, should be done by the Revenue Department through the agency of village officers, on the principles laid down in the Dewan's D. P. W. Memoranda, Camp Nos. D. 26 and D. 27, dated the 12th and 13th December 1891, respectively. The Public Works Department will at once put down grade stones and otherwise indicate to the Revenue authorities the earth-work to be done in the case of each work, and submit for formal sanction an estimate, in a tabular form, showing the name of each work, and the quantity and probable cost of the earth-work in each. Pending sanction of such an estimate, the sums shown in column 4 of Schedule A, amounting to a total of Rs. 37,400, are sanctioned for expenditure by the Revenue Department in supersession of the sanction of Rs. 5,000 for such works contained in Order Camp No. D. 33, dated 15th December 1891.

3. In Schedule B are entered certain roads which require improvement or whose construction is highly desirable. In the case of the new roads entered in this Schedule, the Department of Public Works will at once mark the best alignment upon the ground by lockspitting the centre line and marking the distance in furlongs and miles. In the case of the Challakere-Pavagada and Sokke-Lakkampur roads, which have been abandoned for some years past, the improvement provided for in the Schedule B will consist of clearing and re-excavating where necessary the side and shoulder drains and re-forming the portions of the road where its formation has been destroyed. The Executive Engineer will at once furnish the Deputy Commissioner with a statement containing a detailed specification of the work as above required to these roads.

4. The earth-work to roads as entered in Schedule B, amounting to a total of Rs. 7,560, is also sanctioned for execution by the Revenue Department through the agency of village officers on the principles laid down in the Dewan's D. P. W. Memoranda Camp Nos. D. 26 and D. 27, dated the 12th and 13th December 1891.

5. Schedules C and D contain a list of earth-work on tank projects already sanctioned or awaiting sanction in the Department of Public Works. These works should be carried out by the Department of Public Works, as an expansion of the ordinary D. P. W. Programme of works for the District, taking care however that no work is dealt with as regards earth-work by both the Revenue and Public Works Departments at one and the same time.

6. In carrying out the above works (whether in the Public Works or Revenue Department) local labor should alone be employed. It is understood that on D. P. W. works in progress, only local labor (chiefly that of Lambanis and Waddars) is now employed, except in Holalkere Taluk where certain Waddar gangs from the Bellary side are working. The men thus on work should not of course be discontinued.

7. The cost of works as above (which are most suitable for agricultural laborers) amounts to—

To be done by Revenue Department through village officers ...	...	44,960
To be done by the D. P. W.	...	1,09,934
	Total Rs.....	1,54,894

8. In addition to these sums, Rs. 12,066 have already been sanctioned for drinking water wells and Rs. 40,000 as advances for Irrigation wells, and their Talukwar distribution is given in Schedule E appended.

9. In regard to drinking water wells, the Deputy Commissioner asks for an additional grant of Rs. 5,000. This amount is sanctioned from Local Funds General, in addition to the sanction recorded in Para 4 of Order Camp No. D. 6-11, dated 7th December 1891.

10. As the demand in this District for Drinking water wells and for new Irrigation wells and the deepening of old Irrigation wells is very great and the present season is most suitable for executing such works, the Government will be prepared to grant additional sanctions as follows by the end of February next:— Rs. 5,000 for Drinking water wells upon the application of the Deputy Commissioner, Rs. 40,000 for Irrigation wells (both old and new) upon the application of Mr. B. G. Krishnaiengar when he returns to this District.

11. By a separate order of this date, Rs. 20,000 have been sanctioned from the General State Revenue for Saguvali Kattés in this District.

12. The provision for work in this District made as per the foregoing paragraphs is as follows:—

No.	Name of Taluk.	Population.	*Schedule A.* Earthwork for tank improvement through Revenue agency sanctioned.	*Schedule B.* Earthwork for new roads, through Revenue agency.		*Schedules C. and D.* Earthwork for tank improvements through D. Proceedings of the Government of His Highness the Maharaja of Mysore, (General),—dated 4th January 1892.

13. Upon a careful estimate of the number of people likely to seek work, the Dewan is of opinion that the maximum monthly payment on account of wages required in the District during the next six months would be somewhat as follows:—

	Rs.
In January	10,000
„ February	10,000
„ March	15,000
„ April	25,000
„ May	30,000
„ June	40,000
	1,30,000

14. The total expenditure till end of June is thus not likely to exceed Rs. 1,30,000, but it will be seen from para 12 above that a provision of over Rs. 2,76,000 has been made.

15. The Deputy Commissioner must clearly understand that he is not bound to accept or adhere to the estimate of monthly expenditure given in the last preceding para, but that it is his duty to have carried out, *to the extent to which there may be demand for employment*, the whole sanctioned works though they may be finished much sooner than is anticipated. He must distinctly understand that upon him rests the entire responsibility to provide work for every one needing it in his District and at the same time to ensure a fair return for the sanctioned expenditure.

Proceedings of the Government of His Highness the Maharaja of Mysore, (General),—dated 4th January 1892.

The 4th January 1892.

No. D. 70 A.—The following rules framed by the Government of Mysore for the grant of loans under the Land Improvement Loans Regulation No. IV of 1890 are published for information and guidance :—

1. Applications for loans may be made to any Revenue Officer of or above the rank of Amildar or Deputy Amildar, and shall contain the particulars specified in Form A appended and be signed by the applicant.

It shall be the duty of every Shanbhog, if so desired by any applicant, to prepare such applications without fee or charge of any kind.

If, however, an oral application be made, the officer to whom it is preferred shall cause it to be recorded in the prescribed form and signed by the applicant.

2. The personal attendance of the applicant is not necessary to present an application, but he may be required at any time to appear in person or by duly authorized agent at his option, and in case of default, the application may be rejected.

3. If the market value of the land to be benefited exceeds by one-fourth, the amount of the loan applied for, no collateral security need be offered ; if it does not so exceed, collateral security shall be offered as described fully in columns 15 to 24 of Form A.

" Collateral Security " is land other than the land to be benefited, either belonging to the applicant and offered by him as security, or belonging to others who offer it as security for the loan to the applicant.

4. The application shall state in the column of remarks in Form A :—

(i.) Whether the applicant proposes to supplement the loan by any private capital, and if so, to what extent.

(ii.) The estimated total cost of the proposed work and the probable period that will be occupied in its construction.

(iii.) The advantages expected to result from the work.

(iv.) The manner and extent to which the proposed work will affect (favorably or injuriously) adjoining or other lands.

When the foregoing particulars are not entered in the application, the officer to whom it is presented shall ascertain them so far as may be possible from the oral statements of the applicant or otherwise, record them on the application or on a paper to be attached thereto, and have them read over to the applicant and acknowledged by him to be correct.

5. The particulars of the land to be benefited or offered as collateral security, the applicant's and surety's rights or interests in the same and encumbrances, if any, upon such rights or interests shall at once be tested, as far as may be possible, by reference to such records bearing upon them as may be accessible to the officer to whom the application is made.

6. The officer receiving the application shall, after seeing that it contains all necessary particulars and after holding a local enquiry if he is required to hold one by the general orders of the Deputy Commissioner, forward it to the Deputy Commissioner. If the Deputy Commissioner considers that there is *primâ facie* reason to believe that the application should be granted, he shall cause it to be entered in a register, and shall order a local inquiry to be made, if one has not already been made by the officer receiving it under the general orders of the Deputy Commissioner. If the Deputy Commissioner is of opinion that the application should not be granted, he shall reject it.

7. No loan shall be granted without a local inquiry. Except when the Deputy Commissioner for any special reason otherwise directs, the local inquiry shall be conducted by an officer of not lower rank than that of an Assistant Commissioner, when the amount of the proposed loan exceeds Rs. 200, and by the Amildar or Deputy Amildar when it does not exceed that amount.

8. The officer making such inquiry shall, at least one week prior to the date on which he proposes to hold the same, post up in some conspicuous place in the village in which the land to be benefited by the proposed work is situated, a notice setting forth briefly the nature of the loan applied for and the date on which he proposes to hold an inquiry on the spot as to the correctness of the facts alleged in the application. The person charged with posting such notice shall return the duplicate thereof to the officer who issued it, after obtaining the signature of the village officers in token of due publicity having been given thereto.

No fee shall be charged for service of the notices referred to in this rule.

9. On the day fixed by the notice or on that to which the inquiry may have been postponed by subsequent notice, the officer charged with the duty of inquiring shall proceed to the village and after assembling the parties concerned, the local officials and some of the respectable agriculturists of the place, shall proceed to examine the site of the proposed work for the purpose of satisfying himself that the improvement is not likely, so far as can be ascertained, to injure any public or private interests; he shall test the accuracy of each of the statements set forth in the application and shall ascertain and record everything that may be necessary to enable the authority who is to dispose of it to arrive at a correct decision. He will specially take note of all objections to the proposed work and of all evidence bearing on such objections.

10. Attention should be particularly directed to ascertain the *bonâ fides* and solvency of the applicant and the sufficiency of the collateral security, if any, offered; careful inquiry must be made regarding the rights of the parties in the land to be improved and the land offered as collateral security, in view to ensuring that the said lands are free from encumbrances, or are not burdened with arrears of land revenue, or are not already hypothecated to Government for a loan previously obtained. The applicant for the loan should be the registered holder of the land to be improved, and applications from mortgagees and tenants, though in possession, should not be complied with. In the case of land offered as collateral security, care must be taken to ascertain that the person offering it as security is not only the registered holder, but the real owner, and that, if he has an undivided interest in it, the property is not charged with a loan under these rules beyond the extent of his own individual interest therein, excepting with the written consent of the joint owners.

11. Deputy Commissioners are authorized to sanction loans not exceeding Rs. 500 on their own authority. All loans exceeding that amount require the sanction of Government.

12. When the work to be undertaken is one requiring professional skill, the applicant may be required to submit to the officer making the local inquiry an accurate plan, specification and estimate for the work. If the applicant is unable to furnish such plan, estimate or specification, the Deputy Commissioner may cause them to be prepared on behalf of the applicant, first requiring him to deposit such sum of money as may be sufficient to cover the cost, or, if he thinks fit, calling upon him to give security for the repayment of the same.

13. When the proposed loan exceeds Rs. 500, the Deputy Commissioner shall obtain from the Executive Engineer an opinion as to the feasibility, probable cost and merits generally, from a professional point of view, of the proposed work; in any other case, it shall be competent to the officer dealing with the application to call for similar professional opinion, should necessity appear.

14. On the completion of the inquiry, the officer by whom it was made shall forward to the Deputy Commissioner the whole of the papers connected therewith together with his own opinion and recommendation. If the Deputy Commissioner,

on receipt of the papers, thinks further inquiry necessary, he may either make such inquiry himself or remand the case to the officer who made the first inquiry, or transfer it to any other officer authorized to conduct such inquiries for the purpose of a further investigation being made.

15. If, on a review of the local inquiry and such further investigation as may be deemed necessary, the Deputy Commissioner is satisfied that a loan may be granted, he shall record a decision to the effect that the loan asked for or a less sum may be given, and shall then at once issue an order granting the loan, provided the loan granted does not exceed Rs. 500.

16. If the amount of the loan exceeds Rs. 500, the record shall, with the Deputy Commissioner's opinion, be forwarded to Government, who will either sanction the loan or refuse it, or direct further inquiry to be made, if they think it to do so. On receipt of orders sanctioning the loan, the Deputy Commissioner shall issue an order granting it.

17. When the Deputy Commissioner rejects the application for a loan within his power to grant, his decision shall be subject to appeal to the Government, who may disallow the rejection and direct the loan.

18. It shall be competent to the Government to call for the record in any case and to pass such orders thereon as they may deem proper.

19. When an order granting the loan is passed, it shall be endorsed by the applicant to the effect that he has understood, and agreed to, all the terms, and it shall be signed by him in the presence of, and shall be attested by, two witnesses; if any property other than the property of the applicant is pledged or mortgaged as collateral security for the repayment of the loan, the order shall be similarly endorsed, signed and attested by the sureties and witnesses.

20. The order granting the loan shall be in Form B hereto annexed. It shall be retained in the office of the Deputy Commissioner, one copy of it shall be given to the applicant and another copy shall be recorded in the Cutcherry of the Taluk in which the land to be improved is situated, and when the loan is made payable at any other Taluk, another copy shall also be sent to the Amildar of such Taluk.

21. The security bond to be executed by a surety, if any, shall be in Form C hereto annexed.

22. The order granting a loan may, in exceptional cases, direct the whole amount of the loan to be paid in one lump to the borrower. Ordinarily, the order shall direct the loan to be paid in such instalments as the Deputy Commissioner may decide to be suitable. When any such instalment has, in whole or to the extent of 75 per cent of it, been expended, the next instalment shall be paid.

23. No loan shall be given unless the market value of the land to be benefited, either by itself or with the security offered, exceeds, by at least one-fourth, the amount of the loan.

24. Interest will be charged on loans at the rate of 6 per cent per annum. If the Deputy Commissioner considers that in special cases the loan should be granted at a lower rate of interest or without interest, he should report such cases for the orders of Government, explaining the grounds of his recommendation.

25. When the loan is paid to the borrower in instalments,

(*a*). If the interval between the first and last such instalments as actually paid does not exceed 6 months and if the amount of the loan does not exceed Rs. 1,000, interest shall be charged on the loan only from the date of actual payment of the last instalment, none being charged on previous instalments.

(*b*). In all other cases, interest on the instalments except the last shall be charged from the respective dates of their payment, and recovered from the borrower on the date of the payment to him of the last instalment.

26. The loan with interest from the date fixed as per last preceding rule shall be repaid by the borrower by means of fixed annual payments. The number and amounts of such payments shall be determined by the Deputy Commissioner with reference to the convenience of the applicant and the necessities of the case, but so as not to exceed the maximum limits specified below :—

	Maximum Period. Years.
For loans up to Rs. 500 ..	10
Do from Rs. 500 to Rs. 1,000	15
Do Rs. 1,000 and upwards	20

If, in any special case, a longer period for repayment is desirable, the special sanction of Government shall be obtained on a full report of the circumstances of the case.

27. The Deputy Commissioner may, in his discretion, either —

(*a*) fix the amount of each payment to be a specified fraction of the principal amount of the loan, together with the *whole* of the interest on the balance, for the time being, of such principal amount ;

or (*b*) make each payment to be an annuity calculated according to the Table E, appended to these rules.

28. Repayment of loan by means of annual payments fixed under the last two preceding rules may, if the Deputy Commissioner so directs, commence at the end of the 2nd year from the date from which interest is calculable under Rule 25 ; but, if, in any special case, the Deputy Commissioner considers that the work for which the loan is given is such that a longer time must elapse before it yields a return, a longer interval not exceeding five years in any case may be allowed for the commencement of the repayment. If, under this rule, the Deputy Commissioner allows an interval of two or more years for the commencement of repayment, the annual interest on the whole of the loan shall be paid at the end of each year of such interval, excepting the last of such years, at the end of which shall be paid the first payment towards repayment.

Example.—Suppose the amount of the loan is Rs. 400, and the rate of interest 6 per cent, and the loan is paid to the borrower in instalments as follows :—Rs. 100 on 1st January 1892, Rs. 100 on 1st February 1892, Rs. 100 on 1st March 1892 and Rs. 100 on 1st April 1892, and suppose also that the Deputy Commissioner allows an interval of five years for the commencement of the repayment, and directs that the repayment shall be in 10 years by means of annuities. Then, under Rule 25, interest is chargeable on the loan only from 1st April 1892, and the borrower shall pay as interest on the whole loan under Rule 28, for the years of the five years' interval, *excepting the last*, as follows :—

	Rs.
On 1st April 1893	24.
On 1st April 1894	24.
On 1st April 1895	24.
On 1st April 1896	24.

The repayment will commence on 1st April 1897. The annual payment towards such repayment under Table E will be 4 × 13·586 = Rs. 54—5—6. The first of such annual payments must be made on 1st April 1897, and the tenth and last annual payment will extinguish the loan on 1st April 1906.

29. All repayments shall ordinarily be made at the Treasury of the Taluk in which the land to be improved is situated. But the Deputy Commissioner may, if he sees fit, authorize repayment at any other Government Treasury within the District. The Amildar and the Deputy Amildar, if any, shall keep a register of loans and repayments in Form D appended.

30. When repayments at any other Treasury than that of the Taluk in which the land to be improved is situated are allowed, the Treasury Officer receiving payment shall give information thereof to the Amildar of such Taluk in view to such payment being noted in his register.

31. Instalments of loans and interest due thereon may be suspended on proof of failure of crops or other exceptional calamity, but in all such cases, the Deputy Commissioner shall report the case to Government, who will pass such orders on the case as they may deem proper. In urgent cases, the Deputy Commissioner may order suspension in anticipation of sanction of Government.

32. Subject to the orders of the Government, the Deputy Commissioner shall make provision for the proper inspection of works in course of construction for which loans have been made, and for ascertaining and ensuring that such loans are duly applied to the purpose for which they are made. All works for which loans are made in a lump sum shall be inspected and reported on as soon as possible after the date on which their completion is directed in the order granting the loan. All works for which loans are made by instalments shall be inspected and reported upon before each instalment subsequent to the first is paid.

33. The works and any accounts kept of the disbursements upon them shall be at all times open to the inspection of the Deputy Commissioner or other person authorized by him in that behalf. In the case of loans exceeding Rs. 5,000, the accounts shall be kept by the borrower in any form that the Deputy Commissioner may prescribe.

34. If, at any time, the Deputy Commissioner is satisfied that any person who has received a loan has failed to perform any of the conditions on which it was made, he may, after recording in writing the grounds for the decision he has arrived at, proceed to recover forthwith from such person or from any surety of such person under the provisions of the Regulation, any sums which remain due together with any interest payable thereon and costs, as arrears of land revenue.

35. The Government will inform Deputy Commissioners what amounts will be placed at their disposal for loans under the Regulation for each year. Deputy Commissioners will at their discretion distribute the amount among the several Taluks of their Districts and will have the power of transferring sums assigned from one Taluk to another. But expenditure within the District must be kept within the amount allotted. If an additional grant be required for the District, it should be applied for.

36. The Government may, in the case of improvements of a specified kind or kinds, pass special rules for the grant of loans for them, and except to the extent expressly provided for by such special rules, these rules shall apply to the grant and recovery of all such loans.

Proceedings of the Government of His Highness the Maharaja of Mysore, (General),—dated 4th January 1892.

The 4th January 1892.

No. D. 70 B—The following special rules for granting loans for the construction and improvement of Sagavali Kattés are published for information and guidance :—

1. These special rules shall be read in continuation of the rules framed under the Agricultural Improvements Loans Regulation and published under Notification No. D. 70 A, dated 4th January 1892. They shall extend to all those parts of the State where black cotton soil or other lands suitable for the construction of Sagavali Kattés exist.

2. Sagavali Kattés are "Vaddus" or dams put up for arresting surface water in order to increase the moisture in the beds of such Kattés to allow of their being cultivated and sown with javari, wheat, Bengal-gram, cotton, &c. Such Sagavali Kattés are hereby declared to be land improvements within the meaning of the Land Improvement Loans Regulation.

3. These rules shall apply to the construction of new Sagavali Kattés, as well as for the improvement of existing ones, and the restoration of breached ones.

4. No single loan under these rules for a new Katté shall ordinarily exceed the sum of Rs. 300, but in exceptional cases, the Deputy Commissioner may sanction one up to Rs. 500. The loan for the improvement or restoration of an existing Katté shall not ordinarily exceed Rs. 50, but may, in special cases, amount to Rs. 100.

5. The construction, restoration or repair, as the case may be, of the Katté in respect of which a loan is obtained under these rules, shall be commenced within 15 days, and completed within six months, after the loan is received. The Deputy Commissioner, however, may, on satisfactory grounds being shown for it, extend the time for the commencement or completion of the work to such period as he may deem proper, not exceeding one year.

6. The rate of interest chargeable on such loans shall be 4 per cent per annum.

7. In all matters not specially provided for by these rules, the rules in Notification No. D. 70 A, dated 4th January 1892, shall be followed.

"By Order,"
T. ANANDA RAO,
Chief Secretary.

Camp No. D. 73. Dated 7th January 1892.

His Highness the Maharaja is pleased to direct that the Savars of the Silahdar Regiments below the rank of Commissioned Officer be allowed compensation batta on account of dearness of horse-gram at the following rates for a period of four months from the 1st December 1891.

When the selling rate of horse-gram falls below a minimum rate of 16 seers per rupee, the batta shall be computed at the difference between that rate and the average selling rate during the month as certified to by the Deputy Commissioner of the District, the allowance to each Savar being taken at 3 seers per diem.

By Order,
T. ANANDA ROW,
Chief Secretary.

Proceedings of the Government of His Highness the Maharaja of Mysore, (General),—dated 4th January 1892.

CAMP No. D. 70 C., DATED PUBLEHALLI, 4TH JANUARY 1892.

ORDER.—For the purpose of advances for Sagavali Kattés in the Chitaldroog District, under the Rules sanctioned in Notification No. 70 B of this date, a sum of Rs. 20,000 will be placed at once at the disposal of the Deputy Commissioner from the General State Revenue. The advances should be given where they will at once be worked out for the benefit of local laboring classes and where such relief would be most useful for the present season. The Deputy Commissioner will submit, as early as possible, lists showing Talukwar distribution of the advances given. Any reasonable additional amount required for this purpose will be sanctioned upon the application of the Deputy Commissioner.

No advances out of the amount now sanctioned shall be given after the 31st March 1892, without the special order of Government.

The conditions as to the punctual commencement and execution of the works as laid down in the Rules should be strictly enforced.

L. ANANTASWAMI RAO,
Under-Secretary.

The Comptroller.

READ the following extract from a Memorandum dated 13th January 1892 submitted by Mr. V. P. Madhava Rao, Deputy Commissioner, Bangalore District.

2. The question of relief to weavers is one that presses for immediate solution. The orders of Government regarding purchase of cloths at 75 per cent of the market value would not, I fear, give the needed relief. The 75 per cent will hardly cover the cost of materials used in the weaving, and will leave nothing for the labor. I had a meeting of the principal Rate-payers and representative *Sahukars* and weavers convened at my place on the 10th instant. The opinion was that it would be inconvenient for Government to make advances either of thread or of money. It is a task of extreme difficulty to select deserving men for relief, and to recover the advances made. The present suffering arises from the demand for cloths being slack. The practice is for *Dalals*, to purchase cloths each evening and sell them to outsiders. The demand being slack, the Sahukars are slow to purchase. The best arrangement will be for Government to step in and purchase cloths at market value and re-sell them when there is demand. But, for this there must be a trustworthy agency to advise Government regarding the value of cloths. Two or three Sahukars were consulted. They are willing to devote some time to this, but fear that their trade will suffer, if this has to be continued over any length of time. It was then proposed that they might be allowed some commission on their transactions. They agree to devote three hours every day on this understanding. It was resolved that they should get 1 per cent on every purchase, and 1 per cent on re-sale of cloths. They will execute a Mutchalika to Government to the effect that Government will get back the full value of the cloths purchased through their agency. The weavers also agree that this will be a satisfactory arrangement. It is not expected that the cloths will be long on the hands of Government. They will be re-sold by the commission agents who are Dalals for the Malnad and other merchants, whenever there is demand for them. The cloths will be stored in the old Hospital building in the Fort and kept on racks which are being got ready and will be guarded by the Police or by Municipal servants. The City Amildar, with the commission agent, will make the purchase each day between 2 and 5 P. M. A book will be opened showing the cloths purchased through each commission agent, and against the entry will be shown the sale of the cloth and the date of sale. Each month, the entries will be totalled and the commission earned paid to the agent.

3. The weavers and Sahukars estimate the daily purchases at 1,000 to 1,500 Rs. worth of cloth, but it is proposed to restrict purchases to Rs. 500 worth each day, the value of each cloth not to exceed Rs. 10. Assuming that the transaction would extend over 6 months, the total sum spent on purchases of cloths will be Rs. 90,000, but as the commission agents, who are men of means, have guaranteed Government the full value of the cloths purchased, the only loss suffered by Government will be the 2 per cent commission, which will be only Rs. 1,800 for 6 months. The cloths also will be security for the money and will not be parted with, until their value is paid. The Rs. 1,800 above specified cannot be a large sum to spend, when it is considered that it will afford real and much needed and suitable relief to about 4,000 looms, and 10,000 weavers and those employed in industries dependent on them. Under this arrangement, there will be no necessity for making advances to weavers. This will be arranged by the Sahukars themselves as usual.

4. Since making these arrangements, I had a meeting convened at Dodballapur, where there are nearly 700 looms. After discussing the details of relief with the Sahukars and weavers, the men there arrived at precisely the same conclusion as the Sahukars and weavers at Bangalore. The meeting at Dodballapur was held on the 11th, the meeting at Bangalore being on the 10th, and the men at Dodballapur did not know the understanding come to in Bangalore. The Dalals there, however, will be content with a commission of 9 annas per 100 Rs. on purchase, and 1 rupee on re-sale. They expect the cloths will not long be on the hands of Government. The maximum value per cloth there will be Rs. 7, and the total value of purchase per day Rs. 200 or even less. The commission agents are well-to-do Sahukars and their security is perfectly reliable. There are about 20 houses of gunny bag makers, but there are no fibre plants grown this year, nor water to soak them in. These men must earn cooly on the Sivapur Tank within 2 miles off Dodballapur.

5. I solicit sanction for Rs. 100 to repair wooden racks already in the charge of the Municipality at Bangalore, and to the entertainment of a Clerk on Rs. 20 per month for keeping accounts of cloths purchased, and 2 Peons on Rs. 6 each, for storing the cloths, and contingencies, Rs. 10 per month.

6. Similarly, for Dodballapur, Rs. 100 for stands, a Clerk on Rs. 12, a Peon on Rs. 5, and contingencies Rs. 5.

7. Similar relief will be required in Anekal, Sarjapur and Domsandra and other places, and for these I shall submit separate proposals.

8. I may note that Cumbly weavers and coarse cotton cloth weavers (most of whom are Holiyas) will be provided for in this arrangement.

No. D. 81, DATED BANGALORE, 14TH JANUARY 1892.

ORDER THEREON.—The arrangement herein proposed for the relief of weavers at Bangalore and Dodballapur commends itself to Government as practical and satisfactory.

2. A permanent advance for purchase of cloths in the Bangalore and Dodballapur Taluks is sanctioned as follows:—

Rs. 30,000 for Bangalore Taluk.
Rs. 9,000 for Dodballapur Taluk.

3. From these amounts, daily purchases will be made in the way proposed by Mr. Madhava Rao, and the permanent advance re-imbursed by sales as they take place from time to time.

Proceedings of the Government of His Highness the Maharaja of Mysore, (General),—dated 14th January 1892.

4. The proposed temporary establishment as per details in the margin is sanctioned. The repair of wooden racks in the charge of the Municipality of Bangalore at a cost of Rs. 100 and the purchase of stands at Rs. 100 for Dodballapur are also sanctioned.

Bangalore Taluk—	Rs.
1e Clerk on Rs. 20 per month	... 20
2o Peons on Rs. 6 each per month.	12
ntingencies Rs. 10 per month	... 10
Total Rs.	...42 per month.

For Dodballapur Taluk—		Rs.
A Clerk on	...	... 12
A Peon on	...	... 5
Contingencies	...	... 5
Total Rs.		.....22 per month.

5. The arrangement must be discontinued when the necessity for it ceases, and subject to this condition, it is sanctioned for a maximum period of 6 months from this day.

6. Copies of these papers will be communicated to other Deputy Commissioners in order to enable them to adopt similar arrangements wherever necessary. It seems specially suitable for Molakalmuru weavers, whose case came recently before the Dewan.

Circular No. 1.

MYSORE PUBLIC WORKS DEPARTMENT.
CENTRAL OFFICE.
Dated Bangalore, 6th January 1892.

From

The Chief Engineer of Mysore.

To

The Executive Engineer, Mysore Division.
Do Channels Division.
Do Special Improvements Division
Do Hassan do
Do Kadur do
Do Shimoga do

Note.

The officers of the Department are doubtless aware that the prices of food grains have, in parts of the Province, reached so high a figure that, with the aggravation of a bad harvest, distress of a somewhat severe form is likely to supervene ere long in the northern and north-eastern taluks of the Province. Such distress will, at first, be sufficiently met by village relief works now being started under Civil Officers, but in a short lapse of time, it is possible that the demand for work on the part of the laboring population may exceed the work available on village minor tanks. In this case, it will obviously be necessary for the Public Works Department to enlarge its operations in the affected parts, and to do this effectively, so as to afford suitable relief work on a large scale, the establishments in the Chitaldroog, Tumkur and Kolar Districts are short-handed.

The Executive Engineers are further aware that we have no reserves of either officers or subordinates to fall back on in cases of emergency, that we cannot look for efficient help outside the Province, and therefore it may become imperative to strengthen the establishment in those Divisions which come within the affected zone by making drafts on the Divisions in which no extension of works is called for—at all events, for the present.

The Executive Engineers of the Divisions which come under the latter category are therefore warned to be prepared for any demand that may have to be made on their establishments in the course of the next few months. Such a demand will not be made unless urgent need occurs, but, when it is made, they will be expected to give up readily all the hands they can possibly spare.

Proceedings of the Government of His Highness the Maharaja of Mysore, (General),—dated 18th January 1892.

With this object, I must ask them to carefully review during the next few weeks their absolute requirements, and consider what members—Assistant Engineers and Subordinates—they can spare without obvious detriment to works, and they should, on the 30th January, report definitely what hands they can dispense with *temporarily*.

Under the circumstances, it will be desirable to stop all surveys and the preparation of projects, confining progress to works already in hand, and to such road and other repairs as cannot be postponed till better times. Hands that would otherwise be occupied on such projects and surveys will thus be released, and the supervision of work in progress should be reduced to the narrowest limits compatible with efficiency, so as to release Lower Subordinates and Taluk Mestris.

This call will not apply to the Nagamangala portion of the Mysore Division, which has itself to meet the demand for more extended public works; nor perhaps to the Channarayapatna and Arsikere tracts of Hassan, and the Channagiri Taluk of Shimoga. Executive Engineers will use their discretion in drawing the line beyond which their establishment cannot possibly be reduced even for a short period.

It is quite possible that no indent will have to be made, but should the necessity unfortunately arise, the Executive Engineers, to whom this Circular Note is addressed must be prepared to comply with it at short notice.

CAMP NO. D. 83, DATED, CHIKBALLAPUR, 18TH JANUARY 1892.

ORDER THEREON.—The instructions issued by the Chief Engineer in the above are very suitable and are approved. But Mandya and Malvalli should be added to Nagamangala as Taluks of the Mysore District, from which no Public Works Subordinates will be withdrawn.

The Deputy Commissioners of Districts.

CAMP NO. D. 84, DATED CHIKBALLAPUR, 19TH JANUARY 1892.

ORDER.—In some parts of the Maidan Taluks, tank beds, which are dry, have not been cultivated to the extent they could have been, in the present season, with the discretion vested in Revenue Officers to resort to the *Batayi* system, where necessary. Even now it is possible to raise some quick growing dry crops on small portions of tank beds which are quite dry, by digging temporary wells or water holes in them. In this way, some crop can always be raised even when there is not in the soil moisture sufficient for cultivation in the ordinary way. Where such wells have to be dug and water for cultivation has to be lifted therefrom, the Deputy Commissioners should grant specially liberal terms on the Batayi system, making the raiyat's share of the grain produced as large as may be necessary, say, from $\frac{4}{5}$ths to $\frac{7}{8}$ths, or even higher, besides giving him the whole of the straw.

2. Where raiyats refuse to cultivate tank beds even on such liberal terms, the local officers should have them cultivated by *Amani*, wherever the ordinary agricultural laborers stand in need of employment. The digging of holes, the lifting of water and the cultivation by this means of dry tank beds will be most suitable as relief works near villages, and the Deputy Commissioners should organize them without loss of time, where the conditions indicate their need.

3. The great object of Government is to cause the production, during the present season, of as much fodder and food as possible. The proper utilization of the dry tank beds will go a great way towards the realization of this object. Deputy Commissioners are therefore requested to give their earnest and immediate attention to these instructions.

Letter No. 2723—645, dated 31st December 1891, from the Deputy Commissioner of the Kolar District, stating that the sum of Rs. 30,000 sanctioned for Irrigation wells in Proceedings No. 9798-803—Cir. 157, dated 12th December 1891, is insufficient and asking for a further grant of Rs. 50,000 for the purpose.

CAMP No. D. 85, DATED CHIKBALLAPUR, 19TH JANUARY 1892.

ORDER THEREON.—A sum of Rs. 20,000 is sanctioned for the Kolar District in addition to Rs. 30,000 already given.

2. In this as well as in other Districts, the advances should be granted in localities where the wells promise to be *permanently* useful for irrigation, and not where the supply of water in wells is known to decrease after a few years, thereby necessitating either the deepening of the old wells or the sinking of new wells in new positions. The wells in such cases are not generally faced with stones, and cost only a few rupees and do not require for their excavation the help of Government loans.

3. Loans for deepening or otherwise repairing old wells may be granted under the rules in accordance with the instructions already issued for the Chitaldroog District. Where the lower part of the well is through soft rock as is the case in several localities (*e. g.*, Challakere and Bagepalli), the deepening can be readily effected without dismantling the existing work, and the raiyats may be given such loans as may really be required. Where wells have been faced with stones, the deepening becomes very costly, and a raiyat, if he were spending his own money, would generally prefer making new wells to deepening the old ones. This point should be duly remembered by officers entrusted with the granting of loans.

4. Where rock is not met with, the use of galvanized iron rings would, in some cases, be cheaper than stone facing, and facilities and encouragement should be given to raiyats wishing to use such iron rings in suitable localities, and the amount of loans should also be regulated accordingly.

CAMP No. D. 95, DATED CHINTAMANI, 21ST JANUARY 1892.

ORDER.—In the Dewan's D. P. W. Memorandum No. D. 26, dated 12th December 1891, a programme of village tank works in the Kolar District, estimated to cost Rs. 55,445, was sanctioned, and an immediate allotment of Rs. 8,500 was made for the commencement of such works.

2. Subsequently, a further allotment of Rs. 6,500 was made for the same purpose.

3. The Deputy Commissioner of Kolar has opened some village tank works and asks for a further allotment to enable him to start more works in the affected parts of his District. A further sum of Rs. 20,000 is accordingly placed at the Deputy Commissioner's disposal, out of the aggregate sum of Rs. 55,445 referred to above. The total allotment, including the one now ordered, amounts to Rs. 35,000.

CAMP No. D. 96, DATED CHINTAMANI, 21ST JANUARY 1892.

ORDER.—The collection of Tangadi bark on Government lands appears to be a very suitable kind of work for the landless classes in this season, especially for the Madigars and Holiyars and the Toti and Talari classes, whose condition deserves the first attention of the Government in the present season. This work is more popular with them than tank works on which they are unwilling to seek employment. The supervision of the work can be suitably entrusted to the Toti and Talari in office, and they can be remunerated for such supervision and thus afforded a means of subsistence. The Deputy Commissioner of Kolar says that he can employ a good number of people of the classes referred to on this work *near* their homes, for some time to come. A sum of Rs. 5,600 will accordingly be placed at the disposal of the Deputy Commissioner of Kolar for this purpose. Other Deputy Commissioners are called upon to state if similar work in their Districts can be found for the classes in question, and, if so, to what extent.

READ:—

Dockets Nos. 736—697 and 737—698, dated respectively the 2nd and 4th January 1892, from the Deputy Commissioner, Shimoga District, submitting papers reporting upon the condition of the Honnali and Channagiri Taluks, and asking for funds for starting relief works.

CAMP No. D. 98, DATED SRINIVASPUR, 22ND JANUARY 1892.

ORDER THEREON.—The Dewan has carefully studied the papers received with the above, which give exhaustive information regarding the condition of the Channagiri and Honnali Taluks of the Shimoga District.

2. From these papers, the Dewan has arrived at the conclusion that much is not required in the Taluks of Channagiri and Honnali, at least for the present. The most affected villages are reported to have had a dry crop from 4 to 6 annas, but a 6 anna crop is a full value crop as prices now go, and need give no cause for alarm. The prices too, which rose suddenly on the failure of the north-east monsoon, have not since shown any tendency to increase, but have, on the contrary, become more favorable in some places. The landless classes and the Madigars and Holiyars may require some work, but their number is small and *village* works cannot, it is believed, be urgently required for their relief on any large scale. An expansion of the ordinary public works has already been ordered. The present season requires only watchfulness and preparedness against a possible failure of the next south-west monsoon.

3. Orders have been passed in the Public Works Department for the commencement of extensive works to the Siddana and Basavana channels of the Channagiri Sulekere Tank at a cost of over Rs. 63,000. The following road works have also been sanctioned in the Public Works Department :—

		Estimated Cost.
(1.)	Opening out Sulekere-Sasalu Railway Feeder (Section Sulekere to Santebennur)	Rs. 12,556
(2)	Opening out road from Channagiri to Malebennur (2nd Section Sulekere to Basavapatna)	Not yet ascertained.

These works, it is believed, will give ample work for those in need of it in the affected parts of the Channagiri Taluk. The Deputy Commissioner should advise the Executive Engineer as to the particular section of these works which should be at once taken in hand, with reference to the demand for employment in neighbouring villages, thus reducing the need for beginning the village works named in the sanctioned list referred to in the next para in as many localities as possible.

4. The village works, as per lists submitted by the Deputy Commissioner estimated to cost Rs. 10,575, are sanctioned and a sum of Rs. 5,000 therefor will be immediately placed at the Deputy Commissioner's disposal. The Deputy Commissioner's proposals regarding the manner of carrying out village works are generally approved.

5. The measures taken by the Deputy Commissioner to have blank patches of land, reserved for date trees under the Sulekere channels, cultivated with Vaisakh paddy and other grains and for the economical use of tank water are approved.

6. As regards the relief of the weaver class, the Deputy Commissioner is referred to Proceedings, Nos. D. 31 and D. 50, dated 15th and 25th December 1891, respectively, and to Proceedings No. D. 81, dated 14th January 1892. Either of the two systems described in those orders may be followed by the Deputy Commissioner at his discretion, having regard to the circumstances of each Taluk or Municipality. A sum of Rs. 1,000 is placed at the disposal of the Deputy Commissioner for the relief of weavers in the Shimoga District.

7. No orders are now required on the question of the remission of kandayam on lands owing to failure of crops.

8. The Deputy Commissioner is informed that, regarding all measures required in the present season, he should be guided by the orders already issued in regard to Maidan Taluks.

Proceedings of the Government of His Highness the Maharaja of Mysore, (General),—dated 23rd January 1892.

EAD :—

Tumkur District Deputy Commissioner's letters Nos. 651 and 661, dated 18th January 1892, bmitting for sanction estimates for Rs. 1,113—6—0 for executing earthwork to Byalakere Tank in the nknayakanhalli Taluk, and Rs. 460 to Mavinkere Tank in the Turuvekere Sub-Taluk, respectively, and ating that the works have been started in anticipation of sanction.

CAMP No. D. 112, DATED KOLAR, 23RD JANUARY 1892.

ORDER THEREON.—The Byalakere and Mavinkere Tanks are useful tanks, and rthwork to them in this season will afford suitable relief to villages round about nem. The Deputy Commissioner's action therefore, in putting in hand the works i anticipation of sanction, is approved.

2. The estimates of Rs. 1,113—6—0 and Rs. 460 are sanctioned in addition to Rs. 93,200 sanctioned for the programme of works in Tumkur District i Proceedings Camp No. D. 43, dated 23rd December 1891.

L. ANANTASWAMI RAO,

Under-Secretary.

o—The Deputy Commissioner, Tumkur District.
The Secretary, Public Works Department.
The Comptroller in Mysore.

EAD :—

Docket No. 854, dated 7th instant, from the Deputy Commissioner of Mysore, submitting for orde[r] py of correspondence between him and the Executive Engineer, Channel Division, in regard to keeping rtain river channels open for raising a quick growing dry crop in this season.

CAMP No. D. 113, DATED KOLAR, 24TH JANUARY 1892.

ORDER THEREON.—The Executive Engineer states that the supply of water in he channels will probably not be sufficient, both to work up the usual programme for the hot weather supply and to admit of the growing of a dry crop, and that if the channels were allowed to be in action, there would be no time for executing the annual repairs to them. The Deputy Commissioner has, after consulting the Amildars, submitted a programme allowing water for raising dry crops under the Kattepur, Tippur, Saligram, Ramasamudram, Chikdevarayasagar, Rampur, Sereyur and Hussenpur channels.

2. The Deputy Commissioner's programme is provisionally approved. The irrigation required for proposed dry crops is very small, and the closing of channels for repair can be regulated according to the extent to which the raiyats take advantage of the concession now ordered, by actual timely sowing of dry crops. Upon this point, the Deputy Commissioner should keep himself duly informed, and where no dry crops (other than the usual manurial ones) are put down, the Deputy Commissioner can modify his programme and allow the usual Public Works Department programme to be carried out. Where the Deputy Commissioner's programme is followed, he should get the raiyats to help the Public Works Department to execute the annual repairs in the very short time which would afterwards be left for their execution.

3. The Deputy Commissioner is requested to state if he can undertake the annual repairs himself in such special cases.

Under-Secretary.

Dockets Nos. 839, 876 and 895, dated 5th, 12th and 13th instant, respectively, from the Deputy Commissioner of Mysore.

CAMP No. D. 114, DATED KOLAR, 24TH JANUARY 1892.

ORDER THEREON.—The action of the Deputy Commissioner in directing the commencement of the subjoined works is approved :—

1. Well at Hebbal, Yedatore Taluk, estimated at Rs. 267.
2. Repair of Katte on the side of the Chamrajnagar-Attigalpur road in the Chamrajnagar Taluk, estimated at Rs. 500.
3. Stone work for a pond in Huyilalu, Mysore Taluk, estimated at Rs. 402—14—3.

The sum of Rs. 1,169—14—3 required for these works is sanctioned.

2. Similarly, the sums required for the execution of the works mentioned below, which have been started by the Sub-Division Officer, are sanctioned :—

Rs.	497	for repairing Halgur Dodkere.
„	495	„ Halasahalli Halkere.
„	499	„ Kuntur Hirikere.
„	123	for deepening a well at Kuntur.
„	123	„ at Saragur.
„	140	„ at Hosapet Basavapura.
„	148	for a new well at Basavanhalli.
Rs.	2,025	

3. The deepening of the well near the Musafarkhana at Begur, ordered by Mr. Nanjundaraj Ars, is approved. The estimated cost of this should be reported at an early date.

4. The proposal of the Sub-Division Officer and the Deputy Commissioner to open a Government Bamboo Depôt at Vadera Basavapura, to afford labor to the large number of persons hitherto employed in cutting bamboos, is sanctioned, as a tentative measure, for three months. The Deputy Commissioner will take the needful action in communication with the Inspector General of Forests.

5. The proposed construction of the whole of the Halagur-Channapatna road is also approved. The estimated cost of it should be reported.

READ :—

Report (of which an Abstract is given below) on the condition of the Tumkur District for the week ending 2nd January 1892, received with the Deputy Commissioner's docket No. 598, dated 2nd idem.

ABSTRACT.

1. STANDING CROPS.—Paddy in and about Beladara in the Tumkur Taluk, fair; the yield may be about half the usual quantity. In Koratagere and Pavagada it may be about a 4 anna crop and in several parts of Maddagiri 6 or 7 annas.

2. CULTIVATION.—Under Kapila wells going on in the Maddadiri Taluk. Several tank beds including those of Mayasandra and Mallaghatta, specially mentioned by the Dewan, have been brought under cultivation. In some places raiyats feared they would lose their seed, but they were encouraged to be alive to the occasion and told to take three-fourths of the produce.

3. FOOD GRAINS.—The cultivating class has grain in store. The landless people, Brahmins, Musalmans and Holiyars, have no provision for any long period. Prices generally stationary, rice 6 to 8 seers per rupee and ragi 13 to 17 seers.

4. FODDER.—Becoming scarce. Kavals spared by the Amrut Mahal Department thrown open.

5. GENERAL CONDITION.—No general demand for labor. Steps taken to open Relief Works wherever necessary. The weavers of Maddagiri were given an advance of Rs. 70.

No. D. 76A, DATED 7TH JANUARY 1892.

Report (of which an Abstract is given below) on the condition of the Tumkur District for the week ending 9th January 1892, received with the Deputy Commissioner's docket No. 621, dated 10th idem.

ABSTRACT.

1. CROPS HARVESTED.—Dry crops being harvested : out-turn in Pavagada and Maddagiri 2 to 6 annas. Gardens not yet affected : their produce very nearly the same as in past years.

2. CULTIVATION.—Under irrigation wells in Pavagada and Maddagiri Taluks for Vaisakha crop, going on. Many tank beds sown with jola.

3. SUPPLY OF FOOD GRAINS.—There is a considerable quantity of grain, notwithstanding large exports. Prices slightly better after merchants were spoken to, and may go down further when revenue collections begin. Rice 7 to 8 seers, ragi 13 to 18 seers, a rupee.

4. FODDER.—State forests and kavals opened and leave given to cut and remove date leaves.

5. WATER.—Becoming scarce. Estimates being sanctioned for new wells and for deepening old ones.

6. GENERAL CONDITION.—Some petitions received asking for work. Orders given to start some relief works.

Report (of which an Abstract is given below) on the condition of the Kolar District, for the week ending the 2nd January 1892, received with the Deputy Commissioner's docket No. 2757—658, dated 9th idem.

ABSTRACT.

1. CROPS HARVESTED.—Ragi: ont-turn, barely 4 annas. Sugar-cane is being cut.

2. STANDING CROPS.—Paddy under a few large tanks in Bowringpet Taluk and under Kapila wells, in pretty good condition. Kadlé and jola in tank beds, doing well. Sugar-cane under wells is kept up with the utmost effort. Other crops generally withering. Ballar, tuvar, ground-nut and gram have greatly suffered.

3. FOOD GRAINS.—Many raiyats have stock of ragi sufficient to last for 6 or 12 months. They are unwilling to sell the same. Rice freely imported. Endeavour made to induce raiyats and merchants to keep markets well supplied.

PRICES.—Rice 6 to 8 seers; ragi 12 to 16 seers.

4. FODDER.—Procurable as this is harvest season.

5. GENERAL CONDITION.—No material improvement. Agricultural classes generally engaged in harvesting and laboring classes in miscellaneous kinds of work. Demand for labor not therefore great.

6. RELIEF MEASURES.—Works started in the most affected parts of Kolar, Bagepalli and Mulbagal Taluks and Srinivaspur Sub-Taluk. Number of coolies on them at present, small.

Anaji Hobli—dry crops, below ...	...	4 „
In Hiriyur, Challakere and Molakalmuru Taluks—dry crops, about		2 „

2. STANDING CROPS.—Wet crops under kapilé wells, tanks and streams and the dry crops in Saguvali kattes and over large tracts in the Chitaldroog, Holalkere, Davangere and Jagalur Taluks were in a good or fair condition. The dry crops were withering generally in all parts of the Hiriyur, Challakere and Molakalmuru Taluks, in some villages of the Anaji, Malebennur, Harihar and Kondajji Maganis of the Davangere Taluk and of the Sokke, Kasaba and Bilchod Maganis of the Jagalur Taluk, and on high lying lands in a few villages of the Chitaldroog Taluk.

3. CULTIVATION.—Paddy and jola being sown under kapilé wells and some tanks in the Chitaldroog Taluk.

4. SUPPLY OF FOOD GRAINS.—There is sufficient stock. Markets generally well supplied. No material change in the prices. Rice from 6½ seers in the Hiriyur Taluk to 8 seers a rupee in the Davangere Taluk ; ragi from 15 seers at Molakalmuru to 22 at Hosdurga; and jola from 14 seers at Hiriyur and Molakalmuru to 18 seers at Hosdurga.

Ragi and jola were exported to places in British Territories in the Chitaldroog, Davangere, Holalkere and Challakere Taluks.

5. FODDER.—Generally sufficient in Chitaldroog and Holalkere ; fairly good in the Davangere Taluk excepting parts of the 4 Hoblis, Anaji, Malebennur, Harihar and Kondajji; scarcity much felt in Sokke Hobli and parts of Jagalur and Bilchod Hoblis; very scanty in parts of Hiriyur, Challakere, Molakalmuru and Jagalur Taluks. Cattle in these parts are fed on date and kamara leaves.

6. WATER-SUPPLY.—Generally sufficient except in a few villages of the Jagalur Taluk, in parts of the Hiriyur Taluk and the Molakalmuru Kasaba. At the latter place, a new well was being sunk and old ones being deepened.

7. GENERAL CONDITION OF PEOPLE.—Good throughout the District. No great demand for labor as yet. Harvesting work available. In Challakere, coolies reported not to care to come to relief works for the wages fixed for such works. In Hiriyur, 160 coolies were at work on the relief works started.

8. CONDITION OF CATTLE.—Generally fair in the Chitaldroog and Holalkere Taluks. Bad in the Hiriyur and Molakalmuru Taluks and parts of Challakere, Davangere and Jagalur Taluks. Large numbers taken to the jungles of Holalkere and Channagiri.

Report (of which an Abstract is given below) on the condition of the Mysore District for the week ending the 2nd January 1892, received with the Deputy Commissioner's docket No. 835, dated 4th idem.

ABSTRACT.

1. CROPS HARVESTED.—Ragi crop specially good in Heggaddevankote and parts of Hunsur and Gundlupet; 8 to 12 annas in the other parts of these two Taluks and in Chamrajnagar, Tirumakudlu-Narsipur and Nanjangud; 4 to 6 annas in parts of Mysore and Yedatore; 2 to 4 annas in other places.
   Paddy being harvested: crop under channels full in the Yedatore, Tirumakudlu-Narsipur and Seringapatam Taluks and about 8 to 12 annas in Mysore, Hunsur, Heggaddevankote, Chamrajnagar, Tirumakudlu-Narsipur, Krishnarajpete, Mandya and Malvalli Taluks. Under big tanks, the paddy crop was very poor and under smaller tanks, a total failure.
2. STANDING CROPS.—Tuvar, kadle and ballar withering; also gram except in Heggaddevankote, where the standing crop was good.
3. FOOD GRAINS.—Markets fully supplied. Prices slightly falling owing to recent harvest.
4. FODDER.—Supply sufficient in Taluks where there are jungles and paddy crop. Becoming scarce in others.
6. GENERAL CONDITION.—Fairly good. Cultivating classes engaged in harvesting.

ABSTRACT.

1. CROPS HARVESTED.—Paddy is being harvested. Out-turn in Sagar and Nagar Taluks and in the Malnad parts of Sorab, full. In parts of the Sorab Taluk, the crop was bad and the out-turn about 4 annas.

2. SUPPLY OF FOOD GRAINS.—Abundant. Markets well supplied. Prices stationary. Rice 10 seers and ragi 15 seers a rupee.

There were the usual exports to Gersoppa, Siddapur, Dharwar and Bellary.

3. FODDER.—Plentiful. Large herds of cattle belonging to Waddars and Korachars were grazing in the jungles. Raiyats' cattle too were being brought in.

4. WATER.—Supply abundant.

5. GENERAL CONDITION.—No cause for anxiety. There is good demand for labor. Local and other laboring classes find sufficient work.

ABSTRACT OF THE DEPUTY COMMISSIONER'S REMARKS.—Markets fairly supplied. Food grains somewhat cheaper owing to the harvest. Merchants prepared to meet local demand. Cattle in pretty good condition. Local laborers employed in Kanas, &c. Arrangements made for starting, when necessary, relief works in the affected parts of the Channagiri and Honnali Taluks.

Report (of which an Abstract is given below) on the condition of the Chitaldroog District for the week ending 9th January 1892, received with docket Camp No. 11, dated 11th idem, from the Deputy Commissioner of Chitaldroog.

ABSTRACT.

1. CROPS HARVESTED.—Ragi was being harvested in the Chitaldroog and Holalkere Taluks, and dry crops were harvested in the other Taluks.

The out-turn was:—

In the Chitaldroog and Holalkere Taluks ...	... 4 to 11 annas.
In Devangere Taluk, except Anaji Hobli ...	... 4 to 8 do
In Jagalur Taluk	... 4 to 6 do
In Anaji Hobli	below 4 annas.
In Challakere and Molakalmuru Taluks ...	... 2 do
In Hiriyur Taluk	below 2 do

2. STANDING CROPS.—Wet crops under wells, tanks and streams, in fair condition; as also the dry crops in Saguvali kattes and in parts of the Chitaldroog, Holalkere and Jagalur Taluks. Dry crops (Bili Jola, &c.) were withering in the Davangere, Hiriyur, Challakere and Molakalmuru Taluks and in parts of the Chitaldroog, Jagalur and Davangere Taluks. In the Davangere Taluk, white jola was being cut for fodder.

3. SUPPLY OF FOOD GRAINS.—Stock of food grains sufficient to last till next harvest and in the Holalkere Taluk to last for 2 years. Ragi was exported from that Taluk. Markets well supplied, except in a few small santés. People disappointed in these were able to get grain from raiyats who had stock, but who did not care to sell grain in santés.

Prices.—No material change. The price of rice ranged from 6½ seers at Hiriyur and Molakalmuru to 8 seers at Holalkere, Hosdurga and Davangere; ragi from 16 seers at Davangere, Hiriyur, Challakere and Molakalmuru to 21 at Holalkere, and jola from 13½ at Molakalmuru to 17 at Challakere.

4. FODDER.—Generally sufficient in the Chitaldroog and Holalkere Taluks. Insufficient in large tracts in other Taluks. Forests and kavals opened.

5. WATER.—Supply insufficient in parts of the Hiriyur Taluk, and of 4 hoblis of the Davangere Taluk and at Molakalmuru. Drinking water wells were being provided where required.

6. GENERAL CONDITION OF PEOPLE.—Good. Cholera in a mild form appeared in 4 villages near Haribar. Steps taken to prevent its becoming epidemic.

7. RELIEF WORKS.—No present need for these in the Chitaldroog and Holalkere Taluks. Seven tank works started in the Hiriyur Taluk. Number of coolies on them 160. Arrangements made to start works in parts of the Challakere, Molakalmuru, Davangere and Jagalur Taluks.

READ:—

Reports (of which an Abstract is given below) on the condition of the Hassan District for the week ending 9th January 1892, received from the Deputy Commissioner of Hassan.

ABSTRACT.

1. CROPS HARVESTED.—Paddy and ragi in the Hassan, Manjarabad and Arkalgud Taluks and ragi in the Arsikere Taluk. Out-turn in the Hassan Taluk good, except in a few villages bordering on the Arsikere Taluk, and about 14 annas in the Arkalgud Taluk.

Togari and gram were being harvested in the Hassan Taluk. Out-turn much below the average.

2. STANDING CROPS.—Sugar-cane, kadle and beans in the Belur Taluk were in pretty good condition; dry crops, avare, togari, gram, &c., had suffered from want of rain. In the Channarayapatna Taluk, paddy, jola, sugar-cane, &c., failed in some parts.

3. CULTIVATION.—Vaisakha paddy under some big tanks was being raised. This is discouraged in order to conserve water for cattle.

4. FOOD GRAINS.—Supply sufficient. Rice was being imported to the Arsikere Taluk. Prices were high in the Manjarabad and Arkalgud Taluks owing to exports, and stationary in the Channarayapatna Taluk where rice was sold at 8 seers a rupee and ragi at 20 seers a rupee.

5. FODDER.—Plentiful in the Hassan Taluk and sufficient in the Manjarabad, Arkalgud Belur and Channarayapatna Taluks. Was insufficient in the Arsikere and Holé-Narsipur Taluks.

6. WATER.—Generally sufficient. Difficulty experienced in parts of Channarayapatna Taluk. Arrangements were being made for sinking wells, where necessary, in parts of Hassan, Arsikere and Holé-Narsipur Taluks.

7. GENERAL CONDITION.—Relief works required in some villages of the Channarayapatna Taluk. Amildar directed to start the same.

Proceedings of the Government of His Highness the Maharaja of Mysore, (General),—dated 31st January 1892.

READ :—

Report (of which an Abstract is given below) on the condition of the Mysore District for the week ending 9th January 1892, received from the Deputy Commissioner of Mysore.

ABSTRACT.

1. CROPS HARVESTED.—Remaining paddy crop under channels and dry crops, tuvar, Bengal-gram, black and green gram and castor-oil seed were being harvested.

2. STANDING CROPS.—Sugar-cane under channels in good condition. Standing dry crops were withering.

3. SUPPLY OF FOOD GRAINS.—Markets sufficiently supplied. Prices stationary.

4. FODDER.—Not sufficient in Nagamangala and parts of the Mandya and Malvalli Taluks. Date leaves used in the Nagamangala Taluk.

5. GENERAL CONDITION.—Fair. Raiyats still engaged in agricultural work.

NOTES BY THE DEWAN ON TOUR.—(1891-92).—*Continued.*

126. *1st January* 1892.—In the morning, I rode from Jagalur to Hirimallanholé. The crops were generally in a better condition than in the parts north of Jagalur. Very few tanks contain water. The people have their harvest still before them. The average raiyat in these parts is fairly well-to-do. The cry everywhere is for irrigation works for future benefit, and not as the means of earning immediate wages.

127. I noticed the bed of the dry Bharmasamudra Tank left uncultivated. On enquiry, it was found that cultivation had been stopped pending the decision of a dispute between the raiyats of Wuddagatta, Bharmasamudra and Timmanhalli Villages regarding their respective rights to the cultivation of the bed. The Amildar stated that he had reported the matter to higher authorities, and that orders had not been received. Prevention of cultivation on such grounds in a season like the present, when all the available moisture in tank beds should be utilized, is most reprehensible. The Amildar was directed to go back at once and settle the dispute, and see the tank bed brought under cultivation immediately. The men who have the prior claim to cultivate the bed are those who usually keep the bund in order. This principle should be fully enforced in every District.

128. Passed by the breached Hirimallanholé Tank, now under restoration, to the Rekalgere Anikat across the Chinna Hagri, from which a channel 7 miles long is drawn to feed a series of tanks in the Challakere Taluk. The work, which costs about Rs. 1,30,000, is approaching completion and when completed, will irrigate about 1,500 acres, and be of great benefit to the most arid parts of Challakere.

129. The people of Salhalli Village begged that the proposed bridge over the Rekalgere Channel be placed right in front of their village, instead of at the distance of a furlong from it, as has now been decided upon in the D. P. W. If possible the site most convenient to the people should be selected.

130. From Hirimallanholé, I drove to Nayakanahatti. On passing into the Challakere Taluk, the dry crops seemed somewhat worse on the average, but there were patches of good cultivation under Kapilé wells. Such wells abound in this Taluk and are much appreciated. Gaudigere badly wants its breached katté (small tank) restored. It will be included in the programme of works for this Taluk.

131. In the evening, I saw some specimens of the silk and cotton cloths manufactured at Molakalmuru. The silk cloths are of a superior kind and are in good demand in ordinary years. A number of these workmen had come from Molakalmuru and prayed for special relief. It would seem that out of about 300 families carrying on this manufacture at Molakalmuru, only one-third carry on the trade with their own capital and appliances, while the others simply do the weaving for wages ranging from 2 to 3 annas *per diem*. The Sahukars, who hitherto supplied the silk, dye, yarn, &c., and made small advances of money to them, have now stopped doing so. The Deputy Commissioner has been asked to investigate the matter and supply them where necessary with yarn, &c., to make the cheapest kind of cloths, pay them proper wages and secure the manufactured articles. It is undesirable to employ these men on works to which they are unaccustomed. Their most pressing request is, however, for the abolition of the loom-tax, to which I promised favorable consideration at least for this year.

132. Saguvali Kattés are most important private works in these parts, and I passed orders removing the existing doubts as to the right of land holders to construct them, and impressed upon the local officers the desirability of encouraging the construction of as many of them as possible.

133. Colonel Bowen's reports, dated 25th and 27th December 1891, on the condition of the Goribidnur and Bagepalli Taluks and the Gudibanda Sub-Taluk will be found appended to these notes (Appendix C).

134. *2nd January* 1892.—In the morning, I rode from Nayakanhatti to Talak and thence drove to Challakere. At Nayakanhatti, the residents presented an address praying that Amrut Mahal kavals be thrown open for grazing of village cattle,

that the hulbanni should be remitted and that the question of remitting kandayam on lands should also be favorably considered. I replied that surplus Amrut Mahal kavals had already been ordered to be thrown open, and that the other matters would be considered in due course.

135. Saw the Ramsagar Tank, which contains no water. Lands under it are waste. The tank has not surplused for several years. Its capacity is being doubled, and it will hereafter be filled from the new anekat inspected yesterday.

136. Some buffalo men of the Taluk were engaged in doing the earth-work on this tank. The contractor is willing to employ local laborers dispensing with buffalo labor; still the work does not attract much labor as yet, though villages are close by. This is a good sign which I noticed also in some other places in this Taluk.

137. The raiyats complained that the kodi of this tank, when it discharged, would damage their fields, and prayed for a diversion of the K'dihalla. I found that they had been cultivating the very bed of the channel, and ascertained that the diversion would be very costly. I pointed out that on considerations of the safety and health of their village, it would be best to follow the natural line of drainage. A new sluice for this tank was also asked for. The matter will be considered in due course in the D. P. W.

138. I next saw the Kodihalli Tank. Earth-work was going on with local labor. This is the last work in the Rekalgere valley to be benefited by the Rekalgere works. The capacity is being quadrupled.

139. The Waddars and Lambanis here complained that, although they were agriculturists and house owners settled in the villages close by, they were included in the Police lists of wandering gangs and subjected to police surveillance. The matter will be referred to the Inspecter General of Police for investigation and needful orders to prevent interference with the liberty of such people.

140. We next moved on to Tippaiyanakoté new tank, which is now under construction. This is intended to store 500 units. It is proposed to reserve its water for flooding dry crops in exceptional seasons. The work will soon be completed. The contract for this work has been cancelled and the remaining earth-work will be executed by village local labor.

141. From Nayakanhatti to Talak, dry crops very poor except under Kapilé wells, of which I saw many. All tanks dry.

142. From Talak to Challakere, the road runs for the most part through barren country. Near villages, there were Kapilé wells always to be seen with good crops under them. Arrived at Challakere about noon. Condition of the people good. No signs of distress anywhere. Cattle suffer from want of fodder.

143. *3rd January* 1892.—In the morning we rode to Nagarangere, and inspected some dry fields and gardens and the working of Kapile wells and some borings for wells under the new scheme of loans for Irrigation wells.

The tank (which rarely fills) was quite dry, but the wells under them and the gardens watered by such wells were flourishing.

144. I next went over the Town and saw the Taluk Cutcherry, which is an old dilapidated building, and is unsuited for its purpose. A good site for a new cutcherry has to be carefully selected. New building sites for private houses seem to be in demand. If they are properly selected, there is no reason why Challakere should be unhealthy. Its present low situation is, doubtless, the cause of its being feverish in some seasons.

145. This was Santé day at Challakere, and food grains sold as follows:—

Common rice 8 seers the rupee, ragi 16 seers, jola 17 seers, horse-gram 13 seers. Rice, after satisfying local demands, was exported to Chitaldroog. The supply of ragi and jola was small, but this is chiefly a *rice-selling* mart.

146. Upon reports received, I directed that the Taluks of Malvalli, Nagamangala, Krishnarajpet (Attikuppa) and part of Seringapatam should be treated as within the affected area, and that all remedial measures already ordered should be applied to them.

147. *4th January* 1892.—From Challakere to Purlihalli, 10 miles. Near Dodderi, the paddy crops under the tank were in good condition. Some have been already harvested.

148. Spent the day at Purlihalli in investigating and sanctioning a complete programme of works for the Chitaldroog District.

149. *5th January* 1892.—Purlihalli to Nidgal, 18 miles, on a bad road abandoned since the last famine, and 4 miles cross country.

150. For 3 miles up to Vedavati, there are no villages, and lands are waste. The banks of the Vedavati are cultivated with paddy, the water being raised from holes dug in the river-bed by means of kapilés.

151. Chaulur, Parasarampur, Gauripur, and Mahadevapur, all in the drainage of the Vedavati, are prosperous villages, and the people generally well-to-do. As yet, there is not much demand for labor. The tanks about these villages do not generally fill and the people depend chiefly on their Kapilé wells. At Parasarampur especially, a tank feeder is much required. At Kolpal (Siddeswaranadurga), the tank has a fair supply of water. After passing the village, we recrossed into the Tumkur District, where Messrs. Venkatavaradaiengar and Dalal again met us.

152. The Deputy Commissioner of Chitaldroog District then left us, and I asked him to lose no time in carrying out the programme laid down for him.

153. The five or six miles of Pavagada Taluk we next passed through are very hilly. The lands are generally poor and contain no crops. In the afternoon, visited the fort on the top of the hill. Nidigal has a very ruined appearance. The people depend chiefly upon Talpargis and Kapilé wells, which, I am informed, do not yield the same supply of water they did some ten years ago. Some minor village tank works have been started about this place.

154. *6th January* 1892.—In the morning, walked over the hills to Bellibetta and thence drove on to Pavagada. The country is very dry and hilly. There are a few small villages in the valley, where alone water can be had from Kapilé wells and Talpargis. There is a large demand for Kapilé wells. Mr. Krishnaiengar will soon visit this Taluk and give advances for them. Kaligudda Tank, built in last famine, is said to have not filled during the last several years. This must be investigated.

155. *7th January* 1892.—Walked through the town, which contains a large number of substantially built stone houses. I pointed out to the Deputy Commissioner several sanitation and drainage works very suitable to be undertaken in the present season. There are some large Public Works in progress in the north of the Taluk, but local labor is not attracted to them as yet in appreciable numbers. The new Hindupur Railway will benefit this Taluk. A Railway feeder, Pavagada to Roddam, from whence there is a road already made to the Railway Station of Pennakonda, is a most useful work which should at once be undertaken. The Challakere-Pavagada Road in this District must also be put in order in this season. These two roads will furnish a good deal of useful work to the neighbouring villages in addition to village tanks, regarding which orders have already been passed.

156. As elsewhere, cattle suffer from want of fodder, but the people do not care to take them to the Maddagiri Forests in the neighbouring Taluk. The general condition of raiyats is good. The dry lands are very poor, and horse-gram is the chief crop raised. The dry assessment is very light, being from one to eight annas an acre. Much rice is grown under Talpargis and Kapilé wells. From all accounts there is a fair stock of food grain in the country.

157. The people here presented an address and expressed their confidence in the remedial measures now being taken by Government. They said that, since the time of Mr. Bowring, no Head of the Administration had visited this remote corner of the Province. They seemed to take a hopeful view of the present position. The question of relieving poor Brahmins came up, and I told them that some few might now be employed as Overseers on works, but the others must be supported, for the present at least, by local charity which should not be promiscuously given but in an organized form.

NOTES BY THE DEWAN ON TOUR.—(1891-92.)—*Continued.*

158. *8th January* 1892.—*Pavagada to Midigesi* (20 *miles*).—The Rajyanti tank, about 4 miles from Pavagada, was quite dry. A portion of the bed was cultivated, and the rest was being prepared for cultivation.

159. I then had to pass through 8 miles of British Territory forming a portion of the Madaksira Taluk of the Anantapur District.

160. Passing on into the Maddagiri Taluk, I came across the Bidarakere tank, the bund of which was recently repaired by the Public Works Department. The tank was dry, but some cultivation was carried on in the bed with the aid of a well. The sinking of such wells or water-holes in the beds of tanks will be most useful, as with their help, some crop can always be raised, even where there is in the soil no moisture sufficient for cultivation in the ordinary way. Where such wells have to be dug and water for cultivation has to be lifted therefrom, the raiyats are generally unwilling to pay any money assessment, and when this is the case, the Deputy Commissioner should resort to Batayi, making the raiyat's share of the grain produced as liberal as may be necessary, say from $\frac{3}{4}$ths to even $\frac{7}{8}$ths, besides giving him the whole of the straw. The great object of Government is to cause the production during the present season of as much fodder and food as possible. The proper utilization of the dry tank beds, in accordance with the liberal views above expressed, will go a great way towards the realization of this object.

161. In the evening went up the Midigesi hill.

162. *9th January* 1892.—*Midigesi to Maddagiri* (13 *miles*).—At Virachannahalli, the people wanted the old katté to be repaired. It may be taken up as a village work by the Revenue Department, but no direct irrigation should be allowed therefrom. The raiyats of Tippagondahalli asked for a feeder to their tank from Hoskere Chikkakere. It may also be done as a village work. The raiyats of Hoskere village ask that the sluices of Hoskere Dodkere tank be lowered. The Executive Engineer says that a new low level sluice will be early built.

163. At Avergal, it was represented that the 4 or 5 drinking water wells in the village had no water. This should receive the Deputy Commissioner's early attention.

164. At Jadegondanhalli, I noticed that the raiyats are sinking several good irrigation wells in their lands without the help of advances from Government. In these parts, the Kartik dry crop under wells is said to have been good, and the crop on Beddalu or unirrigated lands to have been 8 annas.

165. Arrived at Maddagiri at 9 A. M. There are two stone wells (*Kallyanis* near the new Travellers' Bungalow, which are plentifully supplied with water by) subterranean springs. Irrigation is carried on under one of them, and the other

being on the road side, is used by travellers. I gave instructions to the local authorities to have the dirty water in these wells baled out, to enclose the wells and keep the whole place tidy.

166. The people present represented that the condition of this Taluk was fair: the out-turn from lands under wells had been good, but dry crops and those under tanks had failed in several places; there was fodder in the Maddagiri Forests which had been thrown open to the public.

167. In the evening, inspected the Taluk Cutcherry and the Munsiff's Court House on the Fort rampart. The proposal to build additional rooms for the Amildar's office on the main gateway into the Fort is good. The Jamabandi house may be the Assistant Commissioner's Office, and if necessary, the whole of it could be utilized for this purpose, after the present Munsiff, Mr. Budan Sheriff, vacates it, his successor being required to find a house for himself in the town. The ground surrounding these public buildings should be kept more tidy. It requires much levelling and removal of debris, rank vegetation and unsightly walls, all which I pointed out to the Deputy Commissioner. The whole place, including the further approach into the fort, is capable of much improvement.

168. After going up the hill some distance, I returned to the town and visited the two large temples. They are in very good order, except in one or two places which should be attended to in the Muzarayi Department. The temples have but *nominal* tastiks (as I noticed to be the case also in the two temples at Midigesi) A general revision of all temple tastiks is required.

169. The town, it is said, becomes damp and unhealthy in the rainy season, when the Cholanhalli tank fills. A good drain (such as I explained to the Deputy Commissioner and Executive Engineer) will probably make the place more healthy. The local officers should investigate the matter.

170. *10th January* 1892.—In the morning I visited the villages of Sagavanhalli, Mallenhalli, Bijavara, Vaddūhalli, Basavanhalli and Siddapur. The dry crops have all been harvested, the yield is said to have varied much in different places. The gardens under wells are thriving. Wet lands under wells and Talpargis are being prepared for Vaisakpaddy. In suitable localities lands assessed dry by the Survey are being converted into gardens by means of new wells. At the Bijvare tank, the raiyats complained that the Cholanhalli Kodi Nala entered this tank by the side of the right sluice, and the channels cut by them to the head of the sluice got silted up every year. They asked for a new sluice at a lower level near the centre of the bund. The request is most reasonable and should be granted, as the annual excavation of a deep long channel is a matter of much hardship to the raiyats holding lands under the tank.

171. The weirs of the Siddapur tank were raised by 2 feet six years ago. The raiyats want them raised by one foot more. The request deserves consideration, provided the Jodidar whose lands will be submerged can be compensated in some adequate way. The Deputy Commissioner will kindly make early enquiries and take needful action in this matter.

172. In the evening, some of the principal inhabitants of Maddagiri visited me. In their representations, they referred to an impending famine, and with satisfaction to the present action of Government. I told them that the general condition of their Taluk was good and gave me no cause for anxiety, that the rise in prices only affected a small class, and that if the South-West monsoon proved favorblea, there was nothing to fear.

173. A portion of the road from Maddagiri to Dodballapur appears to have been abandoned on account of the Makalidurg ghat, and in lieu of this portion, a branch made to Tondebhavi, which would be a station on the new Hindupur Railway. A most useful Railway feeder for Maddagiri would however be a line from near Timmanhalli due east to Goribidnur. A short road from Koratagere

vid Rampur and Basavanhalli to join such a Railway feeder would follow very nearly the present cart track, on which there is now a good deal of traffic. I asked the Executive Engineer to investigate these projects at an early date as they would afford very suitable work in the present season.

174. *11th January* 1892.—Maddagiri to Tumkur (26 miles). On the way visited the Cholanhalli tank. A breach in the bund of this tank was filled up, and weirs raised by 1 foot, 7 years ago. The raiyats complained that the main nala o this tank came direct to their sluice and brought much silt with it. They wanted this to be remedied and also asked for a silt trap. The matter should be considered in the Public Works Department. A small tank across the main feeder (which is being rapidly silted), if constructed above the road in some convenient situation, will be of great benefit to the people. In dry seasons, the sluice is fed by *Talapargis* and something should be done in the way I explained to the Executive Engineer to prevent the Talapargi channel being obliterated annually by the silt of the main feeder.

175. The raiyats of the Tumbadi village asked for a new tank from the Kodi-channel of Mallekaval tank above. The matter should be considered.

176. Drove through the town of Koratagere. The crops in this Sub-Taluk were generally not so good as those of Maddagiri. There are 60 looms working in the town. The weavers complained that the order for granting advances to them were not sufficiently liberal, as they would not make enough for their livelihood if they obtained from Government on their manufactured articles only 75 per cent of their value. I told the Deputy Commissioner to use his discretion in making the advances, so as to leave proper wages to the weavers.

177. There was a general request here that Koratagere should be again made the Taluk Head-Quarters, as it had lost in importance since its reduction to a Deputy Amildar's station. The change was made some years ago after careful consideration, and no sufficient grounds exist for disturbing existing arrangements.

178. The raiyats asked that the weirs of the Agrahara Tank should be raised by 8 feet. The work is very desirable as it will greatly benefit the wet cultivation which now is very poor, except in exceptional years. The work should be undertaken at an early date.

179. As I passed the Golhalli Temple, the Brahmin Jodidars of Ahobala Agraharam asked for a loan for repairing their breached tank. They were told that rules had been passed for making such loans, and they might apply to the Deputy Commissioner.

180. Arrived at Tumkur at 11 A. M. I put up at Government House, and I pointed out to the Executive Engineer some improvements which seemed necessary to the out-houses.

181. In the evening, a number of merchants and other residents of Tumkur visited me. They said that they were badly in need of drinking water, as the Tumkur tank had dried up. They asked that the old well on the Kunigal road, the water of which was very good, should be deepened and repaired. Other wells in the town for drinking water were also asked for. The Deputy Commissioner was asked to consider their wants at once. It is believed that there is a *Talapargi* in the Tumkur tank bed. The Executive Engineer was asked to investigate the matter

182. The proposed water-supply scheme of Tumkur was next discussed The project submitted to Government did not seem to provide for a permanent supply. Natural springs exist in the hills on the North-East of the town, and they should be utilized for the water-supply. The subject requires careful further investigation as much reliance cannot be placed upon rain-fed tanks in bad years.

183. The merchants asked that the Mohatarfa tax on grain Mandis should be excused this year, as the demand for grain from outside the Province was less now than before, and the price of ragi, which had risen to 49 Rs. per cart-load

of 640 seers, had fallen to 41 and 42 Rs. I pointed out to them that high prices and brisk trade had benefited them, and were still benefiting them, and that they did not, in my opinion, stand in need of any reduction of the Mohatarfa, which has been fixed with their own consent at moderate rates.

184. They further asked that the contemplated revision of Municipal house tax should not be effected this year. They were informed that orders had already been issued to this effect.

185. They further asked that the assessment on lands under tanks should be remitted this year. They were informed that the matter was under consideration, and some concession would be granted where needed.

186. *12th January* 1892.—In the morning I saw the places in the tank bed, where old *Talapargis* were said to have existed. It was evident that portions of the bed were under cultivation in former years with the help of the water from such under-ground springs. One or two excavations should be made in the most likely places, and if water was tapped, a channel should be made to take the water as near as possible towards the bund and the town. This would not only help the water-supply of the town, but also allow of some cultivation of the bed.

187. There is no cultivation in this tank bed, because it has been dry for several months, the later rains, which were expected, having completely failed. But a portion of the bed can easily be cultivated from wells under a liberal Batayi system, as elsewhere ordered. There, however, appears to be some difficulty in getting the neighbouring raiyats to come forward to cultivate the bed on any terms whatsoever, because they have their own lands with wells, and they would prefer working on them. The town has a population of over 11,000, and there are many poor people for whom work has to be found for the next few months, and *amani* cultivation of the tank bed with the aid of water lifted from new holes to be dug would be a very suitable kind of relief work. I arranged with the Deputy Commissioner for the commencement of this work at once, as an experimental measure. Other works to be at once undertaken in the town are the deepening of the Ballenkatte and a big well above it, but below present drawing wells. All these works are calculated to give a better water-supply.

188. It was complained that the Kariballi well was not progressing. The Executive Engineer promised to look into the matter at once.

189. I visited various parts of the town, and saw the extension in progress, and afterwards took the train to Bangalore at 10-40 A. M. At the Golhalli Railway Station, Mr. V. P. Madhava Rao, Deputy Commissioner of the Bangalore District met me. He gave a good account of work being done in Dodballapur Taluk which he had been visiting.

190. *14th January* 1892.—In the morning, I inspected with the Deputy Commissioner, the Fort improvements, the proposed Taragupet and the Agrahar Tank.

Fort Improvements.—Colonel Bowen and Mr. Madhava Rao have repeatedly strongly urged the removal altogether of the works on the North-West corner of the Fort, so as to improve the general appearance of the place, and to provide a suitable site for the proposed new market. A portion of the work appears to be an excrescence of a later date than the remainder, and its removal may be an advantage if it can be shown to be financially justifiable—that is to say, will the value of stones to be removed and of the ground to be recovered be nearly equal to the cost of removal and levelling? The Deputy Commissioner will kindly report upon this in due course.

New Taragupet.—An altered arrangement is proposed so as to allow of a Railway running through it. But in order to carry out this arrangement, we have to pay some 50,000 or 60,000 Rs. as compensation to the owners for the sites and the building work already done, and afterwards take our chance of realizing what we can by a re-sale of the sites. All this is, in my opinion, unnecessary for the sake

of a possible Railway in the uncertain future, especially as, should such a Railway become really necessary, we can easily align it very much as Captain Brackenbury's line was before taken to some where about the timber depôt. Such a line would pass on waste land and can at no time cost us much. Under such circumstances, the proposed alteration should be abandoned, and the owners allowed at once to complete their buildings as originally arranged. Some of the streets can be produced hereafter.

The Agrahar Tank.—All the sewage of Cotton-Petta and the refuse of the Mills get into this. This should be diverted from the tank, which should be kept in as pure a condition as possible. Whether the proposed bathing ghats should be at this tank or behind it, requires further consideration. If below the tank, I would certainly avoid the proximity of the burial ground, and go towards the Agrahar village. All this must be carefully looked into.

191. *15th January* 1892.—In the morning, I inspected, with Colonel Bowen and Mr. Madhava Rao, Sankey's Reservoir and the Dam below it, intended to catch the leakage. The water in the tank is above the lower sluice level, and some of it is very much wanted for the Dharmambudhi, and the Chief Engineer was requested to arrange for this being done at once in communication with the Resident.

192. The very pressing character of the question of a permanent water-supply for Bangalore City is brought home to us with special significance in a year like the present, but as our control over Sankey's Reservoir is still pending the decision of the British Government, we cannot yet take final action in the matter. But assuming that the supply in Sankey's Reservoir will become available for the City, the best plan will be to have iron pipes from the low level sluice to a service cistern in a situation commanding the City, near the Yelahanka Gate for instance, and when the water in the tank falls below the low level sluice, to resort to pumping from the tank or Dam, or from both. Colonel Bowen has promised to complete the project and to make enquiries regarding the iron pipes required, whether they are available in India or have to be imported from England, &c.

193. The Dam is fairly water tight, and we decided that its height should be increased by several feet. We next saw the new road from Guttahalli to join the Tumkur Road, and the Deputy Commissioner's proposal for a small katté on one side of it was approved. We then walked over the bund of the Dharmambudhi feeder channel, the improvement of which is to be taken in hand at once in the Public Works Department. The Municipality has an estimate for it, in accordance with some instructions I before issued. These had better be transferred to the Executive Engineer, Bangalore Division.

194. I have requested the Deputy Commissioner to make a good excavation in the Sampangi Tank bed for the convenience of water-supply to the Alsur Petta side of the City. The deepening of the Dharmambudhi Tank bed might interfere with the water-supply project and should therefore be deferred for the present.

195. The removal of the Leper and Lunatic Asylums from their present situation in close proximity to the City is a measure on the urgency of which all officers present were agreed in opinion. The matter will be decided at a very early date.

196. The Silahdar lines are a source of pollution to the Dharmambudhi feeder. There is a syphon intended to carry the drainage to the other side of the feeder. It does not command the whole of the lines or the latrine by the road side. This Colonel Bowen promised to remedy.

197. It was long since decided that all new Silahdar huts should be built on the other side of the feeder on a site, which I and Colonel Hay had selected. Some old huts are being replaced by new ones on the old site. These had better go to the site on the other side of the feeder.

198. Separate orders have been passed on certain Municipal projects submitted by the Deputy Commissioner.

Proceedings of the Government of His Highness the Maharaja of Mysore, (General),—dated 16th January 1892.

NOTES BY THE DEWAN ON TOUR.—(1891-92).—*Continued.*

199. *16th January* 1892.—BANGALORE TO DEVANHALLI, (22 MILES).—This morning I left Bangalore on a tour through the Kolar District *viâ* Devanhalli. At the 4th mile from Bangalore, we passed by the Hebbal tank, a large reservoir which had a good supply of water, considering the state of this season.

200. We then passed by Hunsé Marnahalli, where there is a Sivachar Matt, at which I was informed a good number of people were fed *gratis* every day. The tank is quite dry, and I noticed that the bed of this and other dry tanks in this Taluk had not been brought under cultivation. The Amildar explained that people were backward in taking up such cultivation owing to a fear that the crops might be submerged by a sudden fall of rain. It was pointed out that where this was the case the people elsewhere gladly took up the cultivation on the *Batayi* system. The object of Government in encouraging such cultivation is not so much to derive a revenue therefrom, as to have some crop grown with the available moisture in tank beds and some fodder for the cattle. It is now, however, too late even to carry on such cultivation in the case of many of the tanks in this taluk as the beds are quite dry, but in such cases, temporary water holes should be dug in the beds of the tanks and cultivation carried on by baling out water therefrom, upon the very liberal terms I have authorized for other places.

201. It was brought to notice by the Deputy Commissioner that the present system of assessing public topes and giving them out to private individuals was doing permanent injury to the topes, as the holders thereof indiscriminately cut the trees. I promised to look into the matter.

202. Mr. Madhava Rao suggested that the definition of "District Forest" in the Forest Rules should be modified so as to include *Gomal* (grazing) lands in it. The matter will be considered with reference to the provisions of the Revenue Code on the subject.

203. Near Chikjala, I was shown a village tank work on a small scale, which consisted of the strengthening of the bed of the tank with earth dug out of the tank bed. The work done is to be measured by the several pits which were being dug by different batches of coolies, each batch consisting of 2 males and 3 females, divided off with regard to their respective villages or other circumstances of association. The work is conducted by *Amani* by Government officers, as the local authorities believe that it would be difficult to check the supervision of the Patel who, if entrusted altogether with the work, may, with the object of obtaining as much work as possible for the amount sanctioned, give out the work only to the strong and neglect the weak, and may also favor some particular villages to the prejudice of others. I pointed out to the local officers present that it would not be possible for Government to conduct such works in all their details with their own machinery, that the bonds of village organization should be availed of as much as possible, and that the Patel, associated, where necessary, with the Buddhivants of the village, should be entrusted with the conduct of such works. The Patel should practically be the contractor for the work, with the conditions that he should employ all persons seeking employment, and that he should pay the laborer at rates not lower than the prescribed Codal minimum. I also pointed out that excavations for earthwork should be in pits of well understood dimensions, the number of cubic yards per rupee being fixed from time to time so as to suit laborers according to their ability to turn out work, the nature of the soil to be excavated, the lead, &c. I also suggested that when the people of several villages had to be employed on the same work, it might be practicable to divide it off into blocks and to assign one block to each village.

204. I next visited the chattram built by Doddi Venkatramana Chetti at Chikjala. There is a large stone well (Kalyani) in this chattram which irrigates the sugar-cane lands below. A portion of the steps of this well has been dismantled for repairing the discharge channel, but the completion of the work has been neglected.

205. The raiyats in this village asked for a well for watering cattle. They were told that they should exert themselves and sink temporary water holes in the tank bed for this purpose. The raiyats here are well-to-do and must help themselves. The standing sugar-cane crops in this part of the country are very good.

206. On arriving at Devanhalli, the people presented an address in which they asked :—

(1) that the drinking water wells in the town should be deepened and new ones sunk ;

(2) that something should be done for the relief of poor Brahmins, Muhammadans, &c ;

(3) that some urgent repairs should be effected to the Venugopalaswami temple in the town ;

(4) that a branch Railway should be opened from Bangalore to Chikballapur *vid* Devanhalli ; and

(5) that, for the convenience of the large number of travellers who pass by this place from Bangalore to Bellary, a feeding chattram should be opened here by being transferred from any other place where it might be unnecessary. I promised to give my consideration to their various requests in due course.

207. In the evening, I walked through the town which is fairly compact, with streets kept clean. Various small improvements are proposed. The tank contains some water, and the bund is being raised as a village work for the present season. It does not attract many coolies as yet. The Gopalaswami temple wants some repairs for which a project is now being considered in the Muzarayi Department.

208. *17th January* 1892.—In the morning, I rode across some of the villages on the west of Devanhalli, and afterwards drove to Dodballapur and back to Devanhalli. The dry crops have been harvested. They were better on the Devanhalli side than on that of Dodballapur. In some ragi stacked in the fields, the yield was probably 8 to 10 annas. There was a good deal of sugar-cane on the ground and it was all in excellent condition, being irrigated from wells by means of *yatams*. Water is met with at 10 to 15 feet from the surface through soft soil. The wells are generally not faced with stone, and they cost about Rs. 10 each, and after a few years' use, the raiyat often has to sink a new well.

209. Dodballapur is rather a straggling town with about 7,000 inhabitants. Owing to the proximity of the tank, the public health is not generally good, but in this exceptionally dry season, there is no fever. A large number of people had assembled to represent their present condition. Of matters brought forward, I may mention :—

1*stly. Relief to Weavers.*—This was the most urgent matter brought forward. I explained to them the very practical and liberal orders which had just been issued on the recommendation of Mr. Madhava Rao. These were accepted with satisfaction by those concerned. I also pointed out that the system would embrace Holeyar and Cumbli weavers.

2*ndly. Relief to Brahmins and Muhammadans.*—I pointed out that any gratuitous relief, except to the infirm, would be out of the question at present. There was so far no real distress and local charity could be depended upon for helping the really poor. It was admitted that there was no real starvation among these classes even during the late famine.

3rdly. Relief to the Holeyars and Madigars, including the village Totis and Talaris.—These are the people that really require most help in the present season. They should be largely employed on works and enabled to earn suitable wages. For the Totis and Talaris (doing the actual work of their offices), some system of remuneration in cash, if one can be devised on a moderate scale, would receive the favorable consideration of the Government. The Deputy Commissioner was requested to give his early attention to the subject, which was really more pressing than the famine allowances to minor Government servants about which we hear so much.

4thly. Cultivation of dry tank beds.—Something has been attempted in this direction in the Dodballapur Taluk but not to the extent I would like to see. The Amildar promised to do all that was possible, beginning with the Kasaba tank bed, which was quite dry.

5thly. Complaint against Kalsat and excessive Quit-rent from Brahmin Inamdars.—This is a general question not connected with the present season.

And *6thly. The position of the new Railway Station.*—The people naturally were most anxious that the station should be built on the town side of the line and not on the opposite side. It is proposed to build it on the latter side, in accordance with the Railway rule on the subject, and for the convenience of traffic arrangements. Inspecting the site, I saw that it was easy to give an *under-crossing* approach to the station from the town. The people object to the proposed location of the station, because of the level crossing. If an underpassage were given, they would be quite satisfied. This should be done. I met Mr. Dallas, who thought that the *under-passage* as proposed could easily be given, and would not cost much more than the proposed level crossing on a high bank. He promised to refer the matter to the Railway Department.

210. A short diversion of the Devanhalli-Dodballapur road from near Raghunathpur or thereabouts, straight into the Railway station, is very desirable, and should be early considered in the Public Works Department.

211. In the evening, I had a discussion at Devanhalli with the local officers regarding various matters connected with the present season. The principal points discussed were :—

(1). *The manner of conducting Village Relief Works, how they should be supervised, &c.*—I explained to the officers the system described in para 203 above.

(2). *The rates of wages to be paid to coolies on such works.*—The rates paid on the works in the Devanhalli Taluk, *viz.*, 4 annas per male cooly and 3 annas per female cooly, appear too high. I pointed out that the rates should not be placed at too high a figure and that the work expected was very light and near the laborers' homes, and the Codal rates were sufficient. Able-bodied persons who could earn more must go to the Public Works. A wage of 2½ annas per man and 1½ annas per woman seemed fair.

212. *18th January* 1892.—In the morning, after inspecting the Karhalli tank work which is being carried on by the Revenue Department, I drove up to Kuduvatti, and thence rode to Nundydroog along the bridle path. After a few hours on the Droog, I descended on the Sultanpet side and thence drove to Chikballapur, visiting the Nundy temple on the way. This temple is an important one, and the annual fair attracts large numbers. The surroundings are far from tidy. The people clamour for the repair of the temple, which is of considerable architectural interest, as well as for the restoration of the attached mantaps which are largely used during the fair.

The matter must be considered in the Muzarai Department. It is however noted that this important temple gets no revenue from offerings. A *Golaka*, if put up, would enable the temple to get some revenue for its due maintenance.

213. At Sultanpet, Narasimha Mestri, whose new chattram and large public well I saw, asked that the Government may take over the management. The Deputy Commissioner has been asked to do the needful.

214. In the Chikballapur Taluk, the crops have been better than in Devanhalli. Most tanks still contain some water. Well irrigation is largely resorted to, and valuable garden crops are raised. The towns-people of Chikballapur (which has a population of 11,000) presented me with an address. They ask for nothing except for a contour channel to their tank, and for more drinking water wells. The Deputy Commissioner and the Executive Engineer will give their attention to their requests, which are deserving of every possible favorable consideration.

215. *19th January* 1892.—In the morning, I walked to the so-called Chitravati Tirtha. The Manakanbele tank above it was quite dry. I inspected several lands cultivated with garden crops under wells. The wells are of the kind met with in Devanhalli. In two or three cases, stone facing has been done. It is said the water level in the wells gets lower and lower, year after year, and it becomes necessary to deepen them from time to time, or to sink new wells in lieu of the older ones. This is probably due to the gradual exhaustion of small springs, as often noticed in the Bangalore Taluk, especially in high situations, and it accounts for the unwillingness of the raiyat to adopt stone facing for irrigation wells.

216. I also saw the new Munsiff's Court under construction. An office for the Sub-Division officer should be built on one side of it, as also a small residence for the officer. These matters should be early dealt with in the Public Works Department.

217. In the afternoon, I met the chief residents of the town of Chikballapur and some merchants and land-holders from the taluks in the Sub-Division. The great want in Chikballapur is drinking water as the existing wells are all nearly dried up. The only remedy is to sink new wells and deepen existing ones. I asked the local officers to investigate the matter at once.

218. I then drove into the town.

219. I visited the Iron Manufactory worked by one Narasimmaiya, at which sugar-cane mills or crushing machines are made. The factory has been in existence for the last two years. The mills are sold at fair prices, their soundness being guaranteed for a term of years, and they are repaired free of cost, if they get out of order within the guaranteed period. The mills thus command a ready sale. This local industry deserves every encouragement.

220. I then visited the Kanarese School, which has 380 boys on its rolls, and sends up students for the Mysore Local Examinations. It is proposed to buy up the school building, which belongs to a private individual and utilize a portion of it for a road to connect the Fort and the Petta, and to use the remaining portion for the school.

221. The Girls' school, which I next visited, had 100 girls on its rolls and appeared to be well conducted.

222. I was then taken to the Sanskrit School kept by one Rajagopalachar, with the help of a grant-in-aid from Government. The school is one of the best of its kind and I was much pleased with my inspection of it.

223. The Government English High School was next visited. There are 100 boys on the rolls, of whom 50 are in the Matriculation Class. Four students passed the Matriculation Examination last year. I was shown some chemical experiments in the highest class and some very good specimens of map-drawing executed by the students. Physical education is not neglected in this school, some gymnastic exercises which the boys went through before me being very creditable. I promised to give a small grant for the gymnasium.

224. After returning from the visit to the town, I had a discussion with the local officers about various matters.

Proceedings of the Government of His Highness the Maharaja of Mysore, (General),—dated 20th January 1892.

225. The manner of conducting Relief Works, and the rates of wages payable to coolies were discussed, and it was decided that earthwork done should be measured by pits and supervised by the Patel in the manner recorded elsewhere. As the wages paid on Public Works are higher than those that would be given on Relief Works, and as there would be clashing if both such works were carried on near the same village, I told the Deputy Commissioner not to start Relief Works in villages near which Public Works were in progress. A list of weak men in such villages should be made and for them some work should be devised other than village tank works. In connection with the management of village tank works, the Patel's duties shall be:—

(1) to pay coolies their wages, never less than the minimum wage,
(2) to show to Government a certain quantity of work for the money advanced to him from time to time,
(3) to employ all that seek work,
(4) to give to laborers the option of forming themselves into gangs, including the old and weak and the women, &c., and if a proper distribution be not made by the villagers themselves, to interfere and make proper gangs, so that no one who wants work goes without getting it.

226. The question of Famine advances to low paid subordinates of the Civil and Military Departments then came up. I explained to the local officers that I had long had the matter under consideration but was of opinion that the prices of food grains had not reached such a pitch as to necessitate the immediate adoption of this measure.

227. The condition of the village servants, the Begars, the Holiyars and Madigars was next considered. They were doing a good deal of service to the State without any adequate remuneration, and the grain miras which they usually got had failed this year owing to the failure of crops. I told the Deputy Commissioner that Village Relief Works were intended chiefly for men of these classes and that they should be paid regular daily wages for the work done by them. To those who were actually employed in doing special Police duty, a small pay of, say, Rs. 3 or 4 a month, might be given. I told the Deputy Commissioner to make a list of persons to be so paid and state the total amount required, for final sanction.

228. The Deputy Commissioner brought to notice that the collection of tangadi bark was a very suitable work for the present season. The system has to be worked with care and when a proper one was elaborated, I promised to sanction the money required for the purpose.

229. *20th January* 1892.—In the morning I went to visit the new Srinivasasagara, a large reservoir calculated to impound some 600 units and to cost a lakh of Rupees. The work is well advanced and may be completed in about 6 months hence. It will directly irrigate some 1,500 acres and, what is more important, it will indirectly help the extensive well irrigation of the Goribidnur Taluk. Every irrigable acre is expected to be taken up. I was much pleased with the excellent work being done under Mr. Srinivasa Rao, the Executive Engineer, in the face of many labor difficulties.

230. I asked Messrs. Madiah and Krishnaswamaiengar to see to the location of villages on either side of the river in healthy situations and grant the people, willing to settle down, liberal concessions as regards building materials, &c.

231. The tank at the head of the Goribidnur ghat breached several years ago. There is no cultivation under it, but the work is most useful for the large numbers of cattle from the surrounding villages and for travellers. I asked the Deputy Commissioner and the Executive Engineer to arrange at once for the restoration of this tank, the present ruined condition of which has long been a subject of bitter local complaint.

232. The improvement of this ghat is, I understand, in contemplation. What Chikballapur really requires is the shortest possible connection by road with the Hindupur Railway. Is such a road readily feasible along the Narayanapur ghat?

This the Executive Engineer promised to investigate. Such a road from Chikballapur to Vaddanhalli near the Railway will only be some 14 miles, and judging from the topo map, the gradient seems to be comparatively easy.

233. On my way back from Srinivasasagar, I visited the Rangaswami temple about a mile from the road. It is of local importance, and an estimate for its repair (towards which Government has contributed Rs. 2,000) is in abeyance because sufficient funds are not forthcoming. The Muzarayi Department should if possible, give the additional help required.

234. I returned to Chikballapur about 1 P. M. and left for Sidlaghatt at 4 P. M.

235. There is all along the road a good deal of valuable garden cultivation under wells. Yatam (or pikota) is the only water-lift in use. The Chikballapur and Sidlaghatta Taluks have not had their usual good dry crops, but otherwise they are in a prosperous condition and the people generally well-to-do.

236. *21st January* 1892.—In the morning I walked through the Sidlaghatta town (population 7,000). I visited the Kanarese School which contains over 200 pupils and has the reputation of being one of the best of its class, as shown by the results of the Local Examinations. I saw also the Hindustani School, a novel feature of which is a small class of Muhammadan girls, and next I visited the Hindu Girls' School, which is a successful local institution of many years' standing. Subbaraya Chetti has built an excellent chattram which I saw and which deserves every encouragement. I also inspected the manufacture of silk and bangles. The latter seems to be languishing, but the former is very thriving and is established in this town on a large scale. The silk produced is sold at from Rs. 3 to 4 per seer of 24 tolas. The silk-worms appear now to be thoroughly acclimatised, and the mulberry cultivation is on an extensive scale and is highly remunerative, though not as remunerative as the poppy cultivation which has had to be abolished. The introduction of improved methods of sericulture would be most beneficial, and the matter is one well worthy of the attention of the Agricultural Department.

237. I next inspected some garden cultivation under wells. The water level is from 20 to 30 feet. The sides are laterite and require no stone facing, and in this respect this Taluk has a great advantage over the parts of Chikballapur I have seen, where the sides of wells generally fall in and cause much expense and trouble to the raiyat.

238. I afterwards drove to Chintamani. Along the road, the dry crops had been nearly as good as near Sidlaghatta, but there was not much well irrigation to be seen as we approached Chintamani. The people have to go long distances for drinking water. This is being remedied by means of the new wells which have been sanctioned by Government.

239. At Konepalli I visited the new chattram built and enclosed by the local Patel, Byra Reddi. He feeds daily a small number of people of all castes. He asks that the Government may take over the management. His request deserves favorable consideration.

240. The large drinking water well near Chintamani, being constructed by the Government, which I saw, promises to be very useful.

241. At 11 A. M., I arrived at Chintamani.

242. In the evening I visited the town. The merchants of the place presented an address in which they expressed their confidence in the measures taken by Government, and prayed for arrangements being made for improving the water-supply of the town. I assured them in reply that Government would do all in its power to avert possible distress in the future.

243. The people asked for a kalyani (pond with flights of stone steps all round) to be constructed in the centre of the town, to be supplied with water from the Karanji tank above. I asked the Executive Engineer to investigate the matter.

244. Under one of these kalyanis, wet cultivation of about 10 guntas of land is carried on. I told the Deputy Commissioner that the supply of water for irrigation should be at once stopped, and the assessment on the land converted from wet into dry.

245. The Ramgunte tank near Chintamani was dry. A good supply of water in this tank would fill the wells and kalyanis in the town. I asked the Executive Engineer to try and arrange for filling this tank.

246. I noticed on the plain, where the weekly santé or market is held, 2 large wells being sunk by private individuals to provide drinking water for the large number of persons who resort to the fair. A good supply of water has been tapped after blasting with dynamite.

247. On enquiries made, I learn that the market is very well supplied here, Rs. 15,000 worth of Madras rice being in the hands of merchants. I was also informed that more grain was now coming into the weekly market than was the case 2 weeks ago and that ragi sold at 15 and 16 seers the rupee.

248. The general condition of this Taluk is somewhat inferior to that of Chikballapur and Sidlaghatta. The average rain-fall is 27 inches, but last year it was only 16 inches. In the Addagal, Munganapalli and Irgampalli Hoblis, the the dry crops are said to have varied from 2 to 3 annas, and in other Hoblis from 6 to 8 annas. But the first three hoblis are supplied with irrigation wells under which sugar-cane and irrigated ragi have been grown to a considerable extent. There is no distress among the people anywhere. 6 village works have been started in the hoblis where dry crops have most failed. The laborers who are attracted to them are the Holiyars, Madigars, Bedars and some of the poorest agriculturists. Each work employs from about 50 to 80 coolies. Men coolies are paid at 2 annas 4 pies and women coolies 1½ annas. 9 cubic yards' earthwork is done for the rupee. In other hoblis, three village works have been started. Same wages are paid. Each work employs only from 20 to 25 coolies. The *Amani* collection of tangadi bark (for which an advance has already been sanctioned for this District) will find employment for a good number of Holiyars and Madigars, especially the Totis and Talaris. It is a most suitable kind of work which should be largely resorted to in every District wherever possible. The reason against its feasibility which was given to me in Tumkur, (namely, that the plants were too dry and that the bark could not therefore be readily separated from the wood), does not apparently exist, at least in these parts.

249. Village works in the various hoblis must be expanded during the next 2 or 3 months, when, if rain falls, every work may have to be closed.

250. *22nd January* 1892.—CHINTAMANI TO SRINIVASPUR, 13 MILES.—A loop line of road to connect the Chintamani-Srinivaspur road with the Srinivaspur-Kolar road was being constructed as a Relief Work. 50 men were working at it, the wages being 3 annas per man per day.

251. The condition of the Srinivaspur Sub-Taluk was much the same as that of Chintamani.

252. *23rd January* 1892.—SRINIVASPUR TO KOLAR, 15 MILES.—I saw some wells under construction at Srinivaspur for drinking purposes. One drinking water well near the town with stone facing, constructed at a large outlay by Government only a few years ago, is now quite dry. Another is therefore being excavated close to it. The stone facing of the abandoned well can be put to no use. Where springs are exhausted in a few years, or where deepening from time to time is necessary, the use of galvanized iron rings would be found cheap in the long run, and it is well worth a trial in special situations.

253. Passed the Muduvadi tank, a large reservoir which was recently repaired at a cost of Rs. 23,000. It was quite dry.

254. Within two miles of Kolar, I saw the Barandhalli tank being repaired as a Relief Work. 64 persons (men and women) were at work in gangs, each consisting of 4 men and 2 women. The work was done by pits of 8 cubic feet each, called in these

parts *kuntas*, and the wages allowed were Rs. 0-12-4 for each *kunta*. The Patel superintended the work, which was attended by coolies from several of the surrounding villages. The arrangements made appeared to be suitable in every way.

255. Two or three able-bodied men of the Waddar class complained that the daily wage was not sufficient for them and said that they could do more work and earn more for the day, and asked to be allowed to do this. There is a Public Works Department agency work 2 miles from this place, where there is no limit to the daily work and therefore to the wage which can be earned, and men who can work more and earn more can go there. These village works are intended for the average villager. He can easily do the work, earn a moderate wage and attend to his usual avocation.

256. A Toti complained that part of his Service Inam land had been taken up many years ago for a road and no land given in exchange. This was not the first complaint of the kind in this District. The Deputy Commissioner will enquire into such cases when they come before him and give relief wherever possible.

257. Arrived at Kolar at 10 A. M. The members of the Municipality presented an address in which, after expressing their loyalty to His Highness the Maharaja, and their confidence in the ability of the Government and its local officers to meet with the distress which was now upon the country, they asked for a permanent water-supply for the town of Kolar. In thanking them for the kindly welcome they had given, I told them that it would give me great pleasure to convey to H. H. the Maharaja the sentiments of loyalty and devotion to which they had given expression, and explained to them that from all that I had seen and ascertained in the course of this somewhat protracted tour, the present condition of the country and the people was yet not such as to give cause for anxiety; that there had been but *one* bad season and, although prices were high, there was a good stock of grain in the country. I said that all was being done that could be done to mitigate the suffering due to want of a sufficient water-supply and pasture for cattle, by sinking drinking water wells, wherever required, and throwing open to raiyats the grazing in State Forests and Plantations and Amrut Mahal Kavals. I told them further that large advances were being made for the excavation of irrigation wells; that for the poor and landless classes on whom the high prices pressed hard, works had been sanctioned on which they could earn adequate wages; that in this course the Government would persevere for the next two or three months; that if then we got good rain there would be no cause for further anxiety, but that if unfortunately the present scarcity deepened into famine, they might rest assured they would find the Government and its officers fully prepared to meet the contingency. As regards the suggestion which was made for supplying Kolar with water from the Antargange, I pointed out that Antargange would yield only from 600 to 700 cubic feet of water per day, that this supply could meet the wants of only an insignificant fraction of the population of Kolar, which was about 12,000, and that Antargange did not therefore seem to be a good project. The question of a water-supply for the Town was, however, easy of solution, as it seemed quite feasible to improve the Kilkote tank so as to store a two years' supply by enlarging its capacity and extending its catchment, and it was possible also to improve other tanks which were on a higher level than the town, and I assured them that the question would be investigated and dealt with as early as possible.

258. In the evening I drove through the Town. I visited the Orphanage originally started by Miss Anstey and now conducted by the Methodist Episcopal Church of the United States of America. There were 80 orphans now on the rolls, but the total number sent out from the orphanage and settled in life is 500. An address was presented here, in which the Missionaries in charge offered to place their services at the disposal of the Government if such help was required in this unfavorable season. They asked for wells in the four or five villages in the Kolar and Mulbagal Taluks in which their old orphans had settled down, and also for a drinking water well in the premises of the Orphanage. I thanked them for their kind offer of help, as our staff of officers, however strong, would not be sufficient if there should be a real famine, and I promised to consider favorably the question of supplying the wells asked for, and I accordingly instructed the Deputy Commissioner to consider the question and to do the needful. I then visited the Dispensary.

259. Passing by the Merchants Street, I was informed that there were 15 waggon loads of imported rice of 135 bags each, in stock with the merchants, but that there was no sale for it as yet. The merchants asked that the Kunnirgunte should be repaired and that another well should be sunk in the Sripati tope for supplying drinking water. The Deputy Commissioner, I understood, was studying these local improvements.

260. The Girls' School, which I next visited, had 80 girls on its rolls It receives a grant-in-aid of Rs. 40 per mensem from the Government and the managers ask that the school should be taken under Government management. A more commodious building is wanted for this school. The Executive Engineer suggested that some of the materials from the Jail building which is being dismantled might be used for providing such a building. I asked the Deputy Commissioner to form a committee and to place before the Government the necessary proposals in connection with this institution, including the provision of a suitable building.

261. I then visited the Government High School which had 170 boys on its rolls. The school building, though new, is unfortunately not well located and has not a sufficiently large compound.

262. I then visited the Kannada School which is in the same premises as the English High School. I was informed that very few students appear for the Local Examinations as the boys go to the English School at a very early stage. The Kannada School apparently suffers by its close proximity to the English High School.

263. The Hindustani School is very ill-ventilated.

264. On returning to the camp, I spent an hour in talking to the Amildars and leading raiyats and merchants of the Kolar, Bowringpet, Malur and Mulbagal Taluks. In the Kolar Taluk, the dry crops were reported to have ranged between 2 and 4 annas and that the Vemagal Hobli was the worst of all. The wet crops had failed altogether. Some village tank works were actually being conducted. The Amildar stated that 35 works of this kind, estimated to cost Rs. 74,000, were selected for this taluk.

265. In the Bowringpet Taluk, it was reported that the Budikote Hobli was very badly off, the big tank not having filled this year. The Amildar stated that there was no demand for work as the coolies went in large numbers to the Gold Mines, where they received very high wages. 21 tank works have been selected for this taluk, out of which four were for the Budikote Hobli. I instructed the local officers to start work for this hobli at once.

266. In the Malur Taluk, the crops were represented to have been good and that there was no immediate need for work. The Amildar stated that he had selected 12 tank works for this taluk.

267. In the Mulbagal Taluk, the dry crops ranged from 2 to 4 annas, but the wet crops failed. The sugar-cane under wells was reported as being in good condition. The Amildar stated that 24 tank works had been selected for this taluk at an estimated cost of Rs. 50,000, and that 8 works were actually going on.

268. There is great scarcity of water in all these taluks. I impressed upon all present the mistake of depending upon tanks alone for water-supply, and advised the sinking of as many wells as possible.

269. It appeared to me that the local officers were all unwilling to start village tank works at once, on the ground that for some time to come the people had work in fields, &c., and would not come in large numbers. I pointed out to them that it was not the intention of Government to have large numbers on the works nor that the works should be finished as quick as possible. The object was to furnish employment and means of livelihood to the stray individuals such as the Begars and other poor landless men, of whom there was a small number to be found

in each village, and who much wanted employment at such a season. The Amildars were therefore instructed to commence small tank works at once in all affected tracts, without waiting for a large number of coolies to seek employment on them.

270. It was represented that a large number of applications for advances for irrigation wells were pending disposal in the Kolar, Malur and Mulbagal Taluks. I replied that it was very necessary to attend to those applications at once, and that the Deputy Commissioner and his Assistants should dispose of them without waiting for the Special Officer appointed for this purpose, who would be engaged for some time longer in the Chikballapur and Bagepalli Taluks.

271. It was brought to notice that large tracts of land in the Mulbagal Taluk were over-run with prickly pear. The eradication of this plant was a work which the Deputy Commissioner could order in places where no suitable tank work was available.

272. I also suggested to the Deputy Commissioner the desirability of digging pits on the fringe of the water spread of the Kolar Amanikere tank, with the view of eventually planting them with thick rows of trees, for the preventing of silt being brought into the tank.

273. It was brought to notice that a feeding chattram at Narsapur in the Malur Taluk had been transferred to Malur Town and caused inconvenience. I asked the Deputy Commissioner to report the matter in the Muzarayi Department.

274. *24th January* 1892.—In the morning, I inspected the big tank at Kolar. A good portion of the bed I was glad to find under crop. I next visited the village tank work close by, and was satisfied with the way in which it was being carried out. I next visited the Somesvara temple. The surroundings are untidy. The premises have been encroached upon by a number of small huts on one side and the temple and the *prakara* are in need of some urgent repairs. I pointed out what was required and asked the Deputy Commissioner to submit his formal requisition in the Muzarayi Department.

275. In the evening, I drove to Bowringpet and, after a brief interview at the Railway Station with members of the Mining Board, took the train for Madras, to report in person to His Highness the Maharaja my impressions of the general state of the country.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Muzarayi),—dated 16th January 1892.

READ:—

Subject No. 112 of the Proceedings of the Dasara Representative Assembly for 1890.

No. M. 364-71, DATED BANGALORE, 16TH JANUARY 1892.

ORDER THEREON.—Two questions are raised in connection with the above subject, firstly, the collection of Pudavat Funds and secondly, the recovery of rents due on temple lands.

2. As regards the first, the Deputy Commissioners are requested to examine all Pudavat Fund cases of the temples under Muzarayi management and to take steps for their recovery and safe investment.

3. As regards the second, the Government direct that the rent due on temple lands be recovered under the Mysore Land Revenue Code and Rules, like rent due by inferior holders to superior holders, the Muzarayi Officer concerned supplying the place of a land-lord for the purposes of the said Code and Rules.

4. The Deputy Commissioners will also be requested to forward for the information of Government a statement showing the particulars of Pudavat Funds lent to private individuals as per accompanying form.

PUBLIC WORKS.

Proceedings of the Government of His Highness the Maharaja of Mysore, (Public Works),—dated 12th January 1892.

READ :—

Chief Engineer's Note, dated 13th November 1891, submitting "Final Issue" of the Public Works Department Budget for 1891-92.

2. Chief Engineer's Note, dated 19th November 1891.

NOTE ON THE FINAL ISSUE OF THE PUBLIC WORKS BUDGET ESTIMATES FOR THE YEAR 1891-92.

The "Final Issue" of the Budget Estimates of the Public Works Department for the year 1891-92 herewith submitted for sanction, provides for a total expenditure of Rs. 30,83,000 from the following sources:—

	Preliminary Issue. 1891-92. Rs.		Final Issue. 1891-92. Rs.
Provincial Fund	20,00,000	...	21,25,000
District Funds	5,50,000	...	5,80,000
Provincial Irrigation Fund	3,71,000	...	3,71,000
Palace Fund	3,000	...	7,000
Total.....	29,24,000		30,83,000
Difference more		...	1,59,000

2. It will be seen from the above that the original grant sanctioned in Government Proceedings No. 3266-92—388-414, dated 29th July 1891, is to be enhanced by Rs. 1,59,000, *viz.*, Rs. 1,25,000 under Provincial Fund, Rs. 30,000 under District Funds and Rs. 4,000 under Palace Budget. The increase under Palace Budget has already been sanctioned by Government. The distribution of the Final grant over the several Budget heads will be found in abstract pages 2 and 3.

Sanction is solicited to the extra grant of 1¼ lakhs now proposed under the Provincial Budget, the same being absolutely necessary to meet requirements.

Several incomplete works of the past official year were inadvertently not brought forward by Executive Engineers for entry in the Preminary Issue, while funds are needed for the new works since sanctioned, also for increasing the allotments of some of the works that are likely to be completed this official year.

PROVINCIAL BUDGET.

3. Of the increased grant of Rs. 21,25,000, Rs. 9,39,000 has been transferred to "Provincial Irrigation Fund," leaving a balance of Rs. 11,86,000 for Provincial works proper against Rs. 11,40,000 provided in the Preliminary Issue.

4. Under Military, the grants fixed in the Preliminary Issue, *viz.*, Rs. 43,000 for Original Works and Rs. 5,000 for Repairs, remain unaltered; but the allotments for the budgetted works have been redistributed, in consultation with the Military Secretary to meet the most pressing requirements.

5. Under "Original Civil Buildings," the grant has been increased from Rs. 1,98,000 to Rs. 2,52,000 or by Rs. 54,000. This large increase is due to provision having had to be made for 17 incomplete works of the previous year omitted in Preliminary Budget and for a few new urgent works since sanctioned. The allotments for some of the works in progress have also been augmented as desired by Divisional Officers to provide for the increased outlay anticipated.

6. Under "Original Communications," the grant has been reduced from Rs. 1,80,000 to Rs. 1,58,000 or by Rs. 22,000. The decrease is due to the omission of the marginally noted works ordered in Government Proceedings quoted above, to be deferred. It may here be noted that the postponement of the building of a suitable bungalow at Hampapur, in place of the present dilapidated and inconvenient one, is much to be deprecated, as a new bungalow would prove a great boon to many travellers along the Manantoddy road. The allotment assigned for the Bhadra bridge at Balehonnur has also been reduced from Rs. 45,000 to Rs. 35,000 the latter sum being considered sufficient to meet the year's outlay.

1. Constructing new 2nd Class Traveller's Bungalow at Hampapur.
2. Constructing 3rd Class Traveller's Bungalow at Adjampur.
3. Improving road between Yelwal and Hunsur.

7. Under "Original Miscellaneous Public Improvements" also, there has been a reduction in grant, from Rs. 1,80,000 to Rs. 1,62,000. The works ordered to stand over, in Government Proceedings above referred to, have been omitted. The allotment of Rs. 10,000 provided in Preliminary Budget for the water supply for the town of Shimoga, has been resumed, as the project has not yet been developed. Any small amount that may be required to cover survey charges, will be given from the reserve grant under this head.

8. *Repairs.*—The provision under "Repairs" has been increased by Rs. 17,000, *viz.*, Rs. 5,000 under Civil buildings, Rs. 10,000 under Communications and Rs. 2,000 under Miscellaneous Public Improvements. The original reserve grant of Rs. 37,845 provided under "Communications" has been found insufficient for the special repairs of Provincial roads, and for the petty repairs required to the Traveller's Bungalows all over the Province.

District Fund Budget.

9. The grants fixed for the several Districts in the Preliminary Issue have been modified, *as far as possible* to correspond with those provided in Budgets submitted by Local Fund Boards, and sanctioned by Government in General Department. The orders on this point contained in para 5 of the Proceedings No. 4117-26—L. 286, dated 7th July 1891, will receive attention in future, full compliance therewith this year in some Districts not being practicable. For instance, in Kolar Division, a reserve grant of only Rs. 1,000 each has been allowed under "Original" and "Repairs" Communications in Proceedings No. 1597-1608—L. 135 of 13th May 1891, whereas sums amounting to Rs. 10,920 were provided for in Public Works Preliminary Budget under those heads to meet requirements for incomplete works of previous year, and the amount has already been appropriated. The allotments for works and the reserve grants provided for in Final Budget, are what have been reported by Executive Engineers of Divisions to be absolutely necessary to meet requirements.

The total grant sanctioned by the General Department from this source amounts to Rs. 5,72,700 against Rs. 5,50,000 provided in Preliminary Budget Estimate, whilst the actual requirements for the several Districts aggregate Rs. 5,80,000. A comparison between grants as sanctioned in General Department and those now proposed for sanction will be found in page 9 of Final Budget.

10. The grants under "Original and Repairs" Miscellenaous Public Improvements have been reduced to the amounts actually required for the completion of sanctioned well works, &c., already started by the Public Works Department.

Provincial Irrigation Fund.

11. The total grant under this Budget, including the grant-in-aid of Rs. 9,39,000 from Provincial Funds amount to Rs. 13,10,000 or Rs. 79,000 more than that sanctioned in the Preliminary Issue. Provision has now been made for 45

incomplete works of the past official year not provided for in the Preliminary Issue by an oversight on the part of Executive Engineers and also for some new works since sanctioned. Executive Engineers have been requested to see that such omissions do not occur in future.

12. The provision under "Repairs" has been allowed to stand as originally provided.

PALACE BUDGET.

13. The grant under this Budget has been increased by Government from Rs. 3,000 to Rs. 7,000 which is now provided for. The distribution of the amount will be found in page 60 of the Final Budget.

ESTABLISHMENT.

14. The total charges under this head aggregate Rs. 5,15,000 against Rs. 5,09,000 provided in the Preliminary Budget. The increase is due to provision having been made for Mr. McLaughlin, Executive Engineer, whose services have been retained by the Darbar to end of March 1892, the Preliminary Budget having provided only for six months, *i. e.*, to end of September 1891.

The charges under this head are rateably distributed as usual to the several Budgets, as shown below, Palace Budget excepted. The distribution differs from that shown in Preliminary Budget owing to the increase in the grants for Provincial and Provincial Irrigation Budgets.

	Rs.		Rs.
Provincial Fund	1,78,000	to	1,99,000
Provincial Irrigation Fund	2,24,000	to	2,19,000
District Funds	1,07,000	to	97,000
Total.....	5,09,000		5,15,000

GENERAL REMARKS.

The Bridges Division which was shown separately in the Preliminary Issue has now been omitted, it having since been amalgamated with the Kadur Division.

No. 283-308—39-64, DATED BANGALORE, 12TH JANUARY 1892.

ORDER THEREON.—The Original Public Works budget grant under "Provincial" was Rs. 20,00,000. As several incomplete works of the previous year have inadvertently not been brought forward for entry in the "Preliminary Issue," as funds are needed for new works since sanctioned, and as the allotments for some of the works that are likely to be completed during this official year have to be increased, an additional grant of Rs. 1,25,000 is required, increasing thus the total grant from Rs. 20,00,000 to Rs. 21,25,000.

2. Under District Funds, an increase of Rs. 13,600 is provided for in the Final Budget to meet requirements on account of allotments for works and the reserve grants which are reported to be absolutely necessary in the marginally noted Districts.

		Rs.
Tumkur	...	4,400
Kadur	...	1,500
Hassan	...	7,700
Total.....		13,600

3. An increased grant of Rs. 7,000 is provided under Palace Fund against Rs. 3,000 in the Preliminary Issue. This increase of Rs. 4,000 has already been sanctioned by Government.

4. With the increased provisions above referred to, the "Final Issue" of the udget as submitted by the Chief Engineer is sanctioned. The Comptroller will be uested to make the necessary alterations in the General Budget and place the ditional amount now sanctioned at the disposal of the Public Works Department.

MUZARAYI.

TABULAR STATEMENT OF MATTERS OF ROUTINE FOR THE MONTH OF JANUARY 1892.

Serial No.	Proceedings.			Subject and Order.
	No.	Date.	To whom sent.	
1	362—3.	16th	The Chief Engineer and the Deputy Commissioner of the Mysore District.	Stating that the Somanathpur temple in the Tirumakudlu-Narsipur Taluk is not a muzarayi institution, the chief idol having been removed elsewhere, and no worship being conducted there; and that, as the building is chiefly of architectural interest, it should be preserved in the Public Works Department.
2	388—9.	21st	The Deputy Commissioner of the Bangalore District and the Comptroller.	Sanctioning a sum of Rs. 100 from the funds at the credit of the temple, for the ceremony of sanctifying the goparam of the Sivaganga temple in the Nelamangala Taluk subject to recoupment from the realizations of the temple sarvamanyam villages for the current year.
3	390.	22nd	The Deputy Commissioner of the Shimoga District.	Accepting a notification of sanction for Rs. 12 for repairing the door of Venkataramanadevaru temple in the Nagar Taluk.
4	391.	Do	The Comptroller.	Forwarding a copy of the above.
5	393—4.	Do	The Deputy Commissioner of the Mysore District, and the Comptroller.	Sanctioning a bill for Rs. 11—10—4 being the arrears of pay due to the servants of the Hemadramma temple at Bannur in the Tirumakudlu-Narsipur Taluk, from April to July 1890.
6	403.	Do	The Deputy Commissioner of the Chitaldroog District.	Stating that, in the sannad granted to Tirumaladasachar, Jodidar of Chikerahalli, by H. H. the late Maharaja in 1812, it is clearly stated that free grant of wood may be made for the car procession of Mukhya Pranadevaru in Chikerahalli village, but now such grant is asked both for Mukhya Pranadevaru and Sriramadevaru of the village; calling for an explanation of the above; and directing that applications for free grant of wood should generally be made to this Office through the Inspector General of Forests and Plantations in Mysore.

9	406—7.	26th	The Deputy Commissioner of the Hassan District and the Comptroller.	Sanctioning a bill for Rs. 64—0—11 being the allowances due to the servants of the Chaturbhuja Pattabhi Ramaswami's temple at Holé-Narsipur.
10	408—9.	Do	The Deputy Commissioner of the Mysore District and the Comptroller.	Sanctioning an estimate for Rs. 120 being the cost of purchasing two lifting screw jacks for the use of the Srikantheswaraswami temple at Nanjangud.
11	415.	27th	The Deputy Commissioner of the Hassan District.	Stating, with reference to his recommendation that sanction may be accorded to the repairs of Virupaksheswara and Hallada Rameswara temples at Hassan, and to the restoration of the Inam land attached to the latter temple, that unless a moiety of the estimated cost of repairs is contributed by the community interested in the preservation of the temples, no payment of the amount equivalent to the other moiety will be sanctioned from the General Muzarayi surplus fund.
12	417.	Do	The Deputy Commissioner, Hassan District, and the Comptroller.	Sanctioning the reconstruction of the main building of the Bisle Chattram, Manjarabad Taluk, at a cost of Rs. 11,647, and requesting the Deputy Commissioner to submit, for formal sanction, a revised estimate for Rs. 11,647 and also a statement showing the particulars of the actual amount of funds available up to date at the credit of the institution.

DECISIONS OF GOVERNMENT IN REVENUE CASES.

JANUARY 1892.

Serial No.	Proceedings. No.	Proceedings. Date.	Proceedings. To whom sent.	Subject and Order.
1	11549—P. 206.	12th	The Deputy Commissioner of the Bangalore District.	In the matter of Petitions Nos. 764 and 968, dated 14th July and 10th August 1891, respectively, from Mrutyunjaya Rao and others of Dommasandra village, Anekal Taluk, complaining that their lands, Survey Nos. 137, 164, 45 and 186, in the said village had been assessed at high rates, without being classified according to their capability, and praying that Hulgaval rates be fixed thereon—read Deputy Commissioner's docket No. 735, dated 15th December last, submitting a copy of Survey Superintendent's letter No. 588, dated 12th idem, stating that no rates for Hulgaval alone can be fixed and that Petitioners' allegation that their lands were not classed, is false. *Order.*—The lands referred to by Petitioners were classified in the usual course and assessed according to rules. The rates fixed appear reasonable. The Petitioners' complaint is groundless. The Government, therefore, decline to interfere.
2	11757—47.	20th	The Deputy Commissioner of the Kadur District.	Appeal No. 1417, dated 9th September 1890. *Appellant* ... Kalappa, late Shanbhog of Advalli, Koppa Taluk, Kadur District. The Sessions Judge of Shimoga having remarked in case No. 2 of 1890 that the Appellant "failed to help the Sarkar in tracing the murder, and threw every obstacle in the way of the true facts coming to light," the Deputy Commissioner of Kadur dismissed him from office on the 5th August 1890. The appeal is against this order. The Appellant's contention is, that he gave all the information in his power, that he threw no obstacles whatever and that the remarks of the Sessions Judge are gratuitious.

Serial No.	Proceedings.			Subject and Order.
	No.	Date.	To whom sent.	
				The facts of the case, so far as the Shanbhog is concerned, are as follow:—
				In December 1888, a certain man disappeared from his village all of a sudden. His wife reported the matter to the Patel who ordered a search to be made for him, but without any effect. Two months afterwards, the wife of the missing man went to the Appellant and asked him to write a petition for her addressed to the Amildar, asking him to find out whether her husband was alive or dead. The Appellant accordingly caused a petition to be written and gave it to her. She took it, but came back shortly afterwards accompanied by her husband's cousin named Govindagauda (who was subsequently charged with the murder of her husband), and returned the petition to the Appellant. The widow of the deceased states that she returned the petition, because Govindagauda assured her that her husband was alive, and the Appellant also states that when the petition was returned to him, Govindagauda said that there were rumours of the deceased having been seen at Harandur, Amdikan, Nemmar Bungalow and other places, and that there was no use in giving a petition and putting every body to the trouble of going to the Cutcherry. The Appellant took no further action in the matter, and says that the petition returned to him was destroyed by his children. In October 1889, the Police Jamadar came to the village, and enquired into the case, but every one in the village including the widow of the deceased having stated that the deceased had gone on a pilgrimage, the matter was dropped. There is nothing to show that the Shanbhog was then examined by the Police Jamadar or that he made any statement in the matter. Subsequently, however, that is, on 18th March 1890, Appellant gave information to the Head-Quarter Inspector of Police that there was suspicion of the deceased having been done away with. This led to an enquiry into the matter and the prosecution of Govindagauda. The Sessions Judge who tried the case, while considering that the deceased was murdered by somebody, discharged the accused, as the evidence against him was not sufficiently strong. Now, the chief point for consideration is, whether the Appellant knew from the beginning that foul play was at the bottom of the deceased's disappearance, and wilfully kept the authorities in ignorance, or he was put in possession of such information as he deemed reliable

Serial No.	Proceedings.			Subject and Order.
	No.	Date.	To whom sent.	
				just about the time when he communicated his suspicions to the Head-Quarter Inspector. The Appellant's version is, that he knew nothing of the matter till about March 1890. He states that about 5 or 6 days after the arrival of the Head-Quarter Inspector, *i. e.*, 14th March 1890, he asked a witness named Budaiya to tell him the truth in the matter, and he having given him some information of a criminal nature, he communicated it to the Head-Quarter Inspector, but he does not state what led him to put the question to Budaiya, and Budaiya states that he gave no information of the kind to the Appellant. The record, however, shows that there was some enmity between Budaiya and the person accused of the murder, in consequence of some division of land which took place somewhere about the 9th March 1890. It seems therefore probable that Budaiya gave the information to the Appellant in the month of March 1890, and, if so, the latter did not lose much time in carrying the information to the Police. The only suspicion is, whether the Appellant, who was the Shanbhog of the village, could have been ignorant of a matter of this kind for upwards of a year and whether the fact, that the petition which he caused to be written was returned to him without presentation to the proper authorities, was not sufficient to excite his suspicion, but the Government do not see anything unnatural in his conduct which would justify the presumption that he had a guilty knowledge of the matter and kept it back from Government. It is quite possible that when the petition was returned to him, he believed the statement of Govindagauda that the deceased was alive, and as the Police enquiry instituted shortly afterwards showed that the deceased was alive, it is also probable that he remained under that impression till a quarrel broke out between Budaiya and the accused, and the former gave him the information. It must also be noted that the widow of the deceased was decking herself with jewels, &c., and conducting herself as if her husband was alive, and this probably gave no room to the Appellant to think that there was any foul play in the disappearance of the deceased. In these circumstances of the case, it seems hard that the Appellant should be dismissed from office, merely on the supposition that he must have known something of the murder in virtue of his position. There is not an *iota* of evidence to show that

Serial No.	Proceedings. No.	Proceedings. Date.	Proceedings. To whom sent.	Subject and Order.
				he threw any obstacles in the way of an effective enquiry, but, on the contrary, it was the information given by him that led to an enquiry and committal of the case to the Sessions Court. *Decision.*—Under all the foregoing circumstances, and considering the fact that the Appellant had been already out of office for nearly two years, the Government directed that he be restored to office.
3	11654—P. 194.	21st	The Deputy Commissioner of the Kolar District.	In the matter of Petition No. 1683, dated 1st November 1890, from Venkategauda of Arahalli, Mulbagal Taluk, complaining that a mango tree which stood on his field, No. 63, had, during Survey Settlement, been sold for Rs. 21-4-0 to Respondent Ranganna, the occupant of field No. 2—read the following :— 1. Government decision No. 9570—387, dated 21st November 1890, requesting the Deputy Commissioner to inspect the disputed locality himself and ascertain, by reference to Survey and Revenue accounts and by examination of all the witnesses that might be produced by both parties, whether the tree in question belonged to occupant of field No. 63 before Survey, and, whether its produce was enjoyed by such occupant, to effect an amicable settlement between the parties during his inspection, and, if that was not possible to submit the proceedings with the record of the additional enquiry and his findings. 2. Deputy Commissioner's reply No. 2223—536, dated 13th November 1891, reporting that, on 24th September last, he inspected the mango tree in dispute and that Appellant Venkategauda having died, his sons and Respondant Ranganna had settled the matter amicably between themselves. *Order.*—The dispute having been settled amicably, the appeal will be struck off the file and the proceedings returned to Deputy Commissioner.
4	11948—P. 268.	25th	The Deputy Commissioner of the Mysore District.	In the matter of Petitions Nos. 1528—2102 and 2843, dated 19th October 1889 and 20th February 1891, respectively, from Lingegauda of Madapura, Krishnarajpete Taluk, claiming refund of Rs. 46-8-0, being a portion of the sale

Serial No.	Proceedings. No.	Proceedings. Date.	Proceedings. To whom sent.	Subject and Order.
				proceeds of his ½ share in a wet land below the tank at Gudé Hosahalli village in the said Taluk—read Deputy Commissioner's docket No. 825, dated 31st December 1891, submitting the proceedings in the case. *Order.*—The Petitioner's claim for a refund of a portion of the sale proceeds of land No. 53 is clearly inadmissible. The whole proceeds were properly credited to Government towards the arrears due on the lands held by Petitioner and others jointly. This appeal is rejected.
5	11949—P. 168.	25th	The Deputy Commissioner of the Tumkur District.	In the matter of Petition No. 2993, dated 10th March 1891, from Venkataramaiya, Shanbhog of Tandagagrama, Tiptur Taluk, complaining that during the Survey Settlement he had been deprived of his right to the two Hippe trees standing on banjar land, Survey No. 177 in the said village, which he had bought for Rs. 8 from one Timmi; and that the trees were subsequently sold in public auction to one Honnagiri for Rs. 10; and praying that his hak to the trees in question be restored to him—read Deputy Commissioner's docket No. 204, dated 14th July 1891, submitting the proceedings in the case. *Order.*—The sale deed relied upon by Petitioner is not forthcoming. He has failed to prove his right to the trees in dispute; the alleged title of Timmi, who is said to have sold the trees to Petitioner, is also not established. During the Survey Settlement, the land, on which the trees in dispute and 4 other trees stood, was treated as kharab belonging to Government. Petitioner's claim to the trees cannot, therefore, be entertained. Appeal rejected.

In the matter of Petitions Nos. 2031 and 2032, dated 29th November and 11th December 1889, respectively, and No. 729 of 1890 from Mr. B. A. Brito, Coffee planter, Kadur District, complaining that although, under the terms of the settlement of 1881-82, he was liable to pay, till re-survey which took place in 1888-89, only half assessment at 12 annas per acre on the lands taken up by him, the Deputy Commissioner had recovered from him full assessment at Rs. 1-8-0 per acre on the 528 acres of the Dandubittahara estate from 1884-85 and on Nos. 49 and 52—55 of the Nandigavé estate from 1886-87, and claiming refund of the excess payment of Rs. 3,817-12-0 with local cess; and also praying for the refund of Rs. 3,000 paid on account of arrears on the five new Nos. (292—296) of the Mennsingundi estate, as they were not in his enjoyment till the final settlement of 1888—read correspondence ending with the letter from the Deputy Commissioner of Kadur, dated 10th December 1891, No. 469. *Order.*—In 1881-82, the then Deputy Commissioner Mr. Meiklejohn granted 1,356 acres of land in the village of Dandubittahara to Mr. Brito for coffee cultivation as shown below :— Five hundred acres on full assessment of Rs. 1-8-0 an acre, Five hundred and twenty-eight at half rate or 12 annas per acre, "till re-survey or for 3 years," and 328 acres at 4 annas an acre as grass land with a remark that "all the above settlement is subject to revision on re-survey." In the re-survey of 1888-89, a large excess was discovered, and the whole survey area was confirmed to him at the following rates :—

				The excess does not appear to have been charged with retrospective effect, but only from 1888-89. 2. Mr. Brito's complaint is that, under the terms of the settlement, he is only liable to pay at 12 annas per acre on the 528 acres till 1888-89, but that the Deputy Commissioner has collected from him full assessment at Rs. 1-8-0 an acre from 1884-85. Mr. Meiklejohn, who made the charge, informed him that the intention of the settlement of 1881-82 was to give him the half rate only for 3 years or till the re-survey if it took place earlier, and not to give him the same rate till the re-survey, if it did not take place within 3 years from 1881-82. Probably that was the intention of Mr. Meiklejohn, but it was not clearly expressed, and the language used, *i. e.*, "till re-survey or for three years," is somewhat ambiguous and admits of the different construction put upon it by Mr. Brito, namely, that "the rates will not be altered, till the re-survey, when, proper rates will be determined, but should the re-survey take place earlier, you shall have the land at 12 annas per acre for 3 years certain." This appears to Government to be a reasonable interpretation, because it is impossible to conceive a reason for limiting the exemption to the re-survey, if it took place earlier than 3 years, and to 3 years, if it took place later. If the object of the limitation of 3 years was to give him time to clear the jungle, it cannot be attained by the completion of the re-survey, and if the object of the limitation to the re-survey was to see that fair rates are charged, the limitation of 3 years becomes meaningless. Under these circumstances, the Government are pleased to direct that the excess sum collected from 1884-85 to 1887-88, *i. e.*, Rs. 1,584 be refunded to him. Mr. Brito's claim for the refund of the excess payment for 1888-89, in which year the re-survey was completed, is inadmissible and is disallowed. 3. In Nandegavé 520 acres of No. 49 were given to Mr. Brito at the half rate of 12 annas an acre for 5 years, on the ground that it was reported "that the land was burnt out" Some other lands were also granted at 4 annas an acre with the remark in the end that the "assessment is temporary and subject to revision on re-survey." Here also Mr. Brito claims permission to pay at the lower rate of 12 annas till the re-survey which took place in 1888-89,

				whereas the Deputy Commissioner charged him at Rs. 1-8-0 an acre from the expiration of 5 years, for which period alone the half rate was charged. Mr. Brito's claim in this respect is groundless. The time for which ½ rate was allowed and the ground for it are specified, and the half rate has no connection with the re-survey. The object of mentioning that the settlement was temporary and subject to revision was clearly to retain the power of imposing fair rates of assessment by transferring grass lands into coffee lands, &c. This claim is therefore disallowed. 4. In Dattatripitt, Mr. Brito's complaint is, although the lands were nominally made over to him in 1881-82, the boundary disputes between these lands and of Dattatreya Mutt were not settled till 1888-89, and that he should therefore be allowed to pay assessment thereon from that year only. The Deputy Commissioner states that, notwithstanding the boundary dispute, Mr. Brito had possession of the lands from 1880-81 and that he opened out the jungles and planted to a considerable extent before the boundary dispute was finally settled. The Government therefore see no reason to entertain the plea put forward by Mr. Brito. 5. The Government have dealt with Mr. Brito's claims in a very liberal spirit and he has also had many concessions in the way of being allowed to retain large areas of excess without payment of any value. He should therefore be informed that any further petitions from him on the subject will not be entertained.
8	12207—P. 206.	29th	The Deputy Commissioner of the Kolar District.	In the matter of Petition No. 640, dated 3rd July 1890 from Iyappa Reddi, Patel of Palya, Srinivaspur Sub-Taluk, complaining that during the Survey Settlement 6 guntas of waste land out of Survey No. 157 in the Devalpalli village had been deducted from his khate and settled in favor of Hanumappa, and that 4 guntas out of Survey No. 69 in the Anjiganahalli village had been included in the khate of Channappa; and praying that the lands thus taken away be put in his (Petitioner's) possession—read Deputy Commissioner's docket No. 1936—469, dated 13th October 1891, submitting the proceedings in the case. *Order.*—The Government see no good reason to interfere with the revised settlement

				made in favor of Hanumappa in accordance with the order of the Survey Superintendent, whereby the 6 guntas of waste appertaining to Survey No. 157 was given to him, on the ground that the trees standing thereon were planted by his father. The Petitioner alleges that Hanumappa declined to take up this waste land before the Survey officer and that it was therefore granted to him in the first instance. There is a preponderance of evidence to the effect that Hanumappa did not decline to take up the waste land in question, but, on the contrary, agreed to take up all the lands comprised in No. 157. The Amildar gives good and sufficient reasons for disbelieving the witnesses examined by Petitioner and for presuming fraud and misrepresentation in connection with the original "Nakabul" shara which appears in the Phutkul-Patrika. It is highly improbable that Hanumappa, who retained the cultivable portion of No. 157, would have declined to take up a small portion of waste land belonging to the same number, which contained valuable trees planted by his own father. Petitioner's claim to this piece of land is therefore inadmissible. With regard to Petitioner's complaint, that 4 guntas comprised in his khata No. 68 has been added on to the khata of Channappa, No. 69, it appears from the local enquiry and examination of accounts made by the Amildar that this plot of land was erroneously included in No. 68, while in reality and according to actual enjoyment, it belonged to Channappa and formed portion of Survey No. 69. Petitioner has therefore no right to complain of the erroneous entry having been rectified. The Petitioner's appeal is rejected as groundless in respect of both the lands in dispute.

				would be refunded; and claiming refund of the difference—read Deputy Commissioner's No. 820, dated 6th January 1892, submitting the proceedings in the case. *Order.*—Petitioner's claim for refund of the difference between the amount of the 1st sale and that of the 2nd sale is inadmissible. If he was dissatisfied with the Deputy Commissioner's order for the re-sale of the site and tree, he ought to have appealed forthwith and refrained from bidding for and purchasing the property a second time. The fact, that at the 2nd sale the property fetched nearly four times the amount which it did at the 1st sale, shows that the 1st sale was not duly proclaimed and properly conducted. The Government therefore decline to accede to Petitioner's request for refund.
